A T T E N T I O N

Dear Friend:

No. 21 in the accompanying booklet containing a copy of the letter from Mr. Straith, is the first authentic wedge I have received. With it, the American people can break the barrier of silence, which has so long been governmental policy regarding the reality of our interplanetary visitors.

During the past twelve years we have looked to the Air Force for information on UFO's. But from an unimpeachable source I have learned that irrespective of their desires, this body is unable to release full information. The personnel handling this subject consists of appointees and the military; therefore, changes in personnel can be made at any time without reference to the public.

On the other hand, the members of Congress are elected by the people! According to our form of government, American citizens have the right to share in all information that does not jeopardize the welfare of our country. It is the duty of their elected representatives to keep the public informed. Would the acknowledgment of the reality of space craft — which have been witnessed by thousands of people throughout the country — jeopardize the welfare of America?

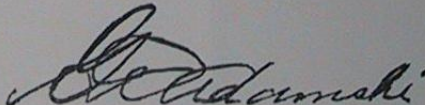

The time has come for the people of our nation to act. If you want release of the records now acknowledged to be in the hands of our State Department, write to your senator, your representative, and to Vice President Nixon. They all need your support to continue their political life!

Tell these gentlemen you want the facts about space visitors revealed without further delay. Tell them you know this information is accessible to them, and you believe the people of this country, and the world, have a right to receive these reports.

The information given to me in the letter printed in the booklet, I have shared with you. The matter is now in your hands. If you really want the truth, you can get it. But you must act immediately and start a flood of mail going to the members of the House of Representatives, the members of the Senate, and to Vice President Nixon.

If the pressure from the people is vigorous and continuous enough, the truth will be given. But this cannot be accomplished if you are indifferent. Act now . . . and get all your friends to do likewise. The results depend upon you.

Very sincerely,

George Adamski
