

This is one of the many occurrences that was experienced by Mr. Micki Fraser during the 75-76 Ufo seasons. This was the closest that he ever came to the object and it occurred July 14/1976. Both Fraser and Dean Middleton were coming back from Carman in the same truck between 12:00 and 12:30 AM.

They had just turned west at Barnsley corner 5 miles north of Carman, or at the jnc. of highways 305 and 13.

There down the road from them was a huge red ball sitting on the road. The two men both approximated that the light was about the size of a helicopter. There were no distinguishing marks or shape, just this blood ~~shaped~~ colored red ball.

"It seemed," said Fraser that the minute we put our eyeballs on it that it took off..It didn't take it long to get its speed up and it was moving faster than a jet when it got going." They had turned the truck off and both claimed that it made no noise. It made a bee-line for Winnipeg and he added that when it crossed the highway 13, that it just cleared the hydro lines that run along the highway.

Another incident at the Middleton farm occurred on Aug. 16 and involved Dean and Ronald. As Ronald described the case to us the object came out of the south-west and was headed towards the north. Ronald stated that the object was red in color and that when he lined it up with the top of the truck he noticed that it was moving up and down in a wave like motion. This is the only significant part of this sighting.
