Viewed file DASS 3800-10-1 Vol. 1. (Jan 50-Dec 67)
Title: "Target Detection - Search (in RG 24 series)
Flying Saucers - General"
originally classified SECRET

A cover sheet closing off this file refers to Vol. 2 "for subsequent correspondence". A vol. 2 therefore also exists. There is a hand-written note on this sheet stating: "The only record not to be disclosed beside all the personal information is the Record of Cabinet Decision of 6/6/67. This record is excluded pursuant to Sect. 69 of the Act" (signature illegible). The "Act" presumably refers to the Access to Information Act.

A further note in the file at the point where this record was removed states that this pertained to government policy on satellites
