

CASE XX, PRINCE RUPERT, B.C., DECEMBER 3, 1952, Weight 62%

The Chief Officer of a Canadian Government Steamship at berth in Prince Rupert at 8.00 AM, P.S.T., on December 3 observed a small bright object travelling east from a position north of the observer. It was about the same brightness as a major planet and subtended about the same angle as Jupiter at its nearest approach to the Earth. It was in view about 6 seconds. There was no sound and no trail.

CASE XXI, OTTAWA, ONTARIO, DECEMBER 16, 1952, Weight 68%

A bright disc shaped object subtending an angle of about $4'$ was observed at 5.14 PM, E.S.T., travelling very fast from north to south west. It was in view for $3\frac{1}{2}$ seconds. The outline was sharp, and the major axis of the projected ellipse was always parallel to the horizon. The colour was similar to the planet Venus, but became slightly more reddish as it approached the horizon. There was no noise and no trail.

CASE XXII, WHITE RIVER, ONTARIO, DECEMBER 17, 1952

A railway yard employee observed a bright green flash in the south south west direction at 4.45 AM, E.S.T. There was no trail or sound.

CASE XXIII, REGINA, SASK., DECEMBER 27, 1952, Weight 74%

From 7.34 PM, M.S.T., to 7.42 PM, M.S.T., the airport control tower officer watched a round luminous object subtending an angle about one third that of the full moon, travel downwards and disappear beyond the horizon. It travelled a vertical angle of 5°
