

Copy of page 5408 of HANSARD, Vol. 108, No. 103, Dec. 4, 1963
(same file) contains questions (No.1416 -- Mr. Winch) re Project
Magnet in the USA (Navy constellations) and Project Magnet in
Canada. The answers are of interest, but are confusing as they
imply that the Canadian Project was similar to that of the U.S.

file

All letters in the former DOT files in reply to inquiries
on Project Magnet insist that Smith's project was "investigation
in the field of geo-magnetics -- for the purpose of studying
magnetic phenomena resulting from unusual boundary conditions in
the basic electro-magnetic theory."
