

COSMIC SCIENCE

Study and Application of Universal Laws

Non-Sectarian

Non-Political

Dear Friend:

Because of the volume of mail coming to me from every part of the world as a result of the two books, *FLYING SAUCERS HAVE LANDED* and *INSIDE THE SPACE SHIPS*, it has now become impossible for me to personally answer all letters. Yet I believe each person interested enough to write, should receive an answer. To date I have concentrated every effort, as well as all money obtained from both the sale of these books and the sale of most of my property, to carrying on my correspondence and the many ramifications involved in this work. Now, I must regretfully ask assistance from those who will be interested in helping to support it. Although untold numbers of people have asked how they could help, this is the first call I have ever made. Such cooperation has now become imperative.

The finances thus acquired will be used to pay office help, and for the purchase of instruments to continue scientific research with assistance from the Brothers. The first project in this program will be along the line of securing protection for humanity from the radiations now present in our atmosphere. Considerable work has already been done toward this end, but much more is necessary before desired results can be achieved.

During the years many questions have been asked numerous times. All these have been listed and answered to the best of my ability from information given me by space visitors. At this point, we realize that the most satisfactory manner by which we can cover the situation for everyone is as follows: We are preparing a series of five brochures consisting of twenty questions and answers each. All previous questions of importance will be answered, and as recent developments may dictate, further information will be included. The issue herein enclosed is the first of the series. These brochures will sell for one dollar (\$1.00) each.

If you are interested in receiving information in this manner, we shall be most grateful if you will send one dollar for enclosed brochure number 1.

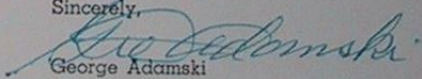

Further issues will be payable in advance, either separately at \$1 each, or send \$5 to cover the series of five brochures. The four to follow will be sent as quickly as they can be prepared for mailing. Meanwhile, we welcome any queries you may have for incorporation into future issues.

I assure you that I will do my utmost to see that all who indicate active interest in this effort are kept informed of future development as progress is made.

The name COSMIC SCIENCE on this letterhead, and under which this series as well as future information will be given, is chartered in the State of California.

With every kind wish, I am

Sincerely,

George Adamski
