survive free. We are not out for
ourselves, but because we believe in
this subject and would have the truth
known. Now - Adamski and
others who claim contacts never seem
able to make appointments to
meet again. According to your
Vancouver talk as reported in "Sun and
Space and Science" (Toronto, Oct. 1961) you
seem to have an operating telephone circuit
- though whether you can call them is
not stated. Could you not ask
your contacts about our problem
and Weaver's worry - and write up
the reply for the Review?
Can you tell us how to get in touch
with some of them?

I was most interested in what you
said (in Vancouver) about light and
time. It fits with the book "My Contact
with F. S. by Dino Krassiden and, if
you are a Drawers of it, look at the
chapter on the Acceleration of light (page
143 onwards). I would be glad to
help solve the puzzle of any undecipherable
messages you receive. Very sincerely, P. H. H. H.
