November 23th 1971.

Mr. Arthur May,
1107 Agincourt Road,
Ottawa, Ontario,
Canada, K2G 2B8.

See Order #470 424

Dear Arthur,

Thanks for letter of 7th inst. and contents.

Received your further six copies end of last month, in case they are already sold, one even went to Italy, one to Germany, but waiting for the money. It is needless to say, I keep them here till money to hand. So I feel certain I could use gradually at least another six copies, they will go in a short time too. I can really say it is a book I can recommend anywhere.

Glad Nymer in New Zealand ordered some copies, if you are interested I will search round for other interested bookshops, if many copies still to hand.

Millican is unknown to me, with both CommandFlager I am in touch, in spite that Brian has not written to me for some time.

Got Cathie's new book this week from the publishers, but have had no time as far then give it a quick glance. It has not so much Maths in it than the first one. From various MI 6/8-researchers I had the most conflicting stories about Bruce Cathie. He was supposed to come to Australia about late 1970 but cancelled visit in the last moment.

Compliments of the season and best regards, write when you can.

Yours sincerely

William E. Moser, J.P., F.R.A.S.
Vicepresident and Honorary General Secretary.

WEM
