

re. 3. photo July 9th.

[NRC]

"What make me mad... is that Ottawa has the gall to say that it's an airplane."

"They admitted that this way Venus there"

"Jupiter is not bell-shaped"

"If there's a phenomena you won't be able to get it on film... and I know that... I'm a photographer myself and you screw down well if there's a... when there's a strong mirage... you take a picture of that... the mirage won't show up - no way. - forget it."

[CRS]

"I was out there with a camera ~~ready~~ all the time... because I just don't believe... Well first of all I was a bit sceptical myself until I saw it ~~myself~~. Same as a chair here. You have to believe it because you see it. It's there."

[photo purpose]

"There will be a number of non-believers, you might as well say. To make sure of it, I going to have to put it on film. That was my main aim. To put it on film, in case it is a phenomena, but then it wouldn't show up. But it shows up each and every time."

"My husband and I would be standing outside and watching. As soon as I saw the damn thing and had it in the view finder, I was about to take the picture - first - lights out - and he was gone."

[Bell-shaped flying jupiter]

"I took through kitchen window. I just so happened that I had to let the dog outside, because the dog wasn't feeling up to par that night, so I looked and hey wait a minute there's

something... So I took pictures through the kitchen window and I got it."

- "solid white"

"My husband and I have been standing outside night after night, and I know there is a plane coming from that angle going down to Whiting airport about 12 o'clock or 10 after 12 midnight... and that is the only plane... and all the other small planes. They are not even going up... and this was taken 20 after 11... and that was not 10 after 12. There is no plane at 20 after 11."

- Told time by Denver flight

"Where " I think I have taken around close to 60 all told."

"No one can tell me that's a flying mushroom, or a plane, or a flying Jupiter."

[Media]

"Well they had to, or they would have had Bob Diment on their back, or they would have gotten me on their back too... They have seen it too."

[May 13]

"My husband and I were North of the CBO tower, and we saw it come up, and then it went from West to East."

Straight south. and at the same time one from West to East

[numbers]

One time we saw three... that was about two months ago... same color... red... last one. Around 8th Dec."

There must be something with glass, It might work the same way as radar and tin foil. I thought maybe I'd give it another try like that you know so shortly after I took those.

3 photos "and then it was lights out."

RCMP "I took it down to the Mounties, and I said to myself, I wonder what kind of puffed up story they're going to make out of this one. So they said it was a plane."

plane May June, July. the only plane was at 10 after midnight... and you could hear it too.

When it's a plane you can hear it right off the bat.

June "They were just about all over creation there" 3 South 1 East.

RCMP "This time they're going to tell me it's a burning turkey feather"

Halifax - rings cultivated - bowed. not river clay. - no mushroom.

INRC "I wish they could be smart enough to say - either we don't know what it is, or else, admit it... instead of a fairy tale." or else, "it is a UFO... we don't know where it comes from yet, but as long as we don't do it any harm - they can't do us any harm."

"I've got to see it before I say it's there. But when I say it - it was there. It didn't bother me... You're still in the hands of the almighty at the same time. Why worry about it?"

Asked why Charlie was around Carmen for such an extended period of time Mrs Biskucht commented "Maybe they're trying to find intelligent people around..." maybe they like the landscape.

CBC
attitude

"Same as Halliday. same opinion I have of him."

"CKY was the only one that was interested in it and

He was told "could be the taillights of a bicycle, so you have to have one with Venus in there"

"That's the best I could cough up."

Lehmann

"He with all his sightings is quite dubious."

Horses

"They were not picked up at all. He bought some horses didn't pay for them, then he sold the horses, and hung on to the money. And in the mean time he coughed up the story that the Martians or the UFO picked up the 37 or 47 or how many. I don't know how many but it it just picked them up so he could just hang on to the money, and then get some insurance or something like that for good measure. That guy. He's known around here as a big fibber. That's a tall tale about his horses being picked up."

"They are there. There's no two ways about it."

photo

"since 61"

52-47 "That's the kind of film they use in Hollywood. You only can get it in the states. It's a very fine grain film."

35 mm. I had the extension on and it came to about 600 mm... and I had the lens wide open I had a second time exposure.

feris wheel

Mr. Giesbrecht

he was going south ... day before CKV took that film... he was just going south to see what's what... and he didn't say anything at the time... because he joined us later on. He said 'I'm pretty damn sure I saw one because it was the shape of a feris wheel.' - lights all around.
"there are different shapes"

[90 Caimen.]

very few lot's of people have been trying and they have been out night after night
15 - 20% that's all - at the most.

My husband and I have seen it 20 times at least - about 20.

- lost camera

Canon T.B. - one week \$300

- interview us during summer.

"~~up~~ long week"

- asked us whether seen Charlie

"That's the best you can do at night. You can't do any better, unless the thing ends up in my own back yard at noon hour, but that's a different story. and I'll give them a lunch too yet."

[Setting]

Setting right. Before I took pictures of it I just wanted to find what setting. Pused the lights of the feed lot. Because I didn't know what the damn thing was going to look like.

And how much light and how much over exposure or under exposure. I had no clue. Nothing. So with a black and white film I just tried it out, so I know what to do with it. It's always just a guess. It depends who's going to process it too.

Near CBW tower - Starbuck took a whole slew of pictures there because there was quite a few there. Processed it. Phil. I gave them a piece of my mind. ~~Now~~ They said "You underexposed it." I say "I did not under expose it because I used the same ASA as I used for the B+W. and I know the black and white would take it." I processed the black and white myself. I said "You just messed it up yourself. Because the film I use. I can boost that to 400, as long as I mention what kind of ASA I used."

"CBW. Brinkbold "I'm not interested"

"I know one time... as far as I'm concerned CBW is just a bunch of jackasses... one time CBW was coming out with everything... with lights and they were going to take pictures of "Charlie Boy" I say the damn thing. I was at Bob Dierant Airport ^{field} there and I say it there at a distance and low and behold he had to put his bright spotlights on me. Well you don't see anything then for a long time. I said shut that so and so thing off. So finally they shut it of and I got my sight back again and I saw it again. BINGO on went the light again. Three times they pulled that stunt... And I told them if you don't get lost with that thing. ~~He~~ I've still got a tripod and I don't care if there's a camera on there. I'm just going to wack that spotlight out of your hand with the tripod.

And get lost. Didn't want you here. He said. "Don't have news." and I said. "You sure are going to have news." They showed me watching Charlie. They showed me over T.V. But they cut out the part where I told them. That was not very lady like, but I was just in a bad mood.

It was the night the CKY took the film we were just watching and watching and the CKY crew was out, and yet we saw that light out west. and it didn't seem like a car light or any thing like that. It was kind of hilly you know. So we were just not sure about the whole works Ch. well. Finally one of the guys said "We would like to take a picture of all of you, when you're there. But we'll take it when someone is ready to go home and call it quits for the night. But they were decent enough. Most of us decided we were going to hit the hay and go home. So they said 'Can we take a picture of you together now.' And we said 'Sure.' At least they were decent enough to wait till the end.

I told them a few things.

"The Free Press phoned me up and interviewed me on the phone once."

I know there was some city people out too staring with us, and they just couldn't believe the number of stars, and there would be one of the birds chirping away, and they would say what's that. Well I'd say well that's a Killdeer. Well they just didn't know anything. The stars. They just couldn't believe it. You just have to live in the country for a while, until you find out what's what. And then you know something.

I know some people would say. Oh there. And it was

nothing but a fire fly.

Could be just before sunset 200 A.M. Could be 20 after 11. Bell shape 3 o'clock. Most from West to East. This from South to North. It was coming towards me... and it hovered there... then lights out. So I said Well if you think it's bad time then I'm going to agree with you and I'm going to hit the hay myself.

"I'm sure by that"

You have to see it first before you can ~~talk~~ talk about it.

Lights
out

"One time Bob Elaine and I saw the damn thing. It was going down there. I was just coming lower and lower and lower. And I said to Bob. 'But if I can get a damn good shot that's clear and you can see the shape of it. Then, I'm going to get myself a nice silver colored station wagon. So I have everything ready. I had it in the view finder. Bob said Freddie had come a year station wagon.

I said "what station wagon" I had it in the view finder and it was lights out."

- outside the car.

One time I went out with Mrs. Jean Penner, and we were stayed in the car. Well mainly because the miq. were waiting for a damn good request. So we saw the damn thing. I had it in the view finder and took a picture of it through the ~~side~~ ~~front~~ windshield. I said to her I wonder if that theory is right. I'm going to get out. She said your going to be chewed up by miq. but I said I still want to find out. I had it nice in the view finder and I was about to take a picture. Lights out... and it was

way over there.

- go upstairs or off to the side

Around Dec. 28 Mr. Giuschetti sights at Springfield

Unless I'm still living in the Era of the Wright Brothers... to call that a plane... that's ideodic!

If they admitted that's a UFO... admitted openly that's a UFO... they won't get any promotion.
