Dear Sir:

Last December, I sent you a copy of my recently-published book Science, the Public and the UFO. I had, of course, hoped that you might review it in the UFO Investigator.

I received my copy of the March issue today, but no mention of my book has yet appeared.

I am curious to know, of course, whether you plan to carry a review of my work in a future issue, and it will be much appreciated if you will let me know if you do plan on doing so, and if so, when the review might appear.

Yours very sincerely,

Arthur Bray
