

Mr. Arthur Bray, 20 November 1969, Page 2.

The more this event is studied by scientists of today, the more they agree that Dr. Chant's analysis was an excellent one and correct in the main facts. However, may I again repeat that this was a very rare circumstance and does not happen very often. Thank you for your interest in writing about it.

Sincerely yours,

A handwritten signature in cursive script, reading "Peter M. Millman".

Peter M. Millman,
Head,
Upper Atmosphere Research Section.
