Dear Sirs:

Some months ago, I clipped the attached picture of a firefighter's aluminized asbestos suit from an ad by Bristol Uniforms Ltd. in the May 1974 issue of "Safety and Rescue", a publication of the British Safety Council, England.

I clipped this at the time because of the great resemblance to Chief Greenhaw's photo (Falkville, Alabama) and I filed it away for future reference, as my suspicions were aroused.

Having now seen your October issue of "UFO Investigator", I thought you may be interested in this picture as it bears a much closer resemblance to Greenhaw's 'spacesuit' than does the fire suit you have depicted.

My point is simply that as there is such a very close resemblance between the suit in my photo and Greenhaw's, perhaps a little more research will turn up a suit identical to Greenhaw's. Good hunting!

Yours sincerely,

Arthur Bray
