

obtained from this observer, the diameter of the disc works out at about 100 feet. A large standard aircraft was also in the sky at the time and the object seemed to move much more rapidly than the plane. The object's speed was estimated to be at least 300 miles per hour.

CASE VII, OTTAWA, ONTARIO, JUNE 20, 1952, Weight 26%

Five people saw a brilliant object travel rapidly from south to north across the eastern sky from Ottawa at 9.42 PM, E.D.T. The sighting lasted about 4 seconds, and consisted of a brilliant irregularly shaped head followed by a short luminous tail. Triangulation placed the path between 50 and 100 miles east of Ottawa, and from south to north.

CASE VIII, PECKSFORDS ISLAND, Nfld., JUNE 27, 1952, Weight 71%

Two lightkeepers at the Pecksfords Island lighthouse noticed at 12.35 AM Nfld. time a reddish light slightly above the horizon travelling slowly from south to north east. Both lightkeepers ascertained that there was no boat or other object associated with the light.

CASE IX, VANCOUVER, B.C., JULY 3, 1952, Weight 39%

A single observer noticed at 11.55 PM, P.D.T., a bright round amber light move from the south in a northwesterly direction, until it was about due west when it turned and headed southwest. The object was in view about 1 minute.
