

ADDRESS UNKNOWN--An Editorial Introduction

The untold story in the nation's capital that explains so many mishaps and disasters in our foreign policy is that Ronald Reagan is not in control of the U.S. State Department.---The American Sentinel, 5/17.82

Recently the White House wrote a letter to Aleksandr Solzhenitsyn inviting him to a private interview with President Reagan. The letter was mysteriously "misplaced" and was never sent. According to the American Sentinel, "Observers who have followed this behind-the-scene struggle doubt that a letter from the President to the world's foremost anti-Soviet spokesman simply got lost." And so does anyone else who knows how the KGB operates.

We turn now to Maj. General Robert L. Schweitzer, formerly chief military adviser to the National Security Council (NSC) who was dismissed from his post after saying in a speech that the Russians had achieved strategic superiority over the United States, were "on the move" and "were going to strike." (NY Times, Oct. 21, 1981.)

Our main focus of attention, of course, is on UFOs--specifically what they portend for our planet, and the emotional-plague tactics to suppress information on this subject and discredit any serious interest in the subject.

On the following pages we present some documents that are both very serious and very unsettling. The documentation proves that someone or some group very close to President Reagan is side-tracking, destroying, or "confiscating" very important information regarding the global menace presented by UFOs. Involved in the documents are the following:

1/Information sent by Major Colman S. VonKeviczky to both President Reagan and the NSC were "never received";

2/A personal letter mailed to General Robert L. Schweitzer was, by his own admission, "Never received";

3/A formal response from Gen. Schweitzer to VonKeviczky was written, but had absolutely nothing (so it is now claimed) with the UFO documentation furnished to the President and the NSC by VonKeviczky!

4/The News Release distributed by both ICUFON and PPCC to all the major news media was completely SUPPRESSED!

How is it possible that top-level officials in government are not receiving their mail?

What happened to the UFO Memoranda sent to President Reagan, the NSC and to General Schweitzer?

Are major governing officials and departments being sequestered so that vital information cannot flow freely into the White House, the Pentagon, and the NSC? It would take only a single well-placed "mole" at a central mail station to control the mail traffic going into Washington, DC.

Finally, and most strangely, we learned from a long-time subscriber in Ohio that all of the UFO magazines which had previously been available in that area have been "picked up" and are "no longer available"!

We believe and continue to hope that by focusing world-wide attention upon the common problem of UFOs we may yet avert a Third World War. NO BOMB SHELTER COULD WITHSTAND A RETALIATORY STRIKE BY UFOs! And no manmade structure anywhere on Earth can prevent contamination by Oranur, which will penetrate any thickness of any material.---JE
