Whales: conserving a resource

INTERNATIONAL NEWS

NEWS AND VIEWS

ARTICLES

- Proterozoic crustal distribution, mobile belts and apparent polar movements—
J. D. A. Piper 381
- Model for the regulation of mRNA translation applied to haemoglobin synthesis—
H. F. Lodish 385
- Gene deletion as the cause of a thalassaemia:
The severe form of a thalassaemia is caused by a haemoglobin gene deletion—
*S. Ottolenghi, W. G. Lanyon, J. Paul, R. Williamson, D. J. Weatherall, J. B. Clegg,
J. Pritchard, S. Pootrakul and W. H. Boon* 389
- Genetic lesion in homozygous thalassaemia (hydrops fetalis)—*J. M. Taylor, A. Dozy,
Y. W. Kan, H. E. Varmus, L. E. Lie-Injo, J. Ganesan and D. Todd* 392

LETTERS TO NATURE—Physical Sciences

- Highly polarised radio outburst from Cygnus X-3—*E. R. Seaquist, P. C. Gregory,
R. A. Perley, R. H. Becker, J. B. Carlson, M. R. Kundu, R. C. Bignell and J. R. Dickel* 394
- Distances to the sources of observed gamma-ray bursts—*I. B. Strong and
R. W. Klebesadel* 396
- Gamma radiation from the Crab Nebula above 35 MeV—*D. A. Kniffen, R. C. Hartman,
D. J. Thompson, G. F. Begami, C. E. Fichtel, T. Tümer and H. Ögelman* 397
- Gamma-ray bursts from neutron star glitches—*F. Pacini and M. Ruderman* 399
- Pulsed 10–30 MeV gamma rays from PSR0833-45—*P. Albits, G. M. Frye jun.,
G. B. Thomson, V. D. Hopper, O. B. Mace, J. A. Thomas and J. A. Staib* 400
- Collimation of auroral particles by time-varying acceleration—*D. S. Hall and
D. A. Bryant* 402
- Anomalous lunar plagioclase composition and the composition of coexisting melt—
W. C. Storey 403
- Earthquake prediction and oriented microcracks in rocks—*C.-Y. Wang* 405
- Crystal structure of I-tetragonal boron—*G. Will and K. Ploog* 406
- Gothenburg magnetic 'flip'—*N.-A. Morner and J. P. Lanzer* 408
- Geostrophic comparisons using measurements from a moored current and
temperature meter—*H. L. Bryden* 409

LETTERS TO NATURE—Biological Sciences

- Spatial ability, throwing accuracy and man's hunting heritage—*D. Kolakowski and
R. M. Malina* 410
- Local suppression of alpha activity by pattern in half the visual field—
C. R. Cavonius and O. Estévez-Uscanga 412
- Water in the nutrient cycle of a Papuan rain forest—*N. D. Turvey* 414
- Regulation of larval corpora allata in *Galleria mellonella*—*N. A. Granger and
F. Sehna* 415
- Cyclic GMP and cyclic AMP levels in normal and transformed fibroblasts—
P. S. Rudland, M. Seeley and W. Seifert 417
- Inhibition of cell growth by oxygenated derivatives of cholesterol—*H. W. Chen,
A. A. Kandutsch and C. Waymouth* 419
- Morphological and functional maturation of human thymic epithelium in culture—
K. W. Pyke and E. W. Gelfand 421
- Asbestos induces selective release of lysosomal enzymes from mononuclear
phagocytes—*P. Davies, A. C. Allison, J. Ackerman, A. Butterfield and S. Williams* 423
- Modulation of corticotrophin-releasing factor release from hypothalamic
synaptosomes—*J. A. Edwardson and G. W. Bennett* 425
- Seasonal variation in sensitivity of guinea pig tissues to agonists—*M. Weinstock and
S. Shoham* 427
- Morphological evidence for an experimentally induced synaptic field—*J. H. Fernandez
and M. S. G. Fernandez* 428
- Effect of prostaglandins E_1 , E_2 and $F_{2\alpha}$ on human blood coagulation—*G. S. Duboff,
J. A. Penner and J. Rohwedder* 430
- Biochemical marker in dominantly inherited ectodermal malformation—
H. S. Tenenhouse, R. J. M. Gold, Z. Kachra and F. C. Fraser 431
