

The Air Force has no files or photographs that indicate our planet has been visited by extraterrestrial vehicles. Photographs submitted for evaluation in conjunction with UFO reports have undergone intensive photographic analyses and none have provided evidence that substantiate the presence of extraterrestrial vehicles. Many widely circulated photographs have never been submitted to the Air Force for comprehensive analyses. The Air Force returns all original photographs and negatives to the owners upon completion of analyses.

Books and literature regarding UFOs and related subject abound. The Air Force does not review, endorse, sponsor, sanction, nor comment on them in any way.

The Air Force possesses only record copies, and thus does not have for distribution outdated reports on Project SIGN, Project GRUDGE, or Blue Book Special Reports No. 1 through 12 and No. 14. Copies of these documents can be made at the expense of the requester at rates prescribed by Air Force directives. Requests for these documents will be sent to the following address:
