Dear fellow people interested
in UFO's,

Many people have asked me if there was a list of others pursuing the same interests and research. There is no one list in the world, but I have distributed, over the years, many copies of my late father's work, "THE NEW SCIENCE", and I have maintained a running file on this activity.

Finally this summer, I have had some time in which to copy it and I am sending a copy to everyone on the list.

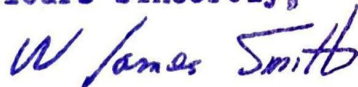

From now on, it is up to individuals to pursue that which they may. Some people asked questions of me, such that I have an idea in which direction they are going. I have tried to make a note to that effect beside the names. Others just requested a book, so I have no idea in which area of UFO study they are interested.

I have an ongoing interest, but not much time. I am not an engineer, but a Music Teacher, so I can answer very few questions.

My father's work on anti-gravity, coils, etc, is being carried on by some, I think. There have been more recent books which I have seen which refer to further research.

I apologize for being tardy, but I wish you all the best.

Yours sincerely,

A handwritten signature in dark ink, appearing to read "W James Smith". The signature is written in a cursive, flowing style.

W. James Smith

CANADA,

Dear Mr. Cameron:

It was a real Pleasure to
Meet you and talk with you
@ the U.F.O. SYMPOSIUM
in Dayton-Ohio. I hope you
had a great time and a safe
Journey back. I have been out
of Town since Dayton Meeting. Hope
you are able to Rush Noel Smith's
Book to me. - "NEW SCIENCE". -
Earl Steff asked me if it arrived
as yet. Many Thanks. Sincerely Yours
George Becks

(OVER)

P.S. Hope to get up to your
fine City and Province
some time late this year
or early next year.

On Anthony Seratites

Author unknown

After a UFO experience many years ago, Anthony Seratites, a Dow Chemical engineer, was suddenly awakened to a new concept of matter and energy, being shown, way back then, that there is no ultimate particle in physics as it was being taught, that what appears to be protons, electrons, gluons, muons, quarks, neutrinos, etc., and all their invisible to us anti-particles, are nothing more than photon quanta organized in different ways. The photon quanta are not visible until they become organized into something, and they can just as easily become organized into an anti-something from our point of view. He visualized a photon quanta as part of a wave. It had vector and curvature, curl, or spin. He discovered that the vector could be reversed by simply inverting the curve, or the curve could be reversed by turning it over at 90 degrees to the other axis. In either case, its accumulation into matter was the same but now opposite or anti-matter.

Seratites' diagram of an electron alone had same 228 parts. He spent years developing his concepts and diagramed many atoms in a book titled THE STRUCTURAL NATURE OF MATTER, and then went on to diagram more atoms and same molecules in another volume called THE UNIVERSAL FIELD LAW and THE UNIVERSAL LAW OF CREATION OF MASS/ ENERGY, both by Anthony D. Seratites. What he learned was that matter can be instantly converted to anti-matter by simply inverting the quanta, which changes its direction of spin, and that they mutually repel each other and do not seek to cancel out. The anti-matter world is no more rare than the matter world, as they are one and the same in different aspect. There is as much antimatter as there is matter and they balance.

Seratites is best known as the inventor of Saran-wrap, the thinnest, lightest, strongest, and most vapor resistant of all films up to that time, and it was a product of his new ideas about chemistry coming out of his new physics. He may someday be recognized as the father of the renaissance in physics.

He was not alone in these new concepts though. Wilbert B. Smith, B.A., M.A., former head of the Canadian Department of Transport's Project Magnet, entertained similar ideas as he developed what he called his Quadrature Concept, which was published after his death in 1962 under the title THE NW SCIENCE, authored by him. He too found that there is no ultimate physical particle; that all is the result of awareness within the creative consciousness. Simply awareness in the Tempic Field of the Creative Consciousness produces vector and curl. That vector and curl is equivalent to a photon quantum, which is the result of awareness impinging on the Tempic Field of the All. Simultaneous with the action of vector and curl comes the reaction of vector and curl energies in the opposite directions, resulting in opposite manifestation maintaining the balance in the all. The ultimate result in the physical world is observed as matter and antimatter. He also concluded that nothing more than awareness impinging on the Tempic Field of the All Consciousness was the actual first cause, and the origin of the photon and ultimately matter. Matter is nothing else than the final stages of thought manifest, with energy someplace in between.
