Dear Friend,

At your request, we are happy to report that the second, revised edition of David Webb's "1973-Year of the Humanoids" is now available. The price is \$7.00, including postage and handling. Please use the form below when ordering.

"1973 - Year of the Humanoids" documents and analyses the fantastic wave of UFO-associated humanoid reports that occurred in the United States during the Fall of 1973. 70 reports are described in detail, with complete references for all important sources for each report. Key witness-abduction cases from the history of UFOs are compared with the 1973 reports. A detailed analysis is made of the wave nature of UFO landing cases in general and humanoid cases in particular, using data of T. Bloecher and J. Vallee. The 1954 French and the 1973 US humanoid waves are compared. A major goal of this work is to suggest methods for the study of humanoid reports on a more objective, scientific basis. It is directed toward readers with some understanding of UFO reports, especially those involving UFO occupants and humanoids.
