Dear Dr. Hynek:

Attached is a proposal for the validation of photographic evidence of a UFO which I have developed. The uncertainty of the validity of UFO photos makes a strict standard of validation essential. I realize that the chance of being able to actually meet the proposed standard is slim, but it seems to me that we cannot be sure of UFO photos until they do meet such a standard, even it takes many more years.

I will be grateful for your review and consideration of this proposal, and for your critical comment.

Should you consider this acceptable, even with modifications, I will also be grateful for your suggestion as to what might now be done about it, as an idea is worthless until put into action.

Yours sincerely,

Arthur Bray.
