

Moore not only alleges he was a mole within APRO (on behalf of the AFOSI), but that 3 or 4 other ufologists in the principal UFO groups are doing likewise (without of course naming them). So now CUFOs and MUFON will be worried sick wondering who are the moles within their ranks. Moore has a superb habit of what magicians call 'misdirection'. By throwing enough red herrings into the UFO movement, he can divert UFO groups from doing genuine research & investigation, and also divert suspicion from himself. As for Stan Friedman, poor fellow! He is being duped left, right and center.

Bill certainly never passed his studies as a CIA agent. His arithmetic is so atrocious that he would have been thrown out on the first day of class. I presume and hope your arithmetic is better than his.

Do you think that FUFOR and the UFO community are getting value for money from STF, over his \$16,000 research into MJ-12?

Actually I still have an open mind on UFOs. It is only the abductions and crashes that I regard with deep suspicion. 95 per cent of them seem to occur in the US. Likewise, the pre-occupation with official cover-ups is almost entirely an American phenomenon. Perhaps under Glasnost the Soviets will start bothering their leaders about UFOs, and even produce a few fake documents. Now that really would be a change!

Sincerely,

Christopher D. Allan
