The Chairman,
The Science Council of Canada,
110, Argyle Ave.,
Ottawa 4.

Dear Sir:

I have recently written and published a book about the scientific investigation of Unidentified Flying Objects. This is the first book in Canada on this subject, and is titled Science, the Public and the UFO.

Many different aspects of science are dealt with in my book, in their relation to the UFO problem. The Science Council itself is mentioned. Because of this, I am forwarding by separate post, a complimentary copy (paperback) for your information. The book is also available in a hardcover edition if further copies should be desired.

I hope you will find the book of interest.

Yours sincerely,

Arthur Bray
