September 11, 1967.

Dr. Edward Condon,
University of Colorado,
Boulder, Co. 80302,
U.S.A.

Dear Dr. Condon:

On June 21, 1967, I wrote you on behalf of the above Club, concerning the 3000-lb. chunk of 'hardware' in our possession, sending an article published on this, together with two photographs of the metal and offering to send you samples of the metal for tests and analysis by the group of Colorado scientists you are heading in your investigation of Unidentified Flying Objects.

To date, I have received no reply from you, and I am writing to enquire if you received my letter, with enclosures. If you have, I would appreciate at least the courtesy of an acknowledgement and a reply to the offer made to you and your group by our Club.

As I think you will appreciate, this long silence is inclined to make people wonder about the genuineness of the UFO investigation you are undertaking on behalf of the USAF, and as I am constantly receiving enquiries from members and subscribers to our quarterly magazine which goes out to readers all over the world, as to the outcome of my letter to you, I would greatly appreciate the favour of a reply from you in this regard.

Yours very truly,

(Mrs.) Carol Halford-Watkins
Club Secretary.
