Questions (cont'd) (Carol & Rich)

8. Did Millman in fact tell Brian Cannon, that metal came from Sorel ferroming? Is this on record?

If so, they can't use iceflow theory if the Ecwid is upstream!
(Same letter of 9 Dec '69.) See Smith's report p. 7 para 3! (downstream)
- check map of St. Lawrence river for location.

9. Same letter - what do you have in your records re Millman's early work with WBS and his statements re micrometeorites?

10. Millman (21 Jan '70 to me) says "aura of mystery has developed ... and been encouraged by various statements made by individuals and repeated second & third hand until the original meaning & context have been lost". This is a serious accusation as it implies we don't know what we are talking about. Can we produce evidence, documented, to support all our statements, to prove we have distorted nothing?

11. Carol mentions in stories that the government has delayed its report 10 years. Did they ever get a sample when metal first found, and was a report requested? If so, who had the metal, and who was to produce the report?

12. How experienced were WBS & colleagues in metal sawing?

Dr. Smith says "it was possible to saw it by awning chipping the saw blade across the metal on the return stroke" & "the magnetic metal could be sawn without difficulty in the normal way".

13. What is precise nature & appearance of "pipe" in centre?
