

Also, many engineers, lawyers, doctors, and other professional people who have more to lose than gain by making such reports, have reported their experiences. We must accept these reports as being truthful.

Some of these people have also reported occupants in, on about, landed or low flying UFOs. Reputable and reliable people are even more unlikely to report such things unless they are absolutely certain of what they saw. No one, particularly professional people with a reputation and career to maintain, wants to look the fool.

e.g.
 $\frac{\text{The Conickan Hospital case}}{\wedge}$

- I already mentioned the Kelly case and
