Dear Mr. Cameron:

I have your letter of September 15th and the enclosed photo-stats on the subject of Unidentified Flying Objects. In it you ask four specific questions and the answer in each case is "I don't know".

There must have been a D.N.D. "expert" on the subject or at least a liaison with the USAF but I don't recall who it was. I presume he was the person who prepared a little folder containing newspaper reports of reported sightings which came to light recently. When your letter arrived I tried to find it but it has mysteriously disappeared. I held up replying to your letter in the hope it could be found because I thought it might reveal the identity of its maker although I am not at all certain on that point. Needless to say, if I can find it and it contains any useful information I will let you know promptly.

Apart from that I am certain that there is nothing in ^{my} papers at the archives because I have now been through all of the boxes.

I can assure you, however, that there is no cover-up - at least on my part - and probably not by anyone on this side of the border. I don't believe we had any information worth covering.

The only information I recall receiving is consistent with the quote Victor Mackie attributes to the unnamed expert. "He was skeptical about the existence of any extra-terrestrial beings flying so-called inter-planetary flying saucers. He believed most sighting could be explained simply. But he agreed it was difficult to find a satisfactory solution for some."

Sorry I can't be of greater assistance.

Sincerely,

PAUL T. HELLYER
