

But to keep on and get through April, we must receive at least \$19,000 as quickly as possible.

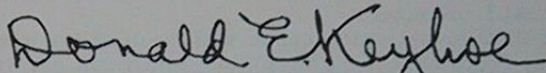

NICAP is still the world's largest, most effective UFO investigation organization, with overwhelming evidence and ability to bring the UFO facts into the open. Only one thing can destroy us--financial failure. But if we went under, the Condon Report would get the credit. Our investigating network, our scientific and technical panels would be gone. With NICAP killed off, the debunkers and kooks would take over. All our valuable information would be wasted.

If you still believe NICAP is needed, if you are interested in the new program--please help us before it is too late. Since 1957, about ten per cent of our members have contributed to help keep us going (memberships alone have never covered expenses). We now have about 8500 members. If most of these members will support us, the threat of closing will be ended.

In the space below are questions about the new program, and a list of ways you can help us if you wish.

Remember, this is not a lost cause if you don't want it to be. For whatever you can do to keep us going and speed the new program, the staff members and I send you our heartfelt thanks.

Sincerely,

Major Donald E. Keyhoe, USMC Ret., Director.

Do you approve of the new program? _____

Do you have other suggestions? _____

Please indicate by numbers, in the order of interest, which listed special publications would appeal to you:

Hidden Reports _____
Scientists Report on Occupant Cases _____
Strange Physical Effects _____
Missing AF Project Cases _____
Blackouts and UFO s _____
The 1952 Story _____
Other suggested subjects? _____

You can help us by donations and publication orders (described in previous issues). Please sign this form, with address, and return to NICAP. Thank you.
