

Here is

A statement by an atmospheric physicist at the U. of Arizona who studied and investigated UFOs in great depth for a number of years (what a court would call an "expert witness") :

SHOW QUOTE - The Donald "Greatest Scientific Problem" - p.32.

## 2. UFOs as a Military Problem

UFOs intrude into a country's airspace

Air defence systems exist to identify and keep out any intruders.

Any flying object entering national airspace must be investigated immediately to identify it - it could be an enemy aircraft or missile. That is what air defence is all about.
