

Club Meeting

1. Distribute Topsides.
2. Ken - Gestetner Ink bill coming soon. Postage on increased subs. \$4.44
Need \$5.00 to cover this.

3. Chunk of Metal

At last meeting, I told you that having received no reply from Dr. Condon in Colorado for 3 months, I wrote again by regd. mail. I have now received a reply from a Dr. Roy Craig, which I will read out. (Read & get ideas re answering Project Magnet bit) In the meantime, I have received further news from Ronald Anstee of the Montreal UFO Group regarding tests carried out by a group of scientists at McGill U and also a private analysis, with very intriguing results which suggest that ~~its~~ of no known earthly manufacturing origin. As a result, Prof. John Jonas of McGill phoned Ron Anstee, suggesting that we get in touch with Drs. Eric Smith & Hugh McQueen of Dept. of Energy, Mines & Resources, recommending that they examine the metal. I therefore wrote these 2 Drs. as follows:- (read letter) In reply to this letter, I received a phone call from Dr. Smith, asking if he and his colleague could examine the chunk of metal this coming Sat. morning. I therefore arranged with Bill Riddell that the 2 Drs. visit his property at Metcalfe on Sat. morning, after which Dr. Smith said he would get in touch with me again to advise what the next step, if any, would be.

4. As suggested by Madame President, in writing to thank Ron Anstee for his efforts re the metal, I asked if he could arrange a meeting of some of our Club members with members of his own group in Montreal, for a discussion and exchange of news and views, which, in view of the journey, would have to be on a Saturday and I suggested either Sat. Oct. 28 or Sat. Nov. 4. To date, I have not received Ron's reply, but in the meantime, would like to get some idea of how many of you would like to make this trip to Montreal. (find out approx. number and if someone could take me)
