

volved in the answer at the NSC.

It is a matter fact that the NSC was reorganized with new advisers in November and December of 1981, when Gen. Schweitzer left his office.

My speculation is the new NSC staff became "crazy" on the General's response which was proven when on April 13th I conversed with him by phone I told him:

"General you received Jerome Eden's letter on January 18, 1982 in which he did ask a "personal conference" with the NSC, and one "CC" was addressed to you!" "WHY ARE YOU CALLING ME THREE MONTHS LATER...?"

The General said "I never received that copy of letter and Eden's Bulletin included".

This means that the new staff simply obliterated the letter addressed to the NSC and the General.

It is proven that on April 26, 1982 the NSC was unable to answer or serve "definite explanations" on the affair. TO BE SILENT MEANS ACKNOWLEDGEMENT. The Roman proverb stated very correctly: SI TACUISSSES FILOSOPHUS MANSISSES. "When you would be silent you would had been remained as a philosopher."

As far the NSC received ^{a copy of} my letter addressed to the General as answer, - their believe better ^{to} be silent on the "mistake" and leave the affair in a tepid condition instead bring ^{it} to the broil!

On the end of November I will visit my son in Montreal. He is a Professor of the Mathematics at the Concordia University. We could drive over to Ottawa to see you personally and change our intentions on the international solution of the UFOs global problem. We will call you before, to fix our appointment.

Friendly and sincerely yours

Polman
