

- 16) Assume that you are standing watching the horizon. You raise your arm and point at the object(s) in the sky when you first saw it (them). This position forms an angle between your upraised arm and the horizon. Using this as an example: -
- (a) At what angle from the horizon was the object(s) when first observed?
- (b) At what angle from the horizon was the object(s) when last seen?
- (c) If flight path of object(s) was continuous, how long did it take to pass from where you first saw it (them) to where you last saw it (them)? _____
- 17) Information which you feel is pertinent and which is not adequately covered in the specific points of the questionnaire, or a narrative explanation of your sighting, should be written below or on a separate sheet of paper. (Please include a sketch).

- 18) Please give the following information about yourself.

NAME _____

ADDRESS _____

(Street)

(City)

(Prov./State)

TELEPHONE NUMBER _____

AGE _____

SEX _____

Please indicate any additional information about yourself such as any special experience or training that might be pertinent.
