December 20, 1988

Dear Grant:

First of all I want to wish you and your family a very merry Christmas and a very revealing and prosperous New Year.

I want to thank you for that update (Dec. 9, 88) Paper on Jason, IDA, and D.C.S.

Do you know of the British Intelligence Group known as DI.SS (Defense Intelligence)? Maybe a connection to this D.C.S. stuff.

I know as a fact that Dr. Henry A. Kissinger was in charge of some phase of the UFO Program, as late as 1960. Mrs. Eric Henry Wang told me that her husband, the Late

Dr. Eric Henry Wang, one time head of the Dept. of Special Studies at Wright Air Development Center in Dayton, Ohio, which was subsequently moved to the Kirtland AFB/Sandia complex near Albuquerque, New Mexico, Reported to Dr. Henry A. Kissinger who was the head of the Rockefeller funded Special Studies projects.

Mrs. Wang said she met Dr. Kissinger on many occasions in Dr. Wang's Study. (I noticed that The Twining/Cutler memo stated that the subject matter had to do with MJ-12 SSP [Special Studies Project])

Yes Kissinger surely is tied into this and probably Jason, IDA, and D.C.S. and DARPA.

Yes there is only one Richard C. Doty, one time, if not still, Special Agent to AFOSI at Kirtland AFB. He was Falcon on the "UFO Live" TV special. And Robert Collins was Condor.

Thank you very much for the names of I.D.A. members. I will research every name.

③

Mrs. Wang died of cancer on October 28, 1987. I am trying to maintain contact with her daughter in Albuquerque. Very soon, I want to gain access to some of Dr. Wang's personal papers. There might be something of importance there.

I tried to find the Dr. Kistiakowsky connection to the UFO Phenomena a few years back; but I gave up. Several circumstantial things pointed to his involvement; but nothing really substantial.

The same for Freeman Dyson and Weisner.

That all for now. Please keep me informed of any latest developments.

Very Sincerely

Wm Stein

May 25, 1984

Dear Bill:

Re yours of May 18. Some data...

I checked telephone information in State College, PA --home of Penn State after checking the library re Walker. There was no listing so I called the University. I eventually was given a location in South Carolina.. Hilton Head. I got his number there and called. He was out. I left my name and said I would call back the next night when according to his wife he would be in. I did so. He was cagey and careful. There was no admission whatsoever of any involvement with UFOs at all.

He did say that the subject had of course been discussed by everybody back then. He did admit to having read The Roswell Incident and threw in some cracks. There is absolutely nothing that can be used in a court of law. He certainly will not respond to pressure. My reaction to how he answered the various questions was that he knew a great deal. He surely wasn't saying that. I think you are probably right about him... his background is certainly impressive and of course Ike had a farm in Gettysburg PA and there were other connections. I don't have a mailing address for him but he does apparently go in to the university still as an ex president.

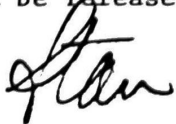

I would certainly agree that HAK was in all the right places at the right times doing the right things for him to have been involved and perhaps still involved in the UFO coverup. I have no idea how to prove that at this time.

I have no idea why you want to have the government turn flying saucers over to the scientific community. The security implications of the technology of the saucers are enormous. I do not want technical information made public. Why do you? I want the world to know that indeed our planet is being visited by ETI and that the government knows a great deal. I certainly don't want all information made public. After all what about all the data obtained by other governments especially the Soviet Union? Do you expect them to make their information available? I would expect them to grab ours and put it together with theirs...

A direct frontal approach often calls the troops out of the closet. I certainly appreciate that you have been spending a lot of effort and turning up leads worthy of further attention. But again I must express my strong concern about not going past the data... as was the case with Sarbacher. These guys can't be brow beaten. Impressions and feelings are useful in pursuit of truth but not in establishing it in a courtroom. I appreciate the info about Wang, but again his wife's statements to you do not prove anything... about him or HAK. Incidentally I long ago suggested that HAK knew all about UFOs and that was the reason for the embargo raising oil prices because once the truth was out oil would be of much less value... he was closely tied to the Rockefeller interests as you know.... But I hadn't checked his early background until you suggested it.... It was probably expected that some of the truth would be released during Nixon's second term....

Hastily,

Stan

Interview William Steinman Jan 6, 89.

C. Did you send me the letter dealing with the EB-1 yet?

S. No, I did get you that yet. I got you a tape which I put in the mail. I left here two days ago.

C. Mentions talking to Linda Howe.

S. Ya. I talked to her last night. Did she talk about Bill Cooper stuff?

C. That's one of Sears sources.

S. That's one of Sears cohorts. He has information that claims to go beyond MJ-12.

C. Is this a document?

S. He has his MASIC document, explaining classification. MASIC control. Major is in control of ^{all the affairs} MJ-12 is just a study group that studies information that is distributed to them by MASIC... and it goes on and on. It talks about Aquarius and Project Pounce and all the sub projects and goes into detail about every one of the projects and sub projects. He claims to have seen this document while he was in the navy - naval intelligence. He also claims to have seen Project Blue Book Report #13.

C. How did you find out about this? Tho' Sean?

S. Well Sean introduced me, brought him to me and he happened to live only five miles from me so he came over on the second. I sat and talked with him for three or four hours. I taped him on the video tape and interviewed him while he was talking to me.

C. I had heard from Toronto about a document he put on the bulletin board for safety.

S. You're probably talking about the same thing. Project Aquarius and the whole bit. Also he had what he considered to be the full Aquarius document. He showed it to me here but he said I couldn't have it to copy it. He only had one copy. It had the cover page just like the one Moore distributed - the one with the little symbol on it.

saying "Presidential Briefing paper presented by m3-12". Project Aquarius. Then it went on for three or four pages with all the sub-projects mentioned, paragraph by paragraph. It talked about Project Sigma, and then it talked about Project Snowbird and Project Snowbird in this document says that Snowbird was a project to lead the public away with the joint US-Canadian effort to build a flying saucer. It talked about the 1954. Press release by Quarles when he mentioned the saucer. He said that's what Project Snowbird was about, and the project it was covering was the real project to fly alien aircrafts. It was called Project something else. I can't remember.

c. How did he get this document?

S. He didn't say how he got it. He said he won't reveal his sources because he's trying to protect them. That's what he told me. He says he still has intelligence agency connections and all this. The guy is the director of a technical institute.

c. In California

S. Ya. He held the position three or four different times as directors or assistant director of various colleges and technical institutes in Southern California down in San Diego and Anaheim.

c. Does he have a bio anywhere?

S. No, I didn't see any bio on him. He had his own bio. He wrote his own bio talking about his military experience and he said you could check into it.

c. Can you send me a copy?

S. Ya. I can send it to you. One of his sources he calls Christopher. How is Cain making out with that guy from the astronomy dept at Penn State?

c. Did he not relate that to you

S. He did go into any detail.

c. Relates all Dr. Winkler's phone calls and the Penn State article. Cameron stated if Crain doesn't send a copy ~~at~~ he will.

s. Well Crain hasn't sent me anything so evidently we're not in communication that well anymore. The last thing I got from Crain was that thing he wanted me to have notarized. He hasn't contacted me since then.

c. The last thing he told me is that you were going to write him a letter and send a copy of the Dawson letter.

s. Yea, that's what I was going to do. I talked to Crain. I haven't gotten around to that. I've been so busy over the Christmas holidays. I had about fifty pieces of mail come in over one month... People that read VFO Crash at ARTEC.

Dr. Schwartz has been writing me over and over again.

c. I think he's just waiting for your letter.

s. I'll just pull it out. I've got it in my "ready to do" things. I'll get you that letter to Scully on the EBE at Los Alamos. I'll get you a copy of that MS-12 stuff from Cooper. Cooper gave me a package of maybe 50 pages of material. He ran them off on his printer just before he came over.

January 3, 1989

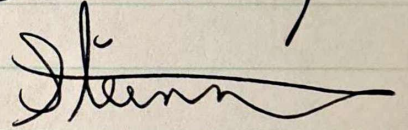

Dear Grant:

Inclosed, you will find a copy of the Telephone Conversation between Stanton T. Friedman and Dr. Robert I. Sarbacher, on Dec. 12, 1983.

I had a very interesting day (Jan 2) with a fellow by the name of Milton William "Bill" Cooper. Cooper claims that he saw, and had handled, Project Grudge/Bluebook Report #13, back in the 1970's, while he worked for Naval Intelligence. He also had access to MAJID material (The Group above MJ-12, who disseminates information and policy to Them). I collected a

(2)

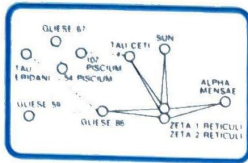

mountain of Documents and Reports from him, which I will disseminate to you as soon as I have digested them and copy them. This material is mind boggling. It shows where W.L. Moore is distributing distorted truth concerning MJ-12 and Project Aquarius. Please keep in touch.

Very Sincerely
Wm 

We will soon spend millions to probe the atmosphere of Venus and Mars, while ^{air} here on earth remains polluted with dust and heat with which we cannot cope. Indeed it may be a good thing that ships from other planets are not sampling our atmosphere - the conclusion might well be that life cannot possibly exist on earth. 1990. "Approaching the Benign Environment" Eric A. Walker, Franklin Lectures in the Sciences and Humanities First Series ©1970 lectures 1969 at Auburn University

Lincoln reminded us that a house divided against itself cannot long stand. So too, a nation that diverts a great deal of its energies and resources to pure science without an equal return in practical benefits for the citizens who are paying the bill, cannot hope to have the support of its citizens. We must not forget, as we march out into the universe, that this government was granted to "ensure domestic tranquillity" and to "promote the general welfare" right here on earth.

Thurs., June 23, 1988

Grant Cameron,
649 Silverstone Ave.,
Winnipeg, Man R3T 2U8

Dear Grant;

We just got your letter of June 9, 1988, and I'm just getting around to answering it now as the mail has been heavy.

You mentioned that a man who won a Pulitzer Prize for Journalism is going to be interviewing Tressler. Is it Bob Woodward or his cohort? Let me know.

Friedman phoned me last Sunday morning (A good time to phone to catch me off guard-8.30 a.m.). He said he thinks he knows who the old man is and is going to interview him. He said he'd let me know the results. He did say that the man is in his late 70's, and has all the qualifications.

Have there been any further developments on the Reagan-Bush interviews by USA Today? It would be a major coup for them as well as CUFORN. The Post would add to its already high standing if it pulled off an interview.

I don't know what happened to APRO's files. It would be a good idea to write to them, but I don't have time as I must get out the next CUFORN Bulletin and answer a lot of mail. Could you write to Robert G. Marsland and ask him? In case you don't know, he's their Deputy Director and can be reached at the APRO address-3597 W. Grape Drive, Tucson, AZ 85741, U.S.A.

Any news from Gleason? Where did Jim McCampbell get his information on Bennewitz? If it was from Moore, forget it.

We are awaiting the transcript of the April 21 conversation with the old man. It would be valuable in assessing the man's psychological profile I repeat my earlier question. What is his name? It's time we knew. We'd rather not wait until August. By the way, did anyone ask him why he refused to answer the questions? Is the old man on a cruise now? He said "I leave on that ship May 15."

It seems to me that Moore told Lear that he was going to work on MIA's to get Lear off the track and make Lear think he had an open field for pursuing his (Lear's) research. Meanwhile, Moore would keep what he had discovered to himself and Friedman. I'm certain that Moore did the same sort of thing with Graham. In that way, Moore figured he'd get Howe off the track. since he knew that she knows Graham and Lear.

How does Stringfield know about the high-level conferences at WPAFB? Is it through one of his better sources? Were Chinese and Soviets present there?

I'm enclosing a sighting report form for you to use in the Polish woman's abduction report. Please make a copy for us and mail it back to us here.

2.....

If your holidays are in early August, we will not see a great deal of you if you come to Toronto. My holidays (two of my three weeks holidays) are in the last two weeks of August. Harry, Joe and myself work during the day. We'd welcome you to spend time with us, particularly looking at CUFORN's files at my apartment on an evening or weekend.

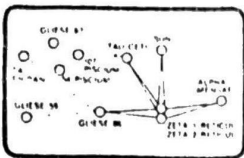

That's all for now, Grant. Write when you can.

Best wishes,

A handwritten signature in blue ink, appearing to read "Larry", with a stylized flourish extending from the end.

Larry Fenwick.

Dear Larry:

How are you these days, Larry? It's been a while since we've heard from you. How is the current court battle going? I assume you are involved in litigation. By now, you're probably fairly knowledgeable about the law. Maybe you could save a bit of money by changing professions and getting a law degree.

Now to the serious aspect of this letter. I am enclosing a photocopy of a newspaper clipping of a photograph of Ike and a man whom we'd like to find out more about. We do not know his name. Can you find out? This is extremely important. Apparently, he was in charge of a series of meetings at Wright-Patterson AFB in the late 1940's. These were the first of the MJ-12 meetings. He is still alive and MUFON is attempting to get him to release to them all the notes he made at the meetings.

We know he is 82 years old now and has a Ph.D. in electrical engineering. He is the former President of a major U.S. university. He's in good health. The photo looks like it was taken in the 1950's.

According to our source, the meetings were at the underground facilities at WP AFB, not in Hangar 18. There were a large number of stenographers at the meetings, as well as damaged and intact UFOs (four of them), and many bodies of dead humanoids.

Please let us know as soon as you can if you find out who this man is. We also know he is listed in Who's Who in Science.

That's all for now, Larry. Keep well. Regards, from Harry, Joe and myself.

Yours truly,

Larry Fenwick.

Zeroing In On The Crashed Flying Saucer Mystery
The William S. Steinman Letters To Tom Benson ***

Letters of October 23, 1985 and November 5, 1985 from William Steinman to myself are excerpted below regarding material pertinent to the subject.

William S. Steinman, a UFO researcher was able to obtain a copy of three pages of notes from Canadian Government Flying Saucer researcher, Wilbert B. Smith's personal research diary, that recorded an interview that he had with Dr. Robert I. Sarbacher on September 15, 1950. The notes originated from Smith's widow (Murl) who obtained them out of Wilbert's own research diary, which is in the possession of his son. The notes are preliminary to, and are mentioned in, the "Geo-Magnetics" document. The mentioned section, is on page 2, second paragraph: "I made discreet enquiries through the Canadian embassy staff in Washington." The "Smith Notes" says Steinman are the discreet enquiries and he has had these notes for over two years and they are what prompted him to look up Dr. Sarbacher in the first place. Dr. Sarbacher remembered the Smith interview when a copy of the Smith notes were sent to him-to jog his memory.

In fact, says Steinman, nobody would ever have thought of Dr. Sarbacher, in the first place, without first having the "Smith Notes". In these notes, Smith also verifies the Frank Scully book, "Behind The Flying Saucers" (New York: Henry Holt and Company, 1950) as being substantially correct (quote by Sarbacher). Steinman considers the discovery of the "Smith Notes", as a major breakthrough in solving the crashed-recovered Flying Saucer mystery. Steinman considers the letter from Dr. Sarbacher to him as a further breakthrough. Wilbert B. Smith set the basic groundwork for the Canadian and U.S. government's cooperative effort to build a Flying Saucer aircraft. The name of the project was "Project Y".

The Canadian Flying Saucer investigation project, "Project Magnet", headed up by Wilber B. Smith, was a front very similar to Project's Sign, Grudge, and Blue-Book in the U.S. The front projects kept the public satisfied while the real projects were being worked on behind the scenes (to analyze and subsequently duplicate the recovered Flying Saucers), says Steinman.

A copy of the Dr. Sarbacher letter to William S. Steinman and a copy of Wilber B. Smith's Geo-Magnetics memorandum follows as documentation to the above.

DR. ROBERT I. BARBACHER
PRESIDENT AND CHAIRMAN OF BOARD

November 29, 1983

Answer
From Dr. Barbacher
Received 12-5-83
Wm Steinman

Mr. William Steinman
15043 Rosalita Drive
La Mirada, California 90638

Dear Mr. Steinman:

I am sorry I have taken so long in answering your letters. However, I have moved my office and have had to make a number of extended trips.

To answer your last question in your letter of October 14, 1983, there is no particular reason I feel I shouldn't or couldn't answer any or all of your questions. I am delighted to answer all of them to the best of my ability.

You listed some of your questions in your letter of September 12th. I will attempt to answer them as you had listed them.

1. Relating to my own experience regarding recovered flying saucers, I had no association with any of the people involved in the recovery and have no knowledge regarding the dates of the recoveries. If I had I would send it to you.

2. Regarding verification that persons you list were involved, I can only say this:

John von Neuman was definitely involved. Dr. Vannever Bush was definitely involved, and I think Dr. Robert Oppenheimer also.

My association with the Research and Development Board under Doctor Compton during the Eisenhower administration was rather limited so that although I had been invited to participate in several discussions associated with the reported recoveries, I could not personally attend the meetings. I am sure that they would have asked Dr. von Braun, and the others that you listed were probably asked and may or may not have attended. This is all I know for sure.

FILE COPY

Mr. William Steinman
November 29, 1983 - Page 2

3. I did receive some official reports when I was in my office at the Pentagon but all of these were left there as at the time we were never supposed to take them out of the office.

4. I do not recall receiving any photographs such as you request so I am not in a position to answer.

5. I have to make the same reply as on No. 4.

I recall the interview with Dr. Brenner of the Canadian Embassy. I think the answers I gave him were the ones you listed. Naturally, I was more familiar with the subject matter under discussion, at that time. Actually, I would have been able to give more specific answers had I attended the meetings concerning the subject. You must understand that I took this assignment as a private contribution. We were called "dollar-a-year men." My first responsibility was the maintenance of my own business activity so that my participation was limited.

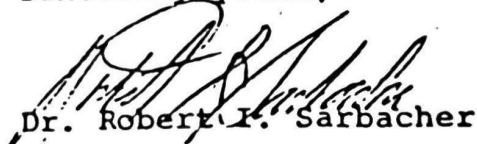

About the only thing I remember at this time is that certain materials reported to have come from flying saucer crashes were extremely light and very tough. I am sure our laboratories analyzed them very carefully.

There were reports that instruments or people operating these machines were also of very light weight, sufficient to withstand the tremendous deceleration and acceleration associated with their machinery. I remember in talking with some of the people at the office that I got the impression these "aliens" were constructed like certain insects we have observed on earth, wherein because of the low mass the inertial forces involved in operation of these instruments would be quite low.

I still do not know why the high order of classification has been given and why the denial of the existence of these devices.

I am sorry it has taken me so long to reply but I suggest you get in touch with the others who may be directly involved in this program.

Sincerely yours,

Dr. Robert R. Sarbacher

P. S. It occurs to me that Dr. Bush's name is incorrect as you have it. Please check the spelling.

and as I copied it.

He missed in nature
and two or three of work, not his.
Having gathered together different stories about Smith
over the years I approached those men who
90% of the stories stayed unexplained because they would
not be interested.

90% of the stores say they will
have their Christmas musical.
Therefore I wrote to Maud stating these she had refused
me & we were unable to help and a lot of letters from relatives
sounded we were still up in the air. She wrote back stating she
would do what she could even though she didn't have the
money to do so. Will get
the

would be what we could do with
some extra for knowledge as Wilket
L. wrote in persuasive stating I should only write one letter
saying all the answers, and then Duvald have her alone
and try to solve the rest on my own. She would comment on what
we could help with.

The memo includes ① Smith was shown a document which would help with
② The memo included ③ Smith's relationship to
outside Washington D.C. in 1952-53. ④ The story related in your
last regarding Newton and the ladies ⑤ Smith's relationship to
Ford or whoever was the "high U.S. official" that you've called?
And on whom was the "high U.S. official" that actually knew?
to say. " ⑥ The question "What did United actually know?"

The letter remained unanswered till Feb 15, 88, and I have enclosed a copy of that letter. It has been a while since with still no word.

I have also included an interesting item on Hynek. It's significance lies naturally in your claim Dr. Wick Ture was one of Gully's sources. This as far as I know is not found in Hynek's bio, and of the 13 names listed on the page Hynek's name is the only one not found in the index of the book. His name does not appear in the book either.

I am familiar with the Howe material, but not the Lear Jet Corp. material. Am looking forward to your forwarding a copy.

Henry Kissinger's name appears in another book related to the "secret parallel gov't in the U.S.". Will provide you this when we relocate it.

Will keep an eye open for more Smith letters related to hardware or knowles. Bray had not seen these letters either so there must still be some floating around that didn't have duplicates in Smith's files.

Finally. Timothy Good had not seen the Caswell Smith letter, and has not corresponded with Caswell for 30 years. Caswell became a Schovak's witness. I sent him a copy. Apparently there is more Smith-Caswell correspondence.

March 22, 1988

Dear Grant:

Inclosed, you will find the "John Lear Report" and "The Dulce Papers." John Lear is the source of both. He is the son of William E. Lear, founder and owner of the Lear Jet Corporation.

You forgot to send me the copy of your letter from Muri Smith which somewhat answers your questions pertaining to her husband Wilbert B. Smith.

Did you read Jerome Clark's review of my book in the April 1988 issue of Fate mag? He doesn't think much of it. Actually he didn't even read the whole thing - which the Dr. Steene Case signifies. Very Sincerely W. Steinman

William

I can't thank you enough for the dear material. Very interesting, especially the reference to Dr. Theodore von Karmann who I have read quite a bit about. Do you have the address? I have provided copies of the dear material to Smiths and scientific assistant for comment. The words should be interesting.

Dr. Stungfeld has told me something, the source of much of this has undergone "a personality change." I had written to him in hopes he would review Smiths scientific writing, but no response as predicted by Stungfeld. I stuck out in checking out the file number found at the letters of the Smith - a. Wright letter. They state insufficient information, and the fact that the number also met correspondence to apt to I asked it checked.

However they stated the records of the Canadian Joint Staff file passed in question are intact, and that I should review them w/ an officer.

As to the months of waiting still we heard from Mr. Smith on my questions of last year dealing with all the Smith numbers. The letter I had intended to copy for you is simply a letter of Feb. 15, 56 which she stated she would address the letter. At this point I am not sure that significant anymore due to Smith's the months having passed.

In reviewing I took first look on Alderson's come across an interesting coincidence. Alderson reports a meeting with Senator Margaret Chase Smith, head of the Senate Finance Committee on Space Research. Having studied Smith's

Sept. 8, 1987

Dear Grant:

First of all, I want to thank you very much for the material that you sent to me. I especially appreciated that Wilson memmo dated Sept 15, 1969, that suggested that Smith's "Geo-magnetics" memmo "should at no time be made available to the public". I heard about that memmo but never had a copy (Wilson's Memmo). I also really appreciated that copy of Stan Friedman's "Access to Information Request Form", which shows that he was interested enough in Dr. Eric A. Walker's back-ground.

Back in December 1983 Stan Friedman called Dr. Robert I. Sarbacher via Telephone. During that conversation, Sarbacher stated "I did not attend the meetings at Wright Field concerning the recovered Saucers; but there was one person who attended

all of the meetings. I can't remember his name, he wrote a book on electrical-engineering, was a member of the R.D.B., and was head of the electrical engineering department at a university in Pennsylvania."

Grant, I did some research and found that this man's name was Dr. Eric A. Walker. I called Dr. Sarbacher, who verified that Walker was the man who did attend all those meetings at Wright Patterson A.F.B.

I wrote to Stan Friedman on March 21, 1984, telling him that Dr. Eric A. Walker was our man. Friedman wrote back to me on May 25, 1984 (exactly 7 days prior to his "Access To Information Request" of June 2, 84) telling me that he was sure the Walker was the right man and that he had contacted Walker. Friedman stated that Walker knows something but is not talking.

I tried to correspond with Dr. Walker on March 12, 1984 (He had an unlisted telephone number - which Friedman obtained from Penn State University as Scientist to Scientist - he would not give it to me). The answer to my correspondence was

very strange; It stated "Stop! Don't Try To Find Me I Came on that Machine I Will Leave May 15 Ergot Quiet Quiet Quiet"

The above was typed on the lower portion of my letter that I sent to Walker, as evidenced by my Signature and "Very Sincerely yours". My return address was cut from the upper portion of my own letter to Dr. Walker and was taped to the front of his Stamped envelope to me!!

I wrote again to Dr. Walker on May 31, 1984, with no response from Walker.

When I saw Stan Friedman in June of 1987 at a Saucer Convention in Burbank, California, we discussed Dr. Walker. Friedman claims that he has not tried to contact Walker since 1984.

It was your letter of Aug 12, 1987 that once again got me interested in Dr. Walker. I finally found a Telephone number for him. I called Dr. Walker on August 30, 1987 and the conversation, which I want to remain strictly

CONFIDENTIAL between yourself and myself,
went as follows:

E.W. - Hello

W.S. - Hello, this is William Steinman of Los Angeles, Calif. I am calling in reference to the meetings that you attended at Wright Patterson Airforce Base in around 1949-1950, concerning the military recovery of flying saucers and bodies of occupants. Dr. Robert J. Sarbacher, now deceased, related this to me.

E.W. - Yes, I attended those meetings concerning that subject matter; why do you want to know about that?

W.S. - I believe it is a very important subject. After all we are talking about the actual recovery of a flying saucer not built or constructed on this earth! And furthermore we are talking about bodies of the occupants from the craft who were analyzed. Human like beings, not of this world!!

E.W. - So - What's there to get all excited about? Why all the concern?

W.S. - I am not excited, just very concerned. Here, we are talking about a subject that the U.S. Government

officially denies, even to the extent of actually debunking the evidence and discrediting the witnesses. Then you sit there and say, "what's there to get all excited about?" and "Why the Concern?"

Dr. Vannevar Bush, Dr. D. W. Bronk, and others thought it very important and were concerned enough to classify the Subject as Above-Top-Secret, in fact as the most highly classified subject in the U.S. Government!!

Did you ever hear of the "MJ-12 Group" and their "Project Majestic-12", which was classified as Top-Secret/majic? I have a copy of President Elect D.D. Eisenhower's briefing paper on that Project, dated Nov. 18, 1952.

E.W. - Yes, I know of MJ-12. I have known of them for 40 years.

I believe that you are chasing after and fighting with windmills!!

W.S. - Why do you say that?

E.W. - You are delving into an area that you can do absolutely nothing about. So, why get involved with it or all

concerned about it? Why don't you just leave it alone and drop it? Forget about it!!

W.S. - I am not going to drop it. I am going all the way with this!!

E.W. - Then when you find out everything about it, what are you going to do?

W.S. - I believe that this entire matter has to be brought to the public's attention. The people should know the Truth!!

E.W. - It's not worth it!! Leave it alone!!

W.S. - Can you remember any of the details pertaining to the recovery operations and subsequent analysis of the Saucers and bodies?

E.W. - I am sure that I have notes concerning those meetings at Wright Patterson AFB. I would have to dig them out and read them over in order to jog my memory.

W.S. - If I write to you, will you please answer in as much detail as you can remember? Further more, could you please xerox those notes and send me a copy?

E.W. - I might. At least I will keep your letter, will dig out my notes, and will contemplate answering. That the best I can say for now.

W.S. - Well, Dr. [REDACTED], I will write a letter as-soon-as-possible. Thanks for your valuable time. Good-bye.

E.W. - Good-bye.

The very next day, I wrote him a letter and inclosed a copy of the "MJ-12 Document". That was on Sept 1, 1987. During that telephone conversation, Dr. [REDACTED] verified one thing to me "The existence of MJ-12" (There has been a lot of debate, as of late, as to the reality of the 8 Page MJ-12 document and the Cutler Memo from the national archives in Washington D.C.).

If, Dr. [REDACTED] writes to me at all, and further more if he substantiates the 8 pages of MJ-12, we will have taken one more giant step forward. If he sends me xerox copies of his Wright Patterson

Airforcebase meeting notes, then we will have taken several giant steps forward in our quest for the truth !!

That is the reason for the extreme confidentiality on this matter between you and I - The fewer the people that know, at this sensitive stage of the investigation, the better chance we have of obtaining the needed information.

Now as touching on your requests from me. ① The Arthur Bray letter that accompanied the Sept. 15, 1950 W.B. Smith - Sarbacher interview notes, which he sent to me in April of 1983 doesn't say anything revealing, just wishing me luck in my research, and giving me the addresses of Muri Smith (Wilberts widow) and W. James Smith (Wilberts son - whom you have been in contact with) - both of which are now obsolete.

② Inclosed, you will find copies of my letters to Dr. Omand M. Solant and his replies.

③ Inclosed, you will also find copy of the declassified A.O.S.I. Document, concerning saucers and bodies at Wright Patterson Airforce base.

④ As concerning Dr. Vannevar Bush and Dr. Eric Henry Wang performing analysis on the recovered flying saucers. It is now self evident, through several channels, that Dr. Bush headed up the overall project, this needs no further explanation. Dr. Eric Henry Wang headed up the Department of Special Studies at the old Wright Air Development center at W.P.A.F.B. from 1949-1956. The department of Special Studies was moved to Kirtland Airforce Base/Sandia Labs complex near Albuquerque, New Mexico, where Wang was in charge from 1956 until his death in 1960. I located Dr. Wang's widow, who confirmed to me that he was involved in an Above-Top-Secret project to analyze and subsequently duplicate the recovered flying saucers. I cannot give you her address nor her Telephone number since both she and I were severely reprimanded and threatened over that interview.

⑤ I recently obtained the current addresses and telephone numbers of both Muri and W. James Smith. They are as follows: (as of Oct. 15, 86)

Muri Smith

7A-22A / 20th St. E.

Prince Albert, Saskatchewan

S6V 1K4 Canada Tel. (306) 764-4638

W. James Smith

282 Equestrian Dr.

Kanata, Ontario

K2M 1C5 Canada Tel. (613) 592-9034

⑥ I should have copies of my book in hand later this week. The Price is \$18.95.

Now, for my special requests.

① Can you please forward me a copy of the entire Project Magnet Reports and any subsequent and/or pertinent documentation?

② Who are Mr. Buchanan and Mrs. Swan?

③ Who was that communications

expert who was an associate of Wilbert B. Smith that disappeared please expound on this one.

Could it have been Robert Q. Achzeimer?

- ④ Can you explain in as much detail as you can remember some of those kind of "twilight zone" type of stories that Muri and W.J. Smith told you during that 3 hour interview that you had with them in Ottawa in 1976?

By the way Lt. Col. Bremner is now deceased. He is the person who set up that Sept. 15, 1950 Smith-Sarbacher interview at the Canadian embassy in Washington D.C.

My connection with both Stanton T. Friedman and William L. Moore is kind of sketchy - I have the same feelings that both Muri Smith and W. James Smith have towards them. So don't let Moore nor Friedman see or hear of any of this correspondence.

Very Sincerely
Wm Steinhilber
