

in Canada, and he had lunch with Bush many times on his trips to Washington.

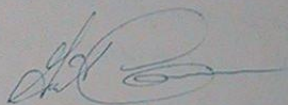

I don't know if you have any records of McFuzze and Smith meeting or corresponding but it would be very revealing.

I have come across a lot of stuff in the last month.

Dr. Lloyd Beckner (see 101-12 document) was a friend and associate of Dr. J. Tuzo Wilson who was an associate of Willbets in around 53. Don't know exactly what he did. I have much idea what Dr. Garland or Dr. Wait did. Have approached Andrew at Mufon (who is a big Smith fan) to provide a physicist in Colorado to interview Wait for me. Will let you know on how that turns out.

Almost forgot - Who is LHC Bremner as found on the document you sent? Not much material on Sarkacher except the who's who and a couple scientific articles I tracked down.

I have a lot of new leads. Will keep in touch

P.S. There are other references to Smith knowing about "a small highly classified group" Refer to his statement about where the 52 piece went. C. H. Watkins also makes some references from what Smith told her.
