6th October 1968.

Dr. Arthur Gray,
Gray Lock L.P.Nice,
PO Box 5041, Station V.,
Ottawa, Ontario, Canada.

Dear Dr. Gray,

Many thanks for your letter of 1st inst. Unfortunately an aerial view which I sent about two months ago as second-class air-mail might have gone astray. It was a view of Sydney and contained only the five words: "KALAMIAK ASHING RAPID CHALKY ISLANDS".

Six of the books are sold, the others have also interested readers and as much as I have all the money together, I send it on to you.

By last real letter to you was on May 22nd, as you wrote. Our president Dr. Lindtner used the first copy of the book received from you in May for his talk at the Canberra Conference early June of the Federation of Australian Cancer Societies, CAFIC.

Re the USA House of Representatives Specimen I had from Prof. Hollander all right. Jim is a very good friend of ours since his visit to Australia over a year ago. I just wrote to NCIAP again last weekend, as our contact with them is lately not as good as it should be. They either can't find letters received or answer them with a circular without a proper answer.

I heard re DeWitt's book from Murray's Publishers in N.S.W. It should be out next month. We have here in Australia also the first paperback book before end of the year after two paperbacks, I was asked to write the introduction for same, which I did some months back.

Friends in Canada I am in touch with are Dr. Gantner, Vesina Gantner, Dr. Edwards and last not least young Glemser, who is for his 16 years or so a very enthusiastic young man. You know them doubtlessly all.

At our September Readers Meeting the Government Deputy Ambassador was our Guest Speaker, his talk on the Moon was illustrated by slides taken by space-raft. So you see, we have our contact with our Scientific up.

How to hear from you again from you, that is when you find the necessary time, but you might have my remembrance before. Best regards for now and success with your presentation for your needs.

Yours sincerely
William E. Moser, J.P.,
Honorary Secretary.

Bill Moser
