Mrs. M. Smith, President
Ottawa New Science Club
10 Lotta Street
Ottawa. Ont

Dear Mrs. Smith:

Some time ago, I received a request for information about Tesla and my self, from a New Age -- Co - Worker, The Parthenon, Halsingborg-Swenden.

The writer said she had received my address from the Ottawa New Science Club.

Having recently completed a short story -- "The Life Of Tesla " and other information, which I have recorded on Tape- I was wondering if the Club would be interested ? I had no idea who, or what this club was, nor did I know exactly what its object was.

Therefor, knowing John Buchanan of 3 Steel Street, Ottawa, and that he was interested in the things of Space- New Invention, -and Tesla , I wrote to him for information.

He said you were the President of the Ottawa New Science Club, and also he offered to help in making copy of my original tape--which is anything but perfect--as its speed--15/16 is not used on most recorders.

Therefor, will you be kind enough to let me know, if your club would be interested in the loan of this recording ?

There is no charge for the loan, my aim is to make the name of Tesla and his wonderful work known, many ask me why I wish to do this, my answer is--he was the greatest inventor the world has ever known--he was the greatest discoverer -in all history--no other person has ever produced so much.

It is important to the world of science to know how this one man-obtained his knowledge, our future well being depends on our ability to find the answer to this question,

I have stated in as simple words as possible--how the answer can be found, you are welcome to copy all, or parts of the tape,.

Sincerely

Arthur Matthews
