

We know that the "conclusions" Dr. James E. McDonald saw in the Robertson Report at Blue Book Headquarters in 1966 included specific CIA recommendations for the "debunking" approach. We also know from Dr. McDonald that the agent named Philip G. Strong, who was Chief of Operations Staff, O/SI (CIA) was the person who authorized this directive to the Air Force.² These two facts are not in Tab A or anywhere in the Robertson Report as declassified in January-March 1975. It is evident that their absence has something to do with the missing Tab C.

The Tab C received in April is a blatant attempt by the CIA to pass off a list of personnel for the final report. On the fake "Tab C", the letter after the word "Tab" has been covered with a white patch, and the letter "C" has been typed in on the patch. This cover-up is plainly visible even after photocopying.

The field of ufology has been enriched by the CIA's declassification of the Robertson Report. But Tab B and particularly the real Tab C still remain "Secret". Demands should be made for release of these documents. Why are they still classified "Security Information"? What do they contain that the CIA does not wish the public to know?
