

I thank you for your valuable time. Wishing you success in all your endeavors.

Sincerely yours

I expect to be lecturing at E.E. Dept. at Univ. of Manitoba (about Oct. 27th). I want to plan to discuss env. at these matters.

P.S. Would also like 2 or 3 copies of any notes taken during the flying saucer discussions.

Sorry I cannot comply. I have no records of any of my conversations with Wilbert Smith in the 1952-1955 period while I was a staff member (rather junior) at the Radio Physics Lab. at the Defence Research Board in Canada. Dr. Solandt was a

in Canada. Dr. Solandt was a highly respected Director of DRB. His recollections on this period were highly regarded by everyone who knew him. Incidentally my father (not Air Vice Marshall) was a wartime colleague of Dr. Solandt who was a pioneer in Operational Research.

I shall be most interested to see copies of Attachments "A" through "H" to 18 Nov. 1952 briefing document for President Eisenhower. You shall send some info. to David Eisenhower (grand son).
