00:32

Cooper taught radio operations and cryptography to Army Signal Corps officers. The head of the Signal Corps school had worked for the OSS during World War Two OSS, the Office of Strategic Services, became the Central Intelligence Agency in 1947. Cooper's CIA boss at the army base at Cooper to help analyse top secret papers gathered for the Air Force's project Bluebook investigation of unidentified flying objects.

01:34

Had to have tap one of our phones and I have a feeling it must have been yours.

01:52

We have something very important going on here. There are other beings, from points unknown or unconfirmed, that have incredible technology that are here interacting with humanity on planet Earth for some kind of agenda. That's an existential matter right there. And it should it should be a matter of concern to every human being. Who are these individuals? Why are they here? What is their interest in us? They're obviously here for a reason. And why aren't they publicly openly announcing themselves to us? By the way? They're probably very cogent reasons for this secrecy. All right. They're not hard to understand why. But the question becomes, how long is the secrecy going to last? It's not hard to see why secrecy on this matter began over 60, almost 70 years ago. It's not hard. But the problem is that secrets have a way of maintaining themselves and increasing themselves and growing. This particular interview we're about to do. This is a this is a man who's in the US military who has had experiences he says, relating to knowledge of et et presence here on Earth. We know he is who he says he was, his story is of great potential value. You know, if someone's trying to hoax us trying to fake us out? Could they have done enough research on their own? To get the detail? And the answer is yes, you know, they probably could, you know, beyond subjecting him to a polygraph test is going to tell whether he's lying or not, we're gonna have to do our best to assess this man. I still believe in this quaint idea of freedom and self determination. I don't want to give up on it in my lifetime. So I realised that full disclosure of this reality is probably going to be a real wild ride, and maybe not always a fun ride. But I look at the alternative, and I see that as much worse.

03:55

Yes, well, as we get older and older 77 Right now, you can't live forever. So if this procedure, you're going to have to clean the blood doesn't work, then I've got probably a few more months to make it before my kidneys shut down. So that's kind of why I'm kind of going along with the interviewer at this time.

04:35

You're seeing that what you went through is just too important for people not to know about Yeah. Yeah. Can you just let Can we start at the beginning with your military career and just walk through what exactly your experiences were,

04:52

was in drafted into the military and got into the US Army? After that, I was sent to the signal Training Centre site in eastern United States. What year would this big 58. I went through the signal training course. And at that time, I went through the radio teletype course. And also the cryptography course, crypto, they had five instructors that were getting out of military service. So they pull the top five students, and I was third in class. So I got pulled as an instructor.

05:46

Now, were you at this time also working yet for CIA? No, not yet. No.

05:53

After one day, my boss came to me. And he said, How would you like to, you know, make some extra money. And I said, all money is good. So he's explained to me that I could, he could put it through, I would have to get a top secret White House, Q clearance for the job, you know. And I thought, boy, must be a pretty exclusive thing. And I said, Well, what is this? And he said that I'm director for the CIA, for eastern United States. And I said, I didn't know that. And he said you weren't supposed to. After about six weeks, my security clearance came through. And I got my CI card. It was an ID card, like a credit card. Or I could just go up to the tour and slice it. Walk right in. My name. At that time, I used a hard official name to never used my real name. I started working with him on the project he was on. And there was project Bluebook, which was kind of partially a fraud.

07:26

You're saying some of the Bluebook cases were completely fictitious?

07:30

Yes. But the cases that we got came from, I think it was fort Belleville, Maryland. Fort Belvoir, yeah. And it didn't come from the Pentagon, or it didn't come from CIA headquarters. But we would get reports of Otter certain sighting at the head of Mexico or Italy or something like that. And then we would have to, we had people that would follow through on it, that might go out, and interviews of people to see if they were not cases. Or

08:14

if it was really, they'd be going overseas. frequently.

08:17

I wasn't how we stayed stay wise. But the people we had working with us see, I would do that we would get like a new report. Probably a couple times a week, I was coming into the army fresh off the farm. So I really didn't have much knowledge of anything. But my boss filled me in on Project Bluebook. And what they had found so far, as far as greys and aliens and the Roswell incident,

09:02

how did you feel when this first got dumped on you? When you first learned about I

09:09

was just kind of overwhelmed with all have this, you know? And I said I am I don't know if I'm gonna be able to be a judge of this type of thing. what's real, what's not when I don't have much knowledge of it, you know?

09:27

So what did he say?

09:29

He said, Well, had to build the information as we go. And you'll see how this thing is working out.

09:39

And then the other thing is, of course, you really weren't able to tell family or or close friends.

09:45

I couldn't tell anybody. fact that I had to pick up follow that I wouldn't tell anybody. A lot of it for 40 years and more of it for free. Two years, which is up in 2010.

10:05

You're doing all this crypto work, you're looking at images, photographs, video. It's 1958, maybe the fall of 58. What happened after this? At

10:17

that time the project Bluebook thing kind of went pop. If you remember, back in those days, they kind of declared it as a nothing. Right? And

10:31

they were telling the world all UFOs are misidentifications. hoaxes. You Yes, psychological issues, whatever.

10:40

Yes, yeah. So my boss came to me, and he says, We've both got an assignment. And he said, Well, I said, Where are we going? How are we going to the capital? Gonna be part of the Eisen our push, is trying to find out something about all about these aliens, that MJ 12 was supposed to find out, but never did never send back reports to him.

11:17

MJ 12 The UFO control group? Were they calling it mj 12. At that time,

11:23

yes. They call us in, went into the Oval Office. And I wasn't President Eisenhower was there and Nixon. And they said, we called the people in from mj 12. From area 51. And as for, but they told us that the government had no jurisdiction over what they were doing. So being a general past general, you didn't tell him to go to hell without any real good reason. So he said, I want you and your boss to fly out there. I want you to give him a personal message. He says, I want you to tell them whoever's in charge. Tell them that to get in, they have this week, coming week to get into Washington, and to report to me. And if they don't, I'm gonna get the First Army from Colorado. And we're gonna go over take the base over I don't care what kind of classified material you got. We're gonna rip this thing apart.

12:49

Eisenhower was going to invade Yes, area.

12:53

One. Yeah. was the first term.

12:57

So you go out with your suit superior. Yes, you fly out. You land what happens? Can you describe this whole process what you saw,

13:06

hey, took us the 13 or 15 miles south to his four. And like different garage door openings. And these garage door openings. They had like different sauce for crafts livery first one and the Roswell craft it was kind of crushed up. But apparently every alien that was in died except for a couple.

13:43

CC, the Roswell craft and what are some of the others that you say?

13:47

Well, the Roswell craft was really strange, because it looked like real heavy aluminium foil. We could rock next to it, and you could rock the whole thing probably weighed 150 300 pounds.

14:07

Could they tell what the source of power was of this craft? Yeah, it

14:11

was a black rivers, gravitational things, okay. In fact, one later on, I got I got the the mathematical code for reversing gravity, and a three by five card. I guess they're different types of greys and so on.

14:40

How did you see that evidence?

14:42

Well, at the later on, head is four. We viewed the autopsy film. And then the colonel said, what we've got in here is we're interviewing you Hey, Grey Alien.

15:03

All right, right there. How did you feel at that moment?

15:08

Well, I thought, boy, we had no idea. We were gonna see the real thing. All we saw was film.

15:17

You had have a little bit of heart racing. Yeah, that moment.

15:21

My boss was able to go in and had like a partial interview

15:27

with what did this grey alien look like? Could you describe them? A little bit?

15:31

This one looked a little bit oriental.

15:36

So I'm just wondering if, if it looked almost human. What about this didn't look human?

15:43

No, it didn't look human as far as skin tone. And basically the shape of the size.

15:54

How is its head size compared with a normal human, for example.

15:59

Brain was kind of a little bit bigger. And some of them nose was very, very small. And ears were just like holes. Mouth was very small.

16:15

Why were they bringing you out here at all? Anyway, to see an alien, what was the point to

16:21

go back and tell the president they actually had one?

16:26

So he did not know at this point. Know, if there was an alien at us for know. What did you do, then that area? Were you done? Or did you have other things to do as to

16:36

basically we were kind of done one back area 51. They took us into the main building. And there we saw a u two, which occurs we didn't know existed. And the a model of the SR 71, the Blackbird, so But like I mentioned earlier, was not a model of the current Blackbird. Hurry,

17:09

earlier version, but an early version. Did you go directly to Washington after this? Why did you go somewhere else? How did they get did you fly regular airliner,

17:18

we flew back to the commuter plane back to the airbase and then took President Eisenhower's Lockheed Electra back to Washington,

17:34

you and your supervisor, superior officer. And now you're meeting with the President?

17:40

Yes.

17:41

Can you describe this?

17:42

Well, we met with him in boy, the second story of the old OSS warehouse building. And Eisenhower and Nixon were there. And also, who was there? So he asked us what was going on. And we told him about the alien whole situation, and the black projects and so on. And he was just totally shocked. He appeared for the first time to be worried. You know, like, he was worried?

18:30

I would think that Eisenhower would I mean, he certainly knew that flying saucers were real. Yeah, I knew that there were aliens. So I guess I'm just wondering, what would he have been most, you know, really surprised about?

18:48

Surprise about the black programmes. Eisenhower said, gotta keep this thing. completely secret. We can talk about this.

19:00

Your actual name is I mean, the name you grew up with. That was a different name than what you had in the

19:07

never, never used it in the CIA at all.

19:12

Now, what about today, you're going on the public record. And this is still sensitive information. Even though earlier you talked about, you know, security old set, maybe expire after a certain period of time. But you're still concerned

19:31

when the more now's phone call. Her phone was tapped. And they got my phone number. And through the telephone company, terrible to find me. And so

19:45

on. When they found you what happened?

19:48

I was going to grocery store. Two guys in black suits. Come on with a black Lincoln towncar head came over to see me He told me that I better not publish anything or talk to Linda bought any more things. So at that time I did you know, I stopped

20:17

that was enough to intimidate you. Yes.

20:20

Rather remain anonymous. Never show my face

20:26

really thank you for doing this.

20:29

Yes, this was I guess kind of a good idea because I feel much better having talked about it I kind of feel like there's a load off my shoulders really? Because I involve a lot of secrets that I had kept over the

20:55

years didn't really consider it as like a like a big threat, but there was always the light. We don't know for sure. But we don't think that they're going to be harmful to it. So we don't really know. We can't say for sure that they're not trying to invade or our second of all out, checking out our military. Because all these even at that time while the saucer sightings were always around classified areas and military bases this type of thing. It looks almost like they were pouting.
