IN THE AIR AND IN THE WEAPONS RACE, THE WORLDWIDE BATTLE

16.

Not-so-secret Stealth jet is unveiled at last

STEALTHY it may be. Pretty it isn't.

Swallow-tailed, with swept-back wings and a fuselage full of sharp, inelegant angles, this jet looks more like an exercise in origami than state-of-the-art aviation.

But the U.S. Air Force, who officially unveiled the little black plane yesterday, are more than satisfied.

The £66million F-117A Stealth fighter has been built to avoid enemy radar detection.

That's the reason for all those angles, which bounce radar signals away from enemy monitors.

The fighter, which first flew in 1981, has been a poorly-kept secret. It's actually been flying for seven years out of a desert base in Nevada. The jets were used in combat for the first time in the U.S. invasion of Panama in December and at least one of the aircraft has already crashed on a training flight over California.

The Air Force said 59 of the jets were being built by the Lockheed Corporation and all but three have already been delivered.

It carries only a pilot and flies at a high sub-sonic speed of nearly 600mph. Just 66ft long and with a wingspan of slightly more than 43ft the aircraft is about the size of the F-15 jet, the Air Force's current top-line conventional fighter.

The F-117A can be refuelled in air, giving it an unlimited range, according to the Air Force.

"The programme has demonstrated that a stealth aircraft can be designed for reliability and maintainability," a spokesman said. Unlike many modern fighter jets, the F-117A is designed to fly slower than the speed of sound, depending on its stealth characteristics to keep it from being detected and shot down.

The fighter, which the Air Force said carries an internal weapons load, dropped 2,000lb bombs near a military barracks to frighten Panamanian forces loyal to General Noriega during the Panama invasion.

The jets recently began daytime operations and are expected to move to Holloman Air Force Base in New Mexico this summer.

The Pentagon has unveiled the fighter jet while Congress and the Defence Department are battling over whether to complete the B-2 stealth bomber programme. The Air Force wants to buy 132 of them.

Couple in Felixstowe spotted Red/Green/Amber lights at between 2-3am on Wednesday 28 March.
Reported it to BT receiver/Transmitter site at Martlesham Heath + got told to go away.
Then reported it to local paper who contacted press desk.

Section 40 [redacted]

USAF had a single C-130 tanker (at low level) in E. Anglia approx 2100-0100, out of Woodbridge, which is only 7nm from Felixstowe. I grant you the time is a bit out, but people might have got confused over Zulu + Alpha - worth a try?
