Incident #150 -- Swedish coast -- 1 March 1943

The description given here is entirely too fragmentary for any conclusions to be drawn. The object sighted could have been a meteor, a rocket, or a guided missile. The fact that it left no trail in the sky argues against its having been a meteor.

Note the similarity of this incident to #149 and #133.

APPROVED 1 JUNE 1958

COUNTRY SWEDEN	REPORT NO. IR 115-48	(LEAVE BLANK)
AIR INTELLIGENCE INFORMATION REPORT		
SUBJECT Project "SIGN"		
AREA REPORTED ON Sweden	FROM (Agency) OAA-Sweden	26110
DATE OF REPORT 30 December 1948	DATE OF INFORMATION 29 December 1948	33165-1
PREPARED BY (Initial) Donald L. Hardy, Colonel, USAF	SOURCE Swedish Defense Staff	EVALUATION B-2
REFERENCE: (Control number, directive, previous report, etc., as applicable) Source Control No. AME-435		

SUMMARY: (First concise summary of report. Give significance in first one-sentence paragraph. List important points last. Begin text of report on AF Form 112-Part II.)

1. The Swedish Defense Staff has no proof that any unidentified flying objects, missiles or vehicles have passed over or near Sweden to date.
2. All reports of sightings in Sweden during the past year, irrespective of to whom they were submitted, have been funneled to a special section of the Defense Staff, where the sightings were plotted. In each case an exhaustive interrogation of the sighter followed, somewhat along the lines of the EMI for Project "SIGN". All evidence obtained of sightings was explicable in terms of astronomical phenomena.
3. In addition, 3 ground radar stations and 2 radar equipped destroyers cooperated in maintaining watch. The radar equipments were Swedish modified British sets of fairly short range and were not operated on a 24 hour basis; however, no unexplained sightings were made with this equipment.
4. Conclusion: Although the possibility exists that objects have traversed Sweden and its adjacent waters, no proof has been obtained to confirm such flight in any instance.

COMMENT: The cooperation of the Defense Staff in securing this information was undoubtedly given in an effort to emphasize their need for additional U.S. radar equipment. The Swedish Air Board had previously negotiated with the Bendix Corporation for 20 TIS-1a sets but had been refused an export license by our State Department. The members of the Defense Staff, to whom I talked, were eager to point out the good use to which such equipment could be put for both ourselves and the Swedes as instanced by our mutual interest in unidentifiable flying objects. However, I am convinced that our refusal to give an export license for such equipment will do more good in implementing our national policy, as expressed in the National Security Council document NSC 63/1, than would the information we might receive from the use of such equipment here.

Form 64-10000-101-10000

1. Date August 1, 1954
2. Time 0800 hours
3. Location British Isles
4. Name of observer A/C = a Norwegian pilot
5. Occupation of observer RAF pilot
6. Address of observer A/C Norwegian from 41 2-10-54
7. Place of observation A/C air = aircraft from Iceland; thought to
8. Number of objects 1 be a B-29
9. Distance of object from observer A/C
10. Time in sight 5 seconds
11. Altitude 40,000 ft
12. Speed A/C
13. Direction of flight Southwest = passing along British coast
14. Tactics A/C flight path followed certain pattern
15. Sound A/C
16. Size A/C
17. Color A/C but appeared a blue-grey flame
18. Shape A/C
19. odor detected A/C
20. apparent construction A/C
21. Exhaust trails None
22. Weather conditions A/C
23. Effect on clouds A/C
24. Distance or photograph None
25. Name of observer RAF pilot
26. Remarks (None)

An ONL plane enroute from Aalborg, Denmark, to Oslo, Norway, sighted a projectile coming from the southeast, passing along the Swedish Coast and disappearing over Norway. The missile was at 20,000 ft and disappeared over the horizon in four seconds. It emanated a bluish-green flame but left no trail in the sky. The projectile seemed to ~~then~~ follow the earth's surface.

NOTE: Similar missiles have been observed at Rjukan, Norway & Vinse, Norway.

In this connection, it is of interest to know that heavy water is currently being produced in Rjukan.

Observers: A Norwegian pilot and his co-pilot.

The pilot served with the Royal Norwegian AF in Great Britain.
