Incident #219 -- Newburgh, New York -- 29 November 1948

The object reported in this incident is clearly a slow-moving fireball. Time of day, length of time in sight, and all other data check with the bolide hypothesis.

No. 219: Time of sighting coincides within a few minutes of the release time of the USAF rawinsonde at Newburgh and a pilot balloon sounding at New York. Very little description given that can be interpreted as either being a burning balloon or a motor. One negative remark was that the object moved from East to West, an impossible situation for a balloon since winds at all levels were westerly.

Wright-Patterson Air Force Base
Dayton, Ohio
ATTN: MCIA XO-3

1. Reference is made to letter from your headquarters, MCIA XS, dated 9 March 1949, subject "Unidentified Flying Objects," and first indorsement thereto by this headquarters, dated 31 March 1949.

2. The incident summaries 173 through 233 have been checked against routine weather-balloon ascents made by the Air Force, Navy and Weather Bureau. Comments based on this review are inclosed.

3. It is recommended that the "Guide To Investigation Of Unidentified Aerial Objects" be changed as follows: Item 13, "Direction of Flight of Object," should be clarified so that vertical and horizontal motions are distinguished if possible, and so that motion is specified as the direction towards which the object appears to move. "Relative to Radar Settings" should include a statement of the type of radar set used.

City Girl Sees Sky Phenomenon

"Look!"

Doris Croke, 14, of 323 First St. said just that last night at precisely 8 o'clock and she really meant it. Doris said today she was convinced she saw a blue-tailed comet.

A ninth-grade student at North Junior High School, Doris said she was with two young friends standing on the corner of Concord St. and First St. when she looked into the north and saw "a ball of fire with a long tail. It lasted for two seconds, shooting from east to west, and going below the horizon. It was as large as life. I have seen shooting stars before but nothing like this."

Doris also declared the astral phenomenon was a "large red ball speeding through the heavens." She said her two friends also saw the "comet" and that a Gardner-town girl friend said she, too, had seen it "about 8 o'clock."
