UNCLASSIFIED

DETAILS:

1. Investigation requested by Colonel C. D. GASSER, AMC Engineering Field Officer, Oakridge, Tennessee, on 20 June 1949.

AT KNOXVILLE, TENNESSEE

2. At 1640 hours, 20 June 1949, the Federal Bureau of Investigation, Knoxville, Tennessee, reported to the Knoxville Detachment, 8th District OSI IG, Knoxville, Tennessee, that residents of Oakridge, Tennessee, had reported sighting unidentified objects flying over Oakridge, Tennessee.

AT OAKRIDGE, TENNESSEE

3. At 1900 hours, 20 June 1949, Mr. and Mrs. [REDACTED] [REDACTED] Oakridge, Tennessee, stated that at approximately 1200 hours, 19 June 1949, they sighted three unidentified objects flying from the southeast, over Oakridge, Tennessee. Mrs. [REDACTED] first sighted the objects and called Mr. [REDACTED] attention to them. They watched the objects until they came into closer view. They described two of the objects as being rectangular in shape, and identical. The third object was described as circular in shape, and flying either in between or slightly above the two rectangular objects. The two rectangular objects appeared to be flat and flexible. The third object was flat but did not have a flexible appearance. The rectangular objects in traveling, followed a wave-like course, and appeared to be dark in color underneath, and of bright metal finish on top. Their movements were coordinated, and their reflection in traveling was light and dark. The rectangular objects seemed to have an area of from four to ten square feet. The circular object was described as being the color of frosted glass. This third object did not follow the wave-like movement of the rectangular objects, but maintained a level flight. There was no noise to indicate how these objects were being propelled. They remained in view from 10 to 15 minutes after being sighted, and when last seen were traveling in a northwest direction. During this time the objects did not appear to either gain or lose altitude. The weather was clear with the exception of high scattered cumulus clouds, and the wind which was from an easterly direction was very slight.

4. At 2000 hours, 20 June 1949, Mrs. [REDACTED] Oakridge, Tennessee, stated that Mrs. [REDACTED] neighbor, called her attention to the three flying objects sighted by the [REDACTED] at approximately 1200 hours, 19 June 1949, and that she watched them for approximately 10 minutes. Mrs. [REDACTED] description and details regarding the objects were the same as Mr. and Mrs. [REDACTED].

5. The witnesses of these objects are reputable people, and their statements are considered reliable. Mr. [REDACTED] is a biologist with the Oakridge National Laboratories, Mrs. [REDACTED] a school teacher, and Mrs. [REDACTED] the wife of one of the members of the Security Division, A.E.C., Oakridge, Tennessee.

UNCLASSIFIED

AT MUNICIPAL AIRPORT, KNOXVILLE, TENNESSEE

6. At 0900 hours, 21 June 1949, Mr. RUSSELL J. YOUNKIN, Assistant Official in charge of the Weather Bureau, Municipal Airport, Knoxville, Tennessee, stated that their records indicated that a balloon was released by them at 1005 hours, 19 June 1949. This balloon was followed with a theolite to an altitude of 4530 meters, and was last sighted 23 minutes after release at an altitude of 6500 meters, SSW (196) of the station. This balloon did not carry any attachments. The following is the wind recording for 19 June 1949:

Surface	50 degrees	3 Meters Per Sec
2000	80 degrees	3 Meters Per Sec
MSL		
4000	240 degrees	4 Meters Per Sec
6000	260 degrees	5 Meters Per Sec
8000	260 degrees	11 Meters Per Sec
10000	240 degrees	12 Meters Per Sec
12000	190 degrees	11 Meters Per Sec
14000	200 degrees	12 Meters Per Sec
16000	200 degrees	19 Meters Per Sec
18000	190 degrees	24 Meters Per Sec
20000	170 degrees	20 Meters Per Sec

The wind at Oakridge, Tennessee, was from an easterly direction, and the velocity up to 2000 ft. was from 4 to 7 miles per hour.

AT OAKRIDGE, TENNESSEE

7. It was verified through the Security Division, A.E.C., that X-10 weather division at Oakridge, Tennessee, did not release any balloons or other weather instruments on 19 June 1949.

SUMMARY OF INFORMATION

On 22 June 1949, Officials of the OSI, Knoxville, Tennessee, informed this Agent that on Sunday, 19 June 1949, at 1200 hours, a "flying saucer" was sighted at Oak Ridge, Tennessee. The "flying saucer", consisting of three objects, was sighted at approximately 1000 ft. altitude proceeding from the southeast in a north-westerly direction by Mr. and Mrs. [REDACTED], Biologist at Oak Ridge, 102 Vance Road, Oak Ridge, Tennessee, from their yard. After watching the "flying saucer" for about five minutes, Mrs. Anderson, a School Teacher at Oak Ridge, notified Mrs. [REDACTED], wife of a member of the Security Division, AEC, 102 [REDACTED] St., Oak Ridge, whose backyard is adjacent to that of Mrs. [REDACTED]. Together these three people observed the "flying saucer" for about twelve to fifteen minutes until it disappeared. It was described as consisting of two identical rectangular-shaped objects which appeared to be coordinated in movement and which moved in a wave-like motion. The third object was circular in shape and appeared to be in level flight between and above the two rectangular objects. The rectangular objects appeared to be bright metal on top but dark underneath, while the color of the circular object was the same as that of frosted glass. The "flying saucer", when last sighted, was in level flight and was flying in a northwesterly direction. The weather was clear with high cumulus clouds. The "flying saucer" flew at a speed of from 10 to 15 mph over an area just about the center of Oak Ridge. The Weather Section of Plant X-10 reported that they did not release any weather balloons or any other meteorological instruments on that day. The Weather Bureau at Knoxville Airport reported having released a weather balloon at 1005 but no meteorological equipment. Their balloon was followed by sighting instruments until it had reached an altitude of 4530 meters and was last sighted at 6300 meters moving in a south-southwesterly direction at 196 degrees, after having been released twenty-three minutes. Weather charts at Knoxville Airport showed the wind at Oak Ridge to be at a speed of 4 to 7 mph up to an altitude of 2000 ft. in an easterly direction. The surface winds at Knoxville Airport were at a speed of 3 meters per second at fifty degrees; at 1000 ft., 3 meters per second at 80 degrees; at 2000 ft, 6 meters per second at 120 degrees.

1. Reference paragraph 2, first indorsement, wind readings of the Knoxville Municipal Airport Weather Bureau have been re-checked, and readings as shown in report submitted are confirmed. Knoxville Municipal Airport is 1000 ft altitude. Wind readings are computed at Mean Sea Level. It is believed that this has not been taken into consideration; otherwise, the readings would have been the same.

2. A check of the records of the U. S. Department of Commerce Weather Bureau, Chattanooga, Tennessee, for 19 June 1949, revealed reports as follows:

Chattanooga, Tennessee: (Balloon)

0300 hours	3000 mtrs	110 degrees	4 knots
0900 hours	no run		
1500 hours	5000 mtrs	80 degrees	16 knots
2100 hours	2000 mtrs	70 degrees	8 knots

Spartanburg, South Carolina: (Balloon)

0300 hours	4000 mtrs	80 degrees	4 knots
0900 hours	7000 mtrs	90 degrees	10 knots
1500 hours	8000 mtrs	100 degrees	19 knots
2200 hours	7000 mtrs	90 degrees	7 knots

Greensboro, North Carolina: (Radiosonde)

0300 hours	14000 mtrs	110 degrees	7 knots
0900 hours	9000 mtrs	100 degrees	18 knots
1500 hours	14000 mtrs	80 degrees	10 knots
