[REDACTED], Portland, Oregon
[REDACTED], Portland, Oregon

Occupation and hobbies:

Pilot NW Airlines
Tower Operator
Civ. Instructor Pilot
CAA Tower Operator

Comments of Interrogator relative to intelligence and character of observer(s):

NARRATIVE SUMMARY:

General remarks: At approximately 2100P Portland Tower reported to Flight Service that an object displaying two red lights and one white light was seen hovering just south of the Columbia River where the Bonneville Power Lines cross the river. It appeared to drop two white flares and seemed to ease closer to Portland. The object hovered in this area approximately thirty (30) minutes and then disappeared to the east. Believing the object might be an aircraft in emergency, Portland Tower stacked four incoming airliners over the airport. The pilots of these four airliners saw the object and their names and addresses are available from Mr. [REDACTED]

Captain [REDACTED], the pilot of a Northwest Airline Martin 202, reported that while approaching Portland from the east he noticed what appeared to be an aircraft displaying two red lights and one white light. Since this was nonstandard lighting Captain [REDACTED] watched the object very closely. His sighting of this object was at 2110P at an altitude of six (6) thousand feet and he was approximately five (5) miles west of Stevenson, Washington. He reported that the object was behind him and slightly to the left and maintained that same position until Troutdale. When over Troutdale Captain [REDACTED] heard Portland Tower giving instructions to other aircraft to hold over the airport because of an unidentified flying object dropping flares. Upon hearing this information Captain Thrush turned one hundred and eighty (180) degrees and attempted to intercept the flying object displaying the two red lights and one white light that had been following him. He reported that this object then turned to the southeast and appeared to pull away from him quite easily. Captain [REDACTED] reported that his indicated airspeed was two hundred and ten (210) miles per hour while he was trying to intercept the object.

[REDACTED] reported that he saw the object while in the traffic pattern in Troutdale, Oregon. He was flying at an altitude of one (1) thousand three (3) hundred feet indicated and reported that the object appeared to be five (5) hundred to eight (8) hundred feet above him and at an estimated distance of twenty (20) miles to the east.

The only Air Force aircraft in the vicinity at the time was a B-29, AF 7758, who was over Portland at 2130P at an altitude of seven (7) thousand five (5) hundred feet, northbound. The pilot was questioned and stated that he did not drop any flares and did not circle over Portland and did not see anything unusual.

4 Aug 1949

Subj: Flying Discs, Report of
Ref: (a) CNO Conf Ltr Cp322V P16-3/QN, ser 0422P32 dated 4 Nov 1948
1. In accordance with reference (a), following information is submitted:

At 2100 hours on 30 July 1949, between [redacted] Washington, and Troutdale, Oregon, a group of unidentified lights were sighted by Northwest Airlines pilot [redacted], Portland, Oregon, while on a routine flight from Yakima to Portland. [redacted] stated the objects could have been two or three planes flying in very close formation, however, the red lights were on the wrong side for airborne aircraft. When [redacted] circled the field to await instructions for landing, the object changed course about 50° and left the vicinity.

The co-pilot of the plane, [redacted], also of Portland, sighted the lights but was not available for interview. [redacted], CIA traffic controller on duty in the control tower of the airport also observed the object. [redacted] reportedly observed from the ground tower. According to [redacted] turned the airport spotlight on the object, which he thought at the time was a helicopter, to help guide it to a landing. However, the object disappeared at a high rate of speed and headed in a southeasterly direction when the light was focussed upon it. A description of conditions are as follows:

Weather: Clear, however object was sighted after sundown.

Sketches: None, since darkness prevented adequate observation.

Shape and size: Not determined because of darkness.

Color: Red lights steady, white light on occasion.

Speed: Two hundred miles per hour.

Heading: When first seen approximately 240°T. When last seen over Troutdale, 50°T. There was no change in the lighting with the change of heading.

Maneuverability: Course and elevation did not change rapidly.

Altitude: 6000 - 8000 feet.

Sound: None observed - other sounds in own plane would have obscured sounds.

Exhaust: None observed.
