AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency) DOI 4708th Defense Wing Selfridge AFB, Michigan	REPORT NO.	PAGE 2 OF 2 PAGES
---	------------	-------------------

On 27 April 1952, at approximately 2000 hours the undersigned was walking in an easterly direction toward the officer's barracks area at Selfridge Air Force Base, Michigan, when I noticed in the sky at a 45 degree angle a large flash of green light which trailed to a point to the north. The light was kelly green in color, persisted for from three to four seconds, and then disappeared. I heard no noise, saw no object--though the light appeared to move in a horizontal plane. It was dark and the light lit up the sky, being bright enough to throw a reflection in a pool of water along the road. I cannot determine shape, size, altitude or speed.

Two other officers walking toward me stated, upon my inquiry, that they knew of a light behind them, but thought the light was from a beacon overhead and they acknowledged that this was not the light that must have appeared.

I have been at Selfridge Air Force Base for 16 months, have never seen any similar lights or balls of green light. The night was clear, stars were clearly visible, no clouds in the sky. I have seen falling stars, but this light moved horizontally and not vertically as a falling star.

I would not have reported this ball of light in view of its fragmentary nature, were it not for the fact that four other sightings, during the daytime, were reported in areas around Selfridge Air Force Base, Michigan.

Captain, USAF
