AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency) Intel Office, 4702D Det
Wing, Hamilton AFB, California

REPORT NO.

PAGE 1 OF 1 PAGES

Information required by paragraph 7c, AFL 200-5, dated 29 April 1952 is listed as follows:

- (1) One dark thin cigar shaped object, approximately 100 feet long and 10 to 15 feet wide. No wings, tail or exhaust was observed. Method of propulsion unknown. Object emitted a high pitched whistle. Object varied altitude in a definite high speed pattern always keeping the same distance below the various cloud levels. Estimated speed five miles per second.
- (2) 2005 hours 22 June 1952. Time observed approximately five seconds.
- (3) Visual observation.
- (4) ~~XXXXXXXXXXXX~~, Millbrae, California. (37° 36' N 122° 36' 30" E) 105 feet above sea level. Object sighted proceeding from the Northwest to the Southeast. Red Hook to San Jose or Hunter's Point to over Bay Meadows, California. Distance covered from time first observed until disappearance was approximately 25 miles in approximately five seconds.
- (5) Reported by: Mr. ~~XXXXXXXXXXXX~~
~~XXXXXXXXXXXX~~
Millbrae, California

who has been flying since 1932. (P-6).
- (6) 2000 hours 22 June 1952 ceiling: 1700 feet - scattered clouds
2700 feet - broken clouds
12000 feet - overcast
visibility: 20 miles
wind: calm
Source: Hamilton AFB Weather Station.
- (7) None known.
- (8) None.
- (9) One (1) routine flight F-89 took off from Hamilton Air Force Base at 1902 hours 22 June 1952 to 37° 42' N 123° E to 38° 16' N 121° 56' 30" E to Hamilton Air Force Base. Landing time 2041 hours 22 June 1952. Visual observation negative. Radar contact negative.
- (10) None other than number 9. This does not preclude the presence of civil or other military airborne aircraft in subject vicinity.

3510th Fly Tng Wg (HB) RAFB, Tex

1. At approximately 1430, 22 June 1952, the Group Intelligence Officer and his assistant interrogated T/Sgt Howard Davis the Flight Engineer on B-29 44-86440, after he reported he had seen an unidentified flying object.

2. The interrogation revealed the object to be arrow shaped with a pointed nose and oval trailing edge. The trailing edge appeared to have an opening in the center. The estimated size of the object was 3½ feet long and 3 feet across. The object had a dark blue center which was banded by a white circle with the outer edge being red.

3. No conclusions can be drawn as to the aerodynamic features, other than it appeared flat. A trail of reddish sparks and streaks of light beginning approximately 3 feet behind the object was observed. The speed could not be determined and no sound was heard. The source stated that he was gazing out the flight engineers window when the object came into view. It was making a vertical descent at an estimated 500° off the aircraft wing. The source observed the object through approximately a 45° arc before it disappeared under the right wing. The length of time the object was observed was approximately 1 second.

4. The time of sighting was 1230 CST, 21 June 1952.

5. The observation was made visually from the engineers window of a B-29 which was cruising 190 MPH at 8000 feet. The aircraft was directly over Kelly AFB on a heading of 107 degrees.

6. T/Sgt Davis has approximately 600 hours as an engineer on B-29 type aircraft, his present duty is instructor engineer. Sgt. Davis is sincere and positive of the sighting.

7. The weather in the area and at the time of the sighting was broken cumulus with tops at 6000 feet, with no upper layer of clouds. The wind was from SSE at 25 MPH.

8. It is not known whether there was any activity or condition meteorological or otherwise which could account for the sighting.

9. There is no physical evidence such as fragments, photographs and the like, of the sighting.

10. Immediately after Sgt. Davis reported the object to the aircraft commander a turn was executed to the right through 360 degrees, but the object was not in sight. No other action was taken to intercept the object.

11. No other aircraft were observed in that area at the time of the sighting.

AIR INTELLIGENCE INFORMATION REPORT		
SUBJECT (UNCLASSIFIED) Unidentified Flying Objects Reporting (Short Title: FLYCRAFT)		
AREA REPORTED ON Middletown Air Materiel Area	FROM (Agency) Intelligence Office Olmsted Air Force Base, Middletown, Pa.	
DATE OF REPORT 30 June 1952	DATE OF INFORMATION 28 June 1952	EVALUATION Satisfactory
PREPARED BY (Officer) John L. Spiegel, 2d Lt, USAF	SOURCE Civilian observer	
REFERENCES (Control number, directive, previous report, etc., as applicable) Air Force Letter No. 200-5, 29 Apr 52		

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112—Part II.)

Mrs. [REDACTED] Lemoyne, Pa., reporting observing an unidentified object on 27 June 1952 at 2235 hours EST.

Mrs. [REDACTED] reported that object was a large illuminated oblong disc-shaped object. According to the observer the object had a very smooth surface and appeared to be illuminated by an intense yellow light from the inside. She described it as having a tail not perceivably connected to the main body. An intense yellow flame emanating from the tail appeared to be its exhaust.

She said that it was traveling southward and then altered its course due west, maintaining a constant altitude. No estimate of the speed could be given other than it was traveling very fast, faster than any jet she had ever seen. Mrs. [REDACTED] could not estimate its altitude. The length of the observation was estimated to be three or four seconds.

Mrs. [REDACTED] claims that she has seen both comets and jet aircraft and that this object had the appearance of neither one.

Mrs. [REDACTED] husband, Mr. [REDACTED] also observed the object.

This Office can give no definite explanation of the sighting. However, a commercial airliner, a Martin 202, was reported in the Lemoyne area at the time by the Harrisburg Municipal Airport tower. A civilian guard claims to have definitely seen a meteor at the same time.

[REDACTED]
[REDACTED]
June 28, 1952
[REDACTED]

United Air Force Base
Att. Intelligence Section (MA 28)
Wilmington, Pa.

Headed:

The night of June 27, 1952,
at 11:35 o'clock, my husband
and I observed in a very
clear sky the object which
I shall describe.

The object was oblong
in shape and was lighted
throughout itself with
an intense yellow light.
[REDACTED]

(2)

The outline of the object was smooth and not irregular in any way. The light in the object filled the whole thing with its intensity but was not fire. It was a steady, bright light. But in the back of the object and a little apart from the end of the object was a tail of red and yellow fire which was entirely different than the light in the body. We thought the tail was some form of exhaust.

We observed it for about 3 or 4 seconds and it flew ~~south~~ ^{north} and made a sharp turn west and traveled

(3)

at a tremendous rate of speed.

It flew straight and seemed to have a definite course, and flew with the horizon, did not go up or down.

It looked to be high but I cannot estimate its altitude. It was silent with no sound at all.

The tail was not very long, in fact the body of the object was longer than the tail.

I have seen planes, comets, and meteors. This was in no way like any of those three objects. It was entirely different, and made a strange sight to see. Mrs. [redacted]

1. In reference to teletype, this headquarters, 211649 June 1952, number GIO 1100 R FLYOBREP and AFL 200-5, dated 29 April 1952, a report is submitted on the sighting of unidentified aerial object.

2. An unidentified flying object was observed from the engineer's window of a B-29 which was cruising 190 MPH at 8,000 feet directly over Kelly AFB on 21 June 1952. The object appeared arrow-shaped with pointed nose and oval trailing edge. The center of the object was dark blue banded with white and the overall outer edge of the object was tinged with red. Its speed was undetermined.

3. This is the second reported sighting of unidentified objects in the San Antonio area within a month. However, resemblance between the objects of the two sightings is slight. (Refer to AIIR, this headquarters, dated 28 May 1952).

AIR INTELLIGENCE INFORMATION REPORT

FROM: Deputy for Intelligence Japan Air Defense Force, AFO 710	REPORT NO. IR 30-52	PAGE 2 OF 3 PAGES
The following information is forwarded as supplemental to FLYCRAFT message, this headquarters, LNT 067, dated 28 June 1952, submitted in accordance with AFL 200-5, 29 Apr 52.		
1. <u>Description of Object</u>: The object was single, elliptical in shape, and of a dark blue color. It appeared to be bordered by a pulsating, irregular border of a brighter hue which extended to a maximum width about equal to the radius of the center, darker, portion. During the observation the object maintained constant altitude and direction, until it disappeared above clouds which were solid to the horizon along an extension of the object's course. Speed was approximately 700 to 800 miles per hour, and there was no sound, trail, or visible propulsion system.		
2. <u>Time of Sighting</u>: 0110 I, 28 June 1952.		
3. <u>Manner of Sighting</u>: The sighting was visual without optical aids. The nearest radar site, approximately eighty-five miles away, reported no sightings for the period.		
4. <u>Location of Observer</u>: Observer was in American Village area, Nagoya, Honshu, Japan (3502N/13656E). The object passed directly over observer's head parallel to the earth in a northeasterly direction at an altitude between 15,000 and 25,000 feet.		
5. <u>Reliability of Observer</u>: The observer is a rated Electronics Countermeasures Officer, presently on flying status. He has a responsible position in this headquarters which he has held for over a year.		
6. <u>Weather</u>: Komaki Air Base, approximately six miles from the sighting, reported weather for 0100I, 28 Jun 52, as follows: Clouds - 4/10 cumulus at 2500 feet 7/10 stratocumulus at 6000 feet 9/10 cirro-stratus at 20,000 feet Visibility - Eight miles Wind - Calm		
7. <u>Unusual Conditions Which Might Account for Sightings</u>: None.		
8. <u>Existence of Physical Evidence</u>: None.		
9. <u>Interception or Identification Action Taken</u>: None.		
10. <u>Location of Air Traffic</u>: Komaki Air Base tower reports no aircraft were in the vicinity within one hour of the sighting.

S T A T E M E N T

On the morning of 28 June at 0110L, I drove home from the club, put my car in the garage and walked out to see how the weather would be in the morning for golfing.

The sky immediately above was clear. There were stars visible and there was no moon. To the north and the south there were thunder heads and occasional lightening flashes. As I was looking up, I noticed this blue light moving across the sky from southwest to northeast. My first impression was that it was a meteor. But upon closer examination, I saw that its speed was much too slow and that it had no tail. As I continued to watch the object, a blue light appeared to pulsate around the object. The object continued in a straight line at an apparent constant altitude to the northeast leaving no trail and no sound could be heard. I would estimate the altitude at between 15 and 25 thousand feet, and the speed somewhat faster than a Jet. The object disappeared behind clouds to the northeast.

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112—Part II.)		

At 1150 hours, 4 July 1952, CWO [redacted], acting as Wing Staff Duty Officer for 4709th Defense Wing, received a telephone message from Mr. [redacted], Beverly, New Jersey. The message referred to the sighting of an unidentified object in the air at Seaside Park, New Jersey. The claims made by Mr. [redacted] were referred to the 568th Air Base Group for investigation and were investigated by S/Sgt. Dennis G. Washburn, Intelligence Operations Technician. His complete report is forwarded.

The object was apparently sighted for the first time by Mr. [redacted] in the company of three other persons: Mrs. [redacted], Mr. and Mrs. [redacted]. The second time the object appeared, the group had moved approximately 1 mile southwest, and included two additional persons: Mrs. [redacted] and an unidentified civilian woman. Each time the object appeared it was in sight for approximately three to five minutes. Its disappearance both times was accompanied by three puffs of vapor or smoke, which it seemed to emit while gathering speed. The object appeared to hover in a watchful manner over three jet aircraft which were flying in the area. After the second disappearance the object was not seen again by any members of the group.

56th Air Base Group, McGuire Air Force Base, Trenton, N. J.	REPORT NO. IR-31-52E	PAGE 2 OF 10 PAGES
--	-------------------------	--------------------

Report of Investigation of Unidentified Object Sighted in the Air on
30 June 1952 at Seaside Park, N. J., by S/Sgt Dennis G. Washburn, Jr.

At 1430 hours, 8 July 1952, I received the following extract from the Wing Staff Duty Officer's journal for the 4709th Defense Wing: 4 July 1952", "1150 hours Received telephone call from Mr. [REDACTED], Beverly 5-0317-R. Referred to observing an unidentified object over Seaside Beach on Monday, about 1600 - 1630 hours". "Call Major Johnson". I received this extract with instructions to make an investigation from Major Joseph H. King, Operations Officer for the 56th Air Base Group. I immediately telephoned the number listed ([REDACTED]) and talked to Mrs. [REDACTED]. As Mr. [REDACTED] was not at home at the time, I made an appointment to telephone again at 1900 hours 8 July 1952, and to make a personal interview at 1830 hours 9 July 1952.

At 1930 hours, 8 July 1952, I contacted Mr. [REDACTED] by telephone and discussed his sighting of the object for approximately twenty-five minutes. After discovering that several other people were involved in the sighting, I determined to make a personal interview of all five people involved. Mr. [REDACTED] agreed to invite Mr. and Mrs. [REDACTED] to his home on the night of 9 July 1952 so that I might be able to interview all four at the same time.

During the course of the telephone conversation Mr. [REDACTED] described the object he had sighted as being round - globe-like, rather than saucer-like, with a shining, silvery color. He stated that it was considerably larger than the average jet fighter-interceptor aircraft, and that it was at a much higher altitude than were three jet aircraft flying in the area at the same time. He was unable to give any identifying information about the jet aircraft. The object he had sighted appeared to hover, and seemed to be interested in the antics of the jet aircraft. He was unable to give any identifying information about the object, other than the fact that it was round and very shiny. He could not ascertain the method of propulsion, but stated that three puffs of vapor or smoke had appeared just before the disappearance of the object both times that the object was seen. Mr. [REDACTED] could give me no other information concerning the object.

On the night of 9 July 1952, at 1830 hours, I went to the home of Mr. [REDACTED] at Beverly, New Jersey, where I interviewed Mr. and Mrs. [REDACTED] and Mr. and Mrs. [REDACTED]. At the time the first sighting occurred, the [REDACTED] and [REDACTED] families were out on the beach at Seaside Park, New Jersey. Mr. [REDACTED] was lying on the sand playing with his three year old daughter when he first noticed this object. He immediately called it to the attention of the other members of his group. They wondered what it was, and continued to observe it for as long as it was visible. Mr. [REDACTED] reversed one statement that he had made to me during our telephone conversation on the preceding night. He now described the object as being round with a flat surface, (possibly saucer like) round as the moon would appear at night time. The preceding night he had described the object as being round and globe-like.

After sighting the object the first time, the group moved approximately one mile southwest, and were joined by two other persons, Mrs. [redacted] and one unidentified civilian woman. As they were describing the incident to these two persons, the object reappeared, and was seen by all six people in the group. Its behavior was the same as on the previous sighting, and after approximately three to five minutes it vanished and was not seen again by these witnesses. Mr. [redacted] described the disappearance of the object as follows:

"The object seemed to be turning over on its side when suddenly it sent out a puff of smoke or vapor which looked very much like a smoke ring. Afterwards it moved westward a little bit. Then it sent out another puff of smoke or vapor, very much like the first, and moved a little more westward. After this, it sent out another puff of smoke or vapor which was different from the first two in that it was not in the shape of a smoke ring and appeared to be very much denser. After the third puff of vapor the object just disappeared. It was as if the thing gained speed and went out of sight so suddenly that we weren't aware that it was gone. Both times that we saw the object it disappeared like that."

Mr. [redacted] stated that the object was at a seventy-five degree angle from the group each time that it was sighted and that it remained in sight for approximately three to five minutes each time. He also reaffirmed the statement of Mr. Knight that the object apparently was observing the maneuvers of the three jet aircraft in the area.

The weather was described by these four witnesses as being very clear, with few clouds and a slight breeze. They declared that no atmospheric conditions could have been responsible for the sighting of the strange, unidentified object.

Mr. and Mrs. [redacted] and Mr. and Mrs. [redacted] claim that they are familiar with the size, shape, characteristic, and color of Naval Blimps which frequently appear in the area, and state that the object could not have been one of these.

Mr. [redacted] said that he had no intention of reporting this incident to the Air Force until he read an article in the Philadelphia Bulletin concerning Flying Saucers being sighted in Pennsylvania approximately at the same time he observed the one at Seaside Park. This article appeared on page 42 of the night extra edition of the Philadelphia Bulletin, 2 July 1952. The unidentified object described in it appears to resemble the object sighted by Mr. Knight, and for that reason I am including a copy of the article in my report. The article reads as follows: "Flying Saucers were reported from this Northumberland County Community last night. Mrs. [redacted] said she saw a silvery, coinlike object which flew across the sky toward [redacted]. She said she and several other women sighted the object while they were standing in front of their home, and her niece, Miss [redacted], living some distance away, also saw the object. A motorist approaching through from Brady gave a similar report. He said he pulled to the side of the road and watched the object disappear."

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency) Fourth Air Base Group, McGuire Air Force Base, Trenton, N. J.	REPORT NO. IR-31-52E	PAGE 4 OF 10 PAGES
---	-------------------------	--------------------

During the course of my investigation a telephone call was made to Major John T. W. Hart, Jr., Operations Officer, Fifth Fighter Interceptor Squadron, and he stated that three aircraft from the Fifth Fighter Interceptor Squadron were in the general area of the reported sighting, and that no unusual sightings had been reported by the crews of the aircraft. I am unable to contact the members of these crews as this squadron is on TTX to Eglin AFB, Florida, at present.

The descriptions given to me by all four witnesses appear to coincide, and except for the reversal by Mr. Knight of the statement that the object was globe-like, no parts of the descriptions were changed.

I was unable to obtain an interview with Mrs. [REDACTED] or with the unidentified civilian women.

Each of the four witnesses I was able to interview submitted a signed narrative statement. The statements read as follows:

STATEMENT BY MR. [REDACTED]

"July 10 1952"

"This is my description and data in writing, as to an object sighted in the sky on June 30, 1952.

Object: A bright, shining, metallic-looking circular object. The only description I can give of this was that it looked like a new silver dollar so far up you could not see anything as to any mechanical features.

Description of Disappearance: As this object started to disappear it left like a circular puff of smoke or vapor, twice, and the third one was scattered as though some one taken a piece of white chalk, laid it sideways, and clouded a spot on a blackboard.

Direction of Disappearance: As this object started to move away it seemed to turn from appearing on its flat side, to its narrow side, and it could not be seen at all. The direction of disappearance was toward the open sea. East.

Time of Sight: The first sight was from the beach at Seaside Park, New Jersey, at approximately 4:05 p.m. June 30, 1952, and the second sight at 4:25 p.m. same date. The second sight was on the Bay Front about one mile from the first point of observation.

Weather Conditions: Very clear, no clouds, very slight breeze blowing from the south.

The reason why I called the Air Force at Fort Dix, New Jersey was I was very curious as to what I had seen, and after reading an article in the Philadelphia Evening Bulletin and the Look Magazine, I decided that I would call and see if my curiosity could be satisfied, and I finally thought it was

--	-------------------------	--------------------

time for someone with authority in our Forces to know of my experience, as I think it was my duty to.

I did not report this on the day I saw it, as I didn't want people thinking I was a crackpot, but as I thought of it more I decided to call the Post, and that was on July 4, 1952, and the day of the experience was June 30, 1952.

The article in the Bulletin was in reference to some people who had reported Saucers in Shenandoah, Pennsylvania.

I certify the preceding facts to be true to my knowledge, and all information to be true as I could see with the naked eye."

STATEMENT BY [REDACTED]

"On June 30, 1952, Monday, I with the named others sighted this object at about a 75 degree angle, out over the ocean. This object was round like a silver dollar. I could not make out any projection from its height. Its color was silver like. The disappearance was out toward the open sea. It just seemed to turn its side toward us, with puffs of smoke, and disappeared. The time we sighted this object was about 4:05. The second time was about 4:25."

STATEMENT OF [REDACTED]

"I, [REDACTED], in the company of the following persons, Mr. [REDACTED] and Mrs. [REDACTED], and my husband, [REDACTED], observed the appearance of unidentified object, and after reading both my husband's and Mr. Knight's reports can say that they concur with what I saw except that due to the fact that my attention was distracted by the children, I did not see the object completely disappear, but saw it when it did appear both times; otherwise, I fully agree with both their descriptions."

STATEMENT OF [REDACTED]

"I, [REDACTED], in the company of the following persons, Mr. and Mrs. [REDACTED], and my husband, [REDACTED], observed the appearance of an unidentified object, and after reading these three accounts, I concur with what they saw. I did see it disappear followed by the two smoke rings and one puff like, whereas Mrs. Montellor did not see it disappear. The preceding facts to be true as I saw it."

After reading each of these statements I interrogated each of the witnesses and transcribed a copy of the interrogations. This copy reads as follows:

INTERVIEW OF MR. KNIGHT

UNCLASSIFIED

S/Sgt Washburn: Mr. Knight, this object that you saw, was it clear and distinct or was it misty and hard to detect?

Mr. Knight: As far as I can say it was so clear that it cast a very bright reflection from the sun and was very easily noticed.

S/Sgt Washburn: Do you think this object could have been a balloon of some type or possibly one of the Navy's lighter-than-air craft commonly known as a Blimp?

Mr. Knight: No, I do not, for I've seen quite a few of those Blimps and also some weather balloons, and I don't think the object resembled them in the least. In the first place I don't believe that we could have seen a weather balloon from up that high.

S/Sgt Washburn: Were there any projections or unusual aerodynamic features to this object other than the fact that it was perfectly round?

Mr. Knight: Not that I could tell from that height. The only thing that I could tell was that it was silver and round and shiny.

S/Sgt Washburn: Mr. Knight, can you give me any definite idea as to the length of time the object remained in sight each time?

Mr. Knight: No, I can't. However, I would judge the time to be from three to five minutes each time.

S/Sgt Washburn: Mr. Knight, you remarked that the object appeared to hover rather than to move around. Can you give me an opinion as to what it might have been doing?

Mr. Knight: Well, it appeared to me that it might have been watching what those three jet planes were doing, and it looked to me as if the jet planes might have been doing some kind of target practice, because one of the planes was towing a target and the other made one and possibly more passes at it. We didn't pay too much attention to the airplanes, as we were too interested in this strange object.

S/Sgt Washburn: Did you notice any unusual markings on the aircraft, or rather any markings of identification at all?

Mr. Knight: No, I didn't, for they were too high up.

S/Sgt Washburn: Do you have any idea as to what altitude the aircraft were operating?

Mr. Knight: No.

S/Sgt Washburn: About the disappearance of this object - did it disappear very suddenly, or was it gradual, or just exactly how was it?

Mr. [REDACTED]: It sort of dipped away and turned over, and was out of sight immediately after the three puffs of smoke.

S/Sgt Washburn: Describe these puffs of smoke for me, Mr. [REDACTED].

Mr. [REDACTED]: Well, they were at least as large as the object itself and very round, reminding me of a smoke ring a person who is sucking might blow. That is the first two were, and the last one was not round at all and was a whole lot thicker than the first two. This last one was as if the object had several exhaust pipes and had turned over, leaving a thick spot of vapor.

S/Sgt Washburn: As to the manner of this strange disappearance, would you ascribe it to an invisible color, terrific speed or what? I mention these possibilities because you have remarked that it might have been caused by either of these things.

Mr. [REDACTED]: I don't know. It might be that it had one side of it painted a color that wouldn't reflect light, or it might have been because it gained a terrific speed very suddenly.

S/Sgt Washburn: Mr. [REDACTED], I understand you were the first of the group to see the object both times. Will you tell us just exactly what made you notice it?

Mr. [REDACTED]: Well, I was laying down in the sand on the beach playing with the baby, and I just happened to look up and saw the thing and showed it to the others at once. That was the first time that we saw it, and the second time we had gone approximately one mile over to the bay side of Maurice Park and were describing the object to two ladies that we saw there, and I happened to turn and point upward to where we had seen it the first time, when all of a sudden it reappeared again.

S/Sgt Washburn: Do you have any explanation at all to account for this object?

Mr. [REDACTED]: No, I don't have, I wish I did.

INTERROGATION OF [REDACTED]

S/Sgt Washburn: [REDACTED] in reading your statement, I notice you say that the object was at a 75 degree angle from your group. Was it to the east or west of you, just exactly where was it in relation to your group?

Mr. [REDACTED]: Well, it was at a 75 degree angle from us, very high up in the air, and was out over the sea, eastward from us both times that we saw it.

S/Sgt Washburn: Do you have any idea as to what might have caused this object to disappear?

Mr. [REDACTED]: I don't guess so except that it did look to me as if the thing might have been picking up speed when it sent out those puffs of smoke, and that is the only time that the object moved.

S/Sgt Washburn: How noticeable was this movement that the object made? Did it pick up speed suddenly and did it move very much before it disappeared?

Mr. [REDACTED]: No, it moved a little bit with the first puff of smoke, and a little bit more with the second puff of smoke, and just after the third puff it was out of sight. Another thing, it seemed to be turning over on its side during all this.

S/Sgt Washburn: Do you mean it was turning over on its side during the disappearance, or did it continue turning over throughout most of the sighting?

Mr. [REDACTED]: Only during the disappearance. During most of the sighting the object was motionless.

S/Sgt Washburn: Mr. [REDACTED], you have read Mr. [REDACTED] statement and heard my interrogation of him. Is there anything that we have left out, failed to discuss, or do you have anything else that you can tell me regarding this object that you saw?

Mr. [REDACTED]: No, there isn't.

INTERROGATION OF [REDACTED]

S/Sgt Washburn: Mrs. [REDACTED], you have read the statements of these others and have heard my questions to them. Is there anything that you would like to add that hasn't been covered, or is there anything that we have discussed that you think should be emphasized?

Mrs. [REDACTED]: No.

S/Sgt Washburn: Do you agree in all respects then to the descriptions of the object given by your husband and Mr. [REDACTED]?

Mrs. [REDACTED]:

INTERROGATION OF [REDACTED]

S/Sgt Washburn: Mrs. [REDACTED], is there anything that you could add to the descriptions already given, or is there anything you would like to mention concerning the sighting of this object?

Mrs. [REDACTED]: Yes, two things, the first one is that I did not see the disappearance due to the fact that I was distracted by the children, but that I did see the object, and agree with all the descriptions given by my husband and Mr. [REDACTED]; and the second is that one of the women who sighted the object with us the second time was Mrs. [REDACTED].

[REDACTED] Camden, New Jersey, and I don't know the name of the other woman.

END OF INTERVIEW

STATEMENT BY STAFF SERGEANT TASHUMI CONCERNING RELIABILITY OF WITNESSES

Mr. [REDACTED] appears to be a sober, industrious man. He is 30 years old and is employed at the Summit Mills as a shipping clerk in Burlington, New Jersey. He has one child and owns his own home. He has never been in the service due to a deformity of his left arm. He appears to be a relatively intelligent person with a high school education, and with the information I now possess concerning him, I would judge him to be fairly reliable. His wife, Mrs. [REDACTED], is a housewife twenty-six years old, and seems to be quite intelligent and level-headed. I would also judge her to be fairly reliable.

Mr. [REDACTED] is 22 years old, has one child, and is employed in the shipping department at the Summit Mills in Burlington, New Jersey with Mr. [REDACTED]. He appears to be slightly nervous and to possess approximately the same educational background as Mr. [REDACTED]. I judge him to be fairly reliable, although not as much so as Mr. Knight because of the difference in their age. His wife, Mrs. [REDACTED], seems to be a very nervous and excitable young woman twenty-two years old, who has one child eighteen months old, and is approximately five months pregnant at the present time. All the witnesses insisted that none of them had been drinking any intoxicating beverages, and all witnesses claimed to be total abstainers. I would give the witnesses a reliability rating of "C" (fairly reliable), and I would give the report of the incident a rating of "J" (possibly true).

CONCLUSION OF REPORT:

In conclusion I make a brief summary of all items reported to me. On 30 June 1952 Mr. and Mrs. [REDACTED] and Mr. and Mrs. [REDACTED] claimed to have observed an unidentified object in the air over Seaside Park (29 degrees 55 minutes north, 74 degrees west) at an extremely high altitude. This group of people was approximately one and one half miles south of Coast Guard Station 109 in Seaside Heights, New Jersey. They were unable to judge the altitude of the object. The object was reported as having been seen two times - the first time at approximately 1605 hours, and the second time at approximately 1625 hours. Each time it was observed from three to five minutes. The object was round, with a flat surface like a saucer, and seemed to hover in one spot, rather than to be travelling. The witnesses seemed to think it was observing three jet aircraft in the area. Each time after being sighted for approximately three to five minutes, the object disappeared after three puffs of vapor or smoke had been emitted. These puffs of smoke apparently had some relationship to the disappearance of the object, and as remarked by Mr. [REDACTED], may have come in some manner from the mechanism which propelled the object. The three jet aircraft were possibly from the Fifth Fighter-Interceptor Squadron, and the pilots of the aircraft reported no unusual sight. Apparently no atmospheric conditions could have caused the sighting.

RAFB, 3520 FLY TNC HQ (DB), TEX.		1	1	

C E R T I F I C A T E

I, T/Sgt Howard Davis, AF 666570, do certify that:

On June 21, 1962, at 1230 hours, while flying in a B-29 at 8000 feet over Kelly Air Force Base, Texas, on a heading of 107 degrees and at an indicated air speed of 190 miles per hour, I observed from my Flight Engineer's window what appeared to me for about one second, an object 500 feet off our right hand wing, moving in a vertical path from above us toward the earth. Its main body was of a dark blue color, glowing like a welding flame, and was surrounded by a white flame glow, having an outer glow of orange flame. It was about three feet in diameter and about three and a half feet long. About three feet from its main body, I noticed a trail of sparks and streaks of light. These lights were of the same colors, blue, white, and orange, and formed a trail about fifteen feet in length. The object had an arrow shaped nose and an oval shaped trailing edge, with an opening in the center that appeared as a blank space in the structure. It was somewhat flattened, and was made of an undeterminable material, for it did not seem to be metallic. It was traveling at a speed similar to that of a 22 calibre bullet fired from a low-cost single shot rifle. I didn't hear any sound coming from the object. The weather at the time was clear above us, and a thin layer of cumulus clouds below us at 8000 feet, with a coverage of about 5/10. There was no other aircraft around the area at the time.
