SPOT INTELLIGENCE REPORT

SUBJECT: (Unclassified) UNKNOWN SUBJECT(S):
Sighting of Unconventional Aircraft,
West Newfield, Me., 1925 hours, 22 Jul 52

TO: Director of Special Investigations
Headquarters USAF
Washington 25, D. C.

SYNOPSIS:

[REDACTED], a skywatcher, telephonically reported sighting an unusual object in the sky at West Newfield, Maine, at 1925 hours, 22 July 1952. Description of object set forth. No activity or condition developed that accounts for sighting.

DETAILS:

1. Major HAROLD J. HULBERT, AO 912215, Commander of the Manchester (N.H.) USAF Filter Center, advised on 23 July 1952 that at approximately 1950 hours, 22 July 1952, Mr. [REDACTED], a skywatcher at the Newfield, Me., observer post, telephonically reported to the Filter Center that he had observed an unusual object in the sky at West Newfield, Me. The Duty Officer at the Filter Center, Captain CHESTER McGRATH, AO 827886, called [REDACTED] at 2105 hours for further information and at 2110 telephonically communicated the report to "KIDSKIN" (a radar station at Brunswick, Me.).

2. On 24 July 1952, [REDACTED] was interviewed at his home in West Newfield, Me. He stated that at approximately 1925 hours, 22 July 1952, he was in his home when his son, [REDACTED], who was playing outside, called out that there was a parachute in the sky. [REDACTED] went outside and observed a silver-colored sphere high in the sky almost overhead.

INFORMATION COPY FORWARDED TO CG, AMC

UNCLASSIFIED

There was a smaller sphere attached underneath the larger sphere, and a smaller undefinable object attached under the smaller sphere. The size and altitude of the object could not be estimated, but [redacted] stated that from his position the large sphere approximated the size of a tennis ball and the small sphere a golf ball. There was no sound emanating from the object and no exhaust or trail could be seen. The object appeared to have no propulsion and was just slowly drifting along with the slight wind, with no appreciable vertical or horizontal deviation from course. The object moved towards the southeast and remained in sight approximately thirty (30) minutes before disappearing from view in the distance. (NOTE: Records of USAF weather station at Grenier AFB indicate that a slight wind from the west to the east was prevailing at Newfield at 1930 hours, 22 July 1952.) BUCK observed the object without the use of optical instruments. [redacted] home is located in the vicinity of the junction of Maine highways 110 and 153 (43° 40' N, 71° 15' W). The weather was clear, with a few white fluffy clouds at high altitude. The sun was low in the sky - a normal good-weather sunset. There were no aircraft in the vicinity at the time. [redacted] twelve (12) year old son, [redacted], was interviewed. He gave substantially the same account as his father.

3. Mr. [redacted] appears to be approximately forty (40) years of age, apparently in good physical condition, and of average intelligence. He is the [redacted] superintendent of Newfield and is regarded as a respectable, quiet-living individual. [redacted] has been a voluntary skywatcher at Newfield since inauguration of the plan in April 1952. The Chief of the Newfield observer post, [redacted], has known [redacted] for approximately five (5) years and regards him as a thoroughly reliable person of unimpeachable character.

4. No physical evidence exists which might account for sighting and no interception action was undertaken.

ACTION:

Two (2) copies of this report have been forwarded to the Commanding General, Air Materiel Command, Wright-Patterson Air Force Base, Dayton, Ohio, Attention: MCIS. No further action is contemplated by this District Office.

SECTION D

22. In the following sketch, imagine your eye at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" to show where it was when you last saw it.

23. In the following sketch place an "A" at the position the object was when you first saw it, and a "B" at its position when you last saw it.

24. Draw a picture that will show the motion that the object made. Place an "A" at the beginning of its path and a "B" at the end of its path.

When first seen the objects seemed to be slowly drifting down parachute like then just slowly drifted to the southeast without losing altitude.

25. Draw a picture that will show the shape of the object. Label and include in your sketch any details of the object that you saw and place an arrow beside the drawing to show the direction the object was moving.

See question No. 17

Question 19-20

I do not feel qualified or able to state
a size or attitude and think that not stating it would
be better than a wild guess. Relatively speaking we
might call them a Softball, a Baseball, and a golf
ball.

If it were a choice between low, high, or
very high I would say high.

I called the local observation trying to
get the object reported from there without
success so made the call from here.
