National Airlines flight crew

FLYORPT submitted by Olmsted Flight Service Center 17 July (170948Z)

Crew of a scheduled airlines aircraft in flight observed an unidentified flying object, in the form of a ball of blue-white fire, near Washington, D. C. at 0300EST 13 July.

Object approached the observers aircraft, then maintained a parallel course, on the same level, at the same speed, until the aircraft pilot turned on all lights. Object then departed from the vicinity at an estimated 1000 MPH.

The aircraft crew are apparently thoroughly experienced in observation of and from aircraft. Weather was excellent for observation.

FRANK M. ALLEN
Lt Colonel, USAF
Intelligence Officer

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclusions at lower left. Begin text of report on AF Form 112-Part II.)

Mr. [REDACTED] of Memphis reports sighting the following unidentified flying object:

(1) The object was small, "like the wing light of an aircraft." Its color was orange. It appeared round in shape, glowed and made no noise and left no trail. The object travelled horizontally with the earth, and travelled much faster than a jet aircraft. It appeared to rise and fall rather than fly a straight path of flight, and disappeared as if over the horizon.

(2) Object was sighted at 2010 hours, 12 July 1952. It was observed for about three seconds.

(3) Observation was made visually from the ground.

(4) The observer was walking east on the Raleigh--Fraser Road ten miles north from the heart of Memphis. The object was travelling northwest, and the altitude appeared to be about 1,000 ft.

(5) The observer had no witnesses near him (see Comments). He is partner in the firm of [REDACTED] and [REDACTED] of Memphis. He appeared sincere and stated he was a former Air Force man and, therefore, believed his report might be of value to the Air Force.

(6) Weather was fair and still. Although the sun had set and the stars were visible, visibility was nearly unlimited.

(7), (8), (9) Not Applicable.

COMMENTS: What is believed to be the same object was sighted by TSG [REDACTED] of this office and [REDACTED] of the NAS at Millington, Tenn., at the approx. same time. The above description by [REDACTED] is accurate, with one exception. The object sighted from the Naval Air Station (about ten miles north of Lawson's location) appeared to be the color of a star, except it had a more definite round shape. Also the object appeared to slow down and drop a considerable distance, then accelerate and drop again. The brilliance varied and light seemed to fade when the object slowed down. The object was sighted for 5 or 7 seconds, appeared very distant and to be travelling at a very high rate of speed.

A simultaneous report was made by [REDACTED] of the Memphis Commercial Appeal. He and several people at Reelfoot Lake, near Dyersburg, Tenn., saw an object at the approx. same time pass overhead going west.

The factors related in the three individual sightings appear to coincide. Since distances of lighted objects are highly deceptive, it is quite possible all three reports are of the same object flying somewhere over the Tenn., Ky., line area. Although they reported the object at about 10,000 ft., it is possible all saw the same object but at a much higher altitude.

One oblong shaped yellowish lighted object with long trail was sighted by an F-86 pilot while on a scramble mission from O'Hare International Airport. Pilot chased object for twenty seconds during which time the object rapidly pulled away and disappeared. Sighting followed shortly by unusual radio transmission.

AIR INTELLIGENCE INFORMATION REPORT

| | | | | |
|------------------------|---------------|------|----|-------|
| FROM (Agency) | REPORT NO. | PAGE | OF | PAGES |
| HQ 4706TH DEFENSE WING | 4706 LW -3-52 | 1 | 2 | |

1. One oblong shaped yellowish lighted object was sighted by an F-86 pilot while on routine GCI mission. The edges of the object were "pretty distinct" however it was too dark to "see any metal or outline of the object itself." The object was followed by a trail or exhaust which was separated from the object, was one and a half times the object's length, and was the same color but of less intensity. The size was larger than a conventional fighter but smaller than a transport such as the C-54. No propulsion system was evident and no sound was heard. The speed was conservatively estimated as more than 700 Knots. The object flew out of sight travelling in a straight horizontal flight path. During this sighting the pilot was relaying pertinent information on object to GCI control. Shortly after conclusion of these transmissions, when all was quiet on "Foxtrot" channel, the word [REDACTED] was transmitted from an unknown source. The tone of this transmission was described as "ethereal" and "ghost-like." (CASEY is last name of pilot who made observation). Foxtrot channel (133.20mc) is monitored only by the 62nd FIS, O'Hare; GCI; and the 126th and 176th F.I. Squadrons at Travis AFB, Madison, Wisconsin in this immediate area. A check of these units revealed that the transmission did not originate with them and the two pilots concerned assumed that the transmission was related to the unusual object sighted. GCI sent the two aircraft to vicinity of Peoria, Illinois to investigate an unusual object sighted there by members of the Illinois National Guard. Negative sightings were made.

2. Time of sighting was 2104 CEST (0204Z 13 Jul) 12 Jul 52. Length of sighting was twenty (20) seconds.

3. The observation was made from an F-86 airborne at 18,000 feet to 19,000 feet. Observer's aircraft speed was near the maximum for F-86.

4. The observer had just leveled out of a right hand turn onto a heading of 200° and was over the town of Arlington, Ill. when he sighted the object. He immediately turned slightly to the right toward the object which appeared to be 15 miles south of Joliet, Ill. and the pilot put the F-86 to 100% power. The object was at an altitude of 22,000 feet and on a heading of 240° and was estimated to be about 20 miles from the observer at this time. During the next 20 seconds of stern chase the object rapidly pulled away.

5. The observer was [REDACTED] 62nd Fighter Interceptor Squadron, O'Hare Intl Aprt. who is a flight leader with a fighter tour in Europe during World War II and a tour in fighters in the Korean campaign. He is considered to be very experienced in fighter operations and usually reliable. His wingman during the sighting was [REDACTED] who did not see the object as he was flying close formation. [REDACTED] did hear the unusual voice transmission.

6. The weather at the time of the sighting was CAVU with the exception of a thin cirrus layer at 38,000 feet. There was a slight cooling in the lower layers and another at 14,000 feet however there was no temperature inversion at 22,000 feet.

Winds aloft:

| | | | | | |
|---------|------|----------|-----------|------|----------|
| 2000 ft | 180° | 15 Knots | 10,000 ft | 210° | 20 Knots |

UNCLASSIFIED

7. There is no activity or condition known which might account for this observation. [REDACTED] moved his head to various positions to eliminate the possibility of canopy reflections. Pilot also stated that it was not a balloon, searchlight or other known object. Pilot stated that object could have been a rocket device of some kind. Scientists at Adler Planetarium, Chicago were consulted and could offer no explanation.

The sun was not visible at the altitude of the sighting; the stars were not yet visible and the lights from the ground were very faint at this time.

8. There is no physical evidence of this sighting. No known photos were taken.

9. The F-86's chased the object for 20 seconds. The GCI unit was not operating properly at this time and had no radar contact with any aircraft.

10. There was no other air traffic in the area.

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112-Part II.)

At 1815 CST, on the 12th of July 1952, Bolster received a call from GAA (Chicago), that Mr. [redacted] Chicago, Illinois called GAA and reported that at 2015 CST he saw a greenish object traveling in horizontal flight. It came to a stand-still, then moved away at a very high rate of speed.

Mr. [redacted], Chicago, Illinois, saw the above happen at 2000 CST, and reported to GAA at Chicago.

The following information was received by teletype operator at King Commander (4700 Defense Wing):

-r. [redacted] sighted object going east and then turned westward. It was yellowish in color.

-r. [redacted] Illinois, [redacted] sighted object going north, weaving and at low altitude, then turn west, reddish in color.

-r. [redacted] Chicago, Illinois, [redacted] relates object going north and turned west, bright in color and was definitely not a jet type A/C.

Teletype operator says he received six (6) more calls, referred the calls to Intelligence Officer at King Headquarters, per request of Officer of the Day. This information was relayed to Cavalcade.

Peoria National Guard, Peoria, Illinois (no name available) reports object over Peoria traveling in a steep climb at very high speed. Object resembled a rocket, no further information.

Captain [redacted], pilot leader of Shantung Orange (62nd Fighter Squadron, O'Hare A.F.B., Chicago), while flying on local transition over Algin, Illinois reports he saw an object along side his ship at a distance. It had a long stream tail and appeared at various speeds. This lasted for approximately 10 seconds. The above flight was controlled by Captain Fredell in the vicinity of the reported objects, with negative results. Received call from Captain [redacted] pilot at 62nd Fighter Squadron, who reported object sighted at 22,000 feet and passed him from port to starboard, which lasted about 20 seconds. He doubts if it was reflection due to clouds below. Lt. Vallenburg, controller at Cavalcade (ALCC), was given complete story of above incidents.

Received a call from 31st Division through ALCC. They reported that Staff (A/AF-3), Ugin (AF-10), and Cousin (A/AF-3) picked up strange objects in [redacted] on heading of west and north, at several different altitudes, three thousand (3000) M.P.A. and above.

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112--Part II.)

Inclosed are nine (9) statements concerning an unidentified object observed 12th July 1952 at various places in the central United States. Two (2) other statements, those rendered by Lt Col E. E. Cockrum and Capt J. J. Dyer were chosen as representative of the information received by this section. Both officers were interviewed and the reports have previously been forwarded. Three (3) of the reports were airborne observations; however, the pilots are not physically available to the intelligence section of this base. The statements are forwarded as inclosures for action as deemed necessary.

While flying westbound (250 degrees) 25 minutes North of Dayton, Ohio at 6000 feet, I observed at 2105 hours CDST an object first presumed to be a "falling star". It traveled in an arc approximately 10 degrees above the horizon from the left to the right. It appeared to be traveling from SE to NW about 1500 to 2000 M.P.H. The intense brilliance of the object plus its abrupt disappearance leads me to believe it was not a meteorite or "falling star". If so, it behaved as I've never seen one do before.

At approximately 2105 DST I was sitting on the front porch at 11 Old Main Road, Chanute Gardens -- I was leaning back on my elbows watching the sky where a small light from a weather balloon had been observed about 10 minutes previously -- suddenly a brightly lighted object appeared directly above Hangar #1V, and stationary. It began to move almost immediately, to the right (west), and disappeared in approximately three (3) seconds. It was dark red in the center, with a orange tint around the edges. As it began to move, it accelerated at a tremendous rate, and appeared to slant up. There was a orange color trail behind the object as it accelerated, giving it the appearance of a comet.

Chanute Air Force Base
Rantoul, Illinois
12 July 1952

At approximately 2100, 12 July 1952, I sighted what appeared to me to be a "falling star", however, the object coming out of the southeast appeared to level out and continue on a course of northwest. It appeared, that, at the first where the object leveled off it became very bright and appeared as a ball of fire with a tapering tail. The object continued northwest at a very fast speed - the intensity of the flame became less and it appeared that the object started up in its course when I lost sight of it.

This all took place within a period of approximately 5 to 7 seconds. The apparent speed was constant throughout.

At 2100 hours I went out of Operations for a smoke and was sitting down, looking up at the stars, when all of a sudden a bright light appeared in a southeastern position of the sky. It appeared to go in a westerly direction at a great speed. I can't say if it disappeared or the light went out. I came into Operations and informed the A. O. of the incident, and also checked with the tower and they had not seen it. In my opinion I can't say what it might have been except a comet because the tail it had behind the object, and also the color of it, which was sort of orange around the outer surface and white in the center.

I was part of a group who were on the beach near Bridgman, Michigan around 2100 hours Saturday. Eight of us saw a bright light move rapidly from East to West in the southern sky. This spot of light looked rather like the spot made by a search light such as used by carnivals when the light hits low clouds. The path of this spot was nearly parallel to the horizon. After traveling roughly half way across the southern sky the light simply disappeared. There was some haze over the lake so that there was no definite outline to the spot and it probably appeared much larger than it actually was. I cannot say what its elevation above the horizon may have been - again because the true horizon was obscured by haze, but I would estimate this at about 20 degrees.

July 12, 1952

UNCLASSIFIED

To Whom It May Concern:

Subject: Unknown object observed by Captain George D. Keller

Ozark Airline's Flight 305 departed Chicago at 1930 CST. The flight was conducted at an altitude of 4000 feet MSL and in accordance with Visual Flight Rules. The crew consisted of Captain George D. Keller, First Officer R. Bullard and Stewardess C. Kluthe.

First Officer Bullard was flying the aircraft from the left seat; the undersigned was in the right seat. As the flight approached Buckley, Illinois, First Officer Bullard called my attention to an object moving at right angles to our course. The course of Flight 305 was 190 degrees magnetic. The object was from two to five degrees in an upward line to our line of vision; our aircraft being in level flight at the time it was observed and for the balance of the observation, which lasted for approximately fifteen seconds from the time it was called to my attention by the First Officer.

The object was in a definite horizontal line of flight traveling from the East, Southeast - to the West, Northwest. As the western horizon was still showing light from the sun, the object disappeared at about two o'clock level. The color was that of intense white, with a very small tail. My description as to the size would closely resemble that of jet observed at night on a ground run-up from 500 feet distance. The speed of the object was great. The total time observed by both the First Officer and myself was probably thirty to forty seconds as the First Officer said he watched it for sometime before he realized it was crossing our course and he did not know what he was looking at.

Sincerely yours,

/s/ George D. Keller
Captain George D. Keller

Ozark Air Lines, Inc.

P. S. The time the object was observed was 2004 CST.

Ozark Airline's Flight 305 departed Chicago at 1930 CST. The flight was conducted at an altitude of 4000 feet MSL and in accordance with Visual Flight Rules. The crew consisted of Captain George D. Keller, First Officer R. Bullard and Stewards C. Kluthe.

We were in level flight over Buckley, Illinois at an altitude of 4000 feet MSL with a heading of 190 degrees. I noticed a white hot light. At first I thought it was a reflection on the windshield. When I realized it wasn't a reflection, I called the Captain's attention to it.

The time I observed the light was about twenty seconds. It moved as far as I could tell from East to West across the nose of our airplane. As the light went to the West, it appeared to snuff out or disappear. While in view the object was horizontal to the ground. The time of this observation was about 2004 CST.

Sincerely yours,

/s/ Richard Bullard

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112—Part II.)

On 16th July 1952, Captain [REDACTED] rated pilot, Flying Safety Officer, 3345th Technical Training Wing, Chanute AFB, Ill., was interviewed in his office and stated in substance:

Captain [REDACTED] and his wife were at the golf range on the south edge of CHANUTE AFB, Ill. (40 18N - 88 08W) the evening of 12 July 1952. Captain [REDACTED] noticed an especially bright object in the sky directly south of the base and approximately 30 degrees above the horizon. The object moved westward to approximately 230 degrees before disappearing. The path of the object was parallel to the apparent horizon. The object, which was yellow in color, remained in view possibly five (5) seconds before vanishing abruptly. There was no apparent noise, exhaust flutter, or erratic movement. The time of the incident was exactly 2104 hours Daylight Time by Captain [REDACTED]'s watch. The sky was just becoming dark at the time, and some stars were to be seen. The atmosphere was clear. Captain [REDACTED]'s statement and sketch of the object is attached as an inclosure.

While my wife, [REDACTED], and I were walking across the Chanute Air Force Base golf driving range, I noticed a bright light in the sky to the south and about thirty degrees above the horizon. I thought it was a meteor and I called to my wife to look up and I checked the time as 2104 CDT on my watch. The light assumed a spherical shape with a tail like a teardrop as it moved in a northwesterly direction in a straight trajectory parallel to the apparent horizon. The color of the light was slightly yellow, similar to a sixty watt incandescent mazda lightbulb, against the faded blue sky of dusk. Stars were just becoming visible and I was amazed as the comet like object moved through about fifty degrees of arc in about five seconds before being lost from sight.

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112-Part II.)

On 14th of July 1952, Lt Col [REDACTED], Director, Department of Advance Aircraft Maintenance, 3345th Technical Training Wing, Chanute Air Force Base, Illinois was interviewed in his office and stated in substances:

Major and Mrs [REDACTED] Major [REDACTED]'s mother and Colonel [REDACTED] and his wife were standing at the rear of Colonel [REDACTED] quarters, building P-103A, CHANUTE AFB, Illinois on the evening of 12 July 1952. At approximately 2100 hours Daylight Time they noticed a light in the sky to the south of CHANUTE AFB. The object first appeared at approximately 170 degrees compass heading from CHANUTE AFB and moved westward to approximately 200 degrees before disappearing. When first sighted the object was judged to be 20 degrees above the horizon, traveling in a straight path. At the time of its disappearance a few seconds later it had obtained a position approximately 25 degrees above the horizon. The object was yellow in color and seemed to be of a burning nature. It was similar to a ball in shape and between 5 - 10 times the diameter of the planet Venus, as seen from the earth. It had a straight fiery tail extending about 3 - 4 times the diameter of the ball. The object seemed to disappear as if in a continuing process, beginning with the tail and progressing towards the ball until all had vanished. There were no apparent oscillating, fluttering or erratic motions to be observed. No sound was heard. The narrative statement and sketch by Colonel COCKRUM are attached as inclosures.

UNCLASSIFIED July 1952

SUBJ CT: Unidentified Aerial Object

TO: Wing Intelligence Officer
3345th Technical Training Wing
Chamute Air Force Base, Illinois

On the evening of 12 July 1952, Major [REDACTED], his wife and mother, my wife and myself were in the yard behind my quarters, building P 1032, Chamute Air Force Base, Illinois. At approximately 2100 hours we noticed an unidentified object in the sky to the south of the base. The object appeared at a point approximately 20 degrees above the horizon and about 170 degrees compass heading from Chamute AFB. It was moving in a westward direction and at the time of its disappearance a few seconds later it had moved to approximately 25 degrees above the horizon and to 200 degrees compass setting from the base. The object was a brilliant yellow color as if burning. It was ball shaped and had a tail approximately 3 to 5 times as long as the diameter of the ball. The object disappeared from view gradually; at first the tail and then the ball. There was no sound noticeable, nor did the object oscillate or flutter in motion.

1. The following information was received by this office from Headquarters Camp Atterbury, Indiana:

"A Mr. [REDACTED], Greenwood, Indiana, contacted Headquarters Camp Atterbury on 13 July 1952, and stated in substance: 'At dusk about 2030 hours, 12 July 1952, we were sitting in our car on ramp 6 at the Greenwood Drive-in-Theater on U.S. Highway 31. We were sitting just to the right of the screen. I was sitting in the car with my wife. To our left we saw an orange flame-bright light at about 4,000 feet. The object descended to about 2,000 feet and passed about 1 foot above the screen in line across same. I judge its speed to have been somewhere between 900 and 1,500 m.p.h. These observations are based on my experience of eight years as a pointer on five-inch Naval Surface or AA guns. Other witnesses who saw this phenomenon are Mr. [REDACTED] Greenwood, Indiana, and Mr. [REDACTED] Indianapolis.'"

"The above information in regard to time, appearance, and speed has been confirmed by military and civilian personnel stationed at Camp Atterbury, who observed the phenomenon as far south as Columbus, Indiana. The only variation in reports noticeable is the fact that some sources describe the object's color as being yellow, while others describe it as being red."

2. This office contemplates no further action in this matter.

Military and civilian observers

Teletype FLXOSRPT submitted by Wright-Patterson Flight Service Center 130325Z July

Numerous reports of sighting of unidentified object(s) on the night of 12 July were received by Wright-Patterson Flight Service Center. Reports appear to indicate a meteor or comet type object, travelling parallel to the surface at a very high speed (but too slow for an actual meteor), on a Northwest course from the Indianapolis to the Chicago area, at approximately 7,000 to 10,000 feet altitude. Reports are not verified, other than by each other, and reporting witnesses are unknown, except by employment, but accounts are believed to be reasonably reliable.

Observatory records have not been examined for evidence of meteor or comet type phenomenon which might have caused the reports.

1. One or more unidentified flying objects were sighted by observers in Indiana, Illinois, and Eastern Missouri on the night of 12 July 1952. Object(s) was (were) described as similar to a meteor, but moving horizontally at a speed too slow for meteor type phenomena. Altitude variously estimated 7,000 to 10,000, course apparently Northwest to West.

2. Reports, as received by Wright-Patterson Flight Service Center, follow:

a. Mrs. [REDACTED], who lives one mile East of Attarbury Air Force Base, Columbus, Indiana, saw an object moving Northwest which flew too long to be a meteor. (From Attarbury AFB tower at 2120CST)

b. Three people in the airport control tower of Weir Cook Airport, Indianapolis, Indiana observed (with field glasses) a bright white light with a long glowing tail, travelling at a very high speed, 15 to 20 degrees above the horizon, 20 miles West of their position. The trailing tail of fire was a white light with a reddish tint, while the rest of the object was white. The object was moving on a course of 300° and covered a 30° arc in five seconds. (From Indianapolis tower 2005CST)

c. Captain [REDACTED] and First Officer [REDACTED], flight crew of American Airlines Flight 395 (Convair), while in the vicinity of Greenfield, Indiana at 2105CST, saw an object heading 300°, approximately parallel to them. It seemed to head down 15°, the fire went out and disappeared. The pilot said object was not a meteor, as it travelled too slowly. (Report received 2125CST)

d. [REDACTED], pilot of Cessna N1777V, was flying a heading of 220°, altitude 1600 feet, 15 miles Northeast of Indianapolis, at 2005CST, when he saw an object about 60° to 70° above him on an angle of elevation. Object was moving Southeast to Northwest on a heading of approximately 310°. Object was streaming fire and dropping fire. In about six seconds the object travelled in a 90° arc in front of the aircraft. The light then diminished, but a black object remained visible. Estimated altitude of the object 10,000 feet. (From Cincinnati ARTC 2121CST)

e. Eastern Airlines Flight 177 (Pilot [REDACTED]) was in the vicinity of Remsualear, Indiana at 2005CST. Pilot sighted an object at an estimated altitude of 6,000 to 7,000 feet. Object was very bright, and was off his right wing 90°. The EAL flight was headed in a Southeasterly direction, and the object was heading Northwesterly. No visible shape. Seemed to be flying in an almost level trajectory. Pilot was sure that it was not a meteor or falling star, since he has seen many of these in his years of flying. Type aircraft DC-3. (From Cincinnati ARTC 2122CST)

f. An amateur astronomer called St. Louis Naval Air Station and advised that he had sighted an object at an angle of elevation of about 30°. A TWA Constellation, which was in the landing traffic pattern for Lambert Field, St. Louis, Missouri, advised that an object had been sighted at an estimated altitude of 7,500 feet. Reporting personnel were not further identified. (From St. Louis Naval Air Station 2055CST)

g. Captain [REDACTED] saw a white object with a long white tail moving horizontally in a Northwesterly direction on about a 45° to 50° bearing from Scott Air Force Base, Belleville, Illinois. He watched it for about 5 or 10 seconds. The light diminished, as if it went out of sight slowly. It did not appear to burn out. The Airdrome Officer in the Scott AFB tower said that the elevation appeared to be about 25°. (Report received 2105CST)

h. Lieutenant [REDACTED], GCA Controller at Lambert Field, St. Louis, Missouri, saw an object at 2103CST. It appeared like a comet (Ball of fire), at about 10,000

3

4

UNCLASSIFIED

feet, travelling horizontally. He observed it for about 10 or 15 seconds. It was headed West, and seemed to dim out and disappear. (Report received 2115CST)

i. The National Guard was having an open-air meeting at Peoria, Illinois, when they sighted what appeared to be the tail end of a rocket heading almost straight up. (From Peoria tower 2050CST)

j. At approximately 2010CST, several members of the [redacted] family [redacted] [redacted], Chicago, Illinois) reported a greenish streak go by at a terrific speed, headed in a Westerly direction. The object passed very close to the Stag Beer advertising blimp. (Reported to Chicago ARTC at 2015CST)

k. Mr. [redacted], a postal employee living at the corner of [redacted] and [redacted], saw what appeared to be a shooting star with a one hundred foot tail, travelling horizontally, headed West. Sighted at 2008CST, and was visible for ten seconds. Estimated altitude 14,000 feet. (Reported to Chicago ARTC at 2030CST)

2. Weather was reported as follows for the areas and times of sightings:

a. Indianapolis area - Sky clear, visibility more than 15 miles. Winds aloft from 140° at 20 knots.

b. St. Louis area - Sky clear, visibility 12 miles. Winds aloft from 150° at 15 knots.

c. Chicago area - Thin scattered clouds at 25,000 feet, visibility 15 miles. Winds aloft from 190° at 20 knots.

3. No meteorological or other activity which might explain the sightings is known. No physical evidence of the object(s) has been reported. No attempt at interception or identification has been reported. No aircraft reported in the general area at the time of any sighting, other than the aircraft involved.

Comments of the Preparing Officer:

1. While all times were either reported in Central Standard Time, or converted to CST, it is believed that misunderstanding, as to whether original report was rendered in Standard or Daylight-Saving Time, may exist. It is apparent that all sightings were approximately on the hour, either 2000CST or 2100CST. With this adjustment, all reports may indicate sighting of the same object. This theory may be substantiated, as follows:

a. All reports above indicate that the object was moving Northwest (or in a Westerly direction, which could have been approximately Northwest). Sighting points are oriented in a North-northwest line, except for the St. Louis and Peoria areas (Columbus, Indianapolis, Bensalem, and Chicago). Scott AF Base report further indicates a sighting bearing of 45° to 50°, or in the direction of Bensalem. No direction is indicated for one Lambert Field sighting, except 30° elevation, which corresponds to the 45° sighting bearing (Elevation about 25°) from Scott AFB. The Peoria sighting fails to indicate any direction.

b. Three of the reports (Two of them by experienced pilots) indicate that the object moved too slowly for a meteor. Six of the reports indicate a comet or meteor like appearance, travelling approximately parallel to the surface.

c. Two reports appear to indicate that the object burned itself out, this disappearing, while two other reports definitely indicate that the object merely travelled

UNCLASSIFIED

July 12, 1952

To: Person It May Concern:

Subject: Unknown object observed by First Officer [REDACTED]

Ozark Airline's Flight 903 departed Chicago at 1930 CST. The flight was conducted at an altitude of 1000 feet MSL and in accordance with Visual Flight Rules. The crew consisted of Captain George [REDACTED], First Officer [REDACTED] and [REDACTED].

AF483288

We were in level flight over Jockley, Illinois at an altitude of 1000 feet MSL with a heading of 190 degrees. I noticed a white hot light. At first I thought it was a reflection of the windshield. When I realized it wasn't a reflection, I called the Captain's attention to it.

The time I observed the light was about twenty seconds. It moved as far as I could tell from East to West across the nose of our airplane. As the light went to the West, it appeared to "bluff" out or disappear. While in view the object was horizontal to the ground. The time of this observation was about 2000 CST.

Sincerely yours,

Ozark Air Lines, Inc

Subject: Unknown object observed by Captain [REDACTED]

AF483288

Ozark Airline's Flight 305 departed Chicago at 1930 CST. The flight was conducted at an altitude of 4000 feet MSL and in accordance with Visual Flight Rules. The crew consisted of Captain George [REDACTED] First Officer [REDACTED] and [REDACTED]

First Officer [REDACTED] was flying the aircraft from the left seat; the undersigned was in the right seat. As the flight approached Bucklev, Illinois, First Officer [REDACTED] called my attention to an object moving at right angles to our course. The course of Flight 305 was 190 degrees magnetic. The object was from two to five degrees in an upward line to our line of vision; our aircraft being in level flight at the time it was observed and for the balance of the observation, which lasted for approximately fifteen seconds from the time it was called to my attention by the First Officer.

The object was in a definite horizontal line of flight traveling from the East, Southeast - to the West, Northwest. As the western horizon was still showing light from the sun, the object disappeared at about two o'clock level. The color was that of intense white, with a very small tail. My description as to the size would closely resemble that of jet observed at night on a ground runway from 500 feet distance. The speed of the object was great. The total time observed by both the First Officer and myself was probably thirty to forty seconds as the First Officer said he watched it for some time before he realized it was crossing our course and he did not know what he was looking at.

Sincerely yours,

[REDACTED]
Ozark Air Lines, Inc.
Lambert Field, St Louis, Miss

P. S. The time the object was observed was 2007 CST.

I was part of a group who were on the beach near Bridgman, Michigan around 2100 hours Saturday. Eight of us saw a bright light move rapidly from East to West in the southern sky. This spot of light looked rather like the spot made by a search light such as used by carnivals when the light hits low clouds. The path of this spot was nearly parallel to the horizon. After traveling roughly half way across the southern sky the light simply disappeared. There was some haze over the lake so that there was no definite outline to the spot and it probably appeared much larger than it actually was. I cannot say what its elevation above the horizon may have been - again because the true horizon was obscured by haze. but I would estimate this at about 20 degrees.

12 July 1952

UNCLASSIFIED

AF 483288

While flying westbound (250 degrees) 25 minutes North of Dayton, Ohio at 6000 feet, I observed at 2105 hours UDSI an object first presumed to be a "falling star". It traveled in an arc approximately 10 degrees above the horizon from the left to the right. It appeared to be traveling from SE to NW about 1500 to 2000 M.P.H. The intense brilliance of the object plus its abrupt disappearance leads me to believe it was not a meteorite or "falling star". If so, it behaved as I've never seen one do before.

Camp Atterbury, Ind.

Air Technical Intelligence Command
Wright-Patterson Air Force Base
Dayton, Ohio

Sirs;

No doubt the officials of Project Blue Book already have reports of an aerial object seen in the vicinity of Indianapolis, Ind. on the night of 12 July, 1952. My wife, my son, and I all saw the object and feel it is our duty to report as much. In view of the fact that we saw the object through the windshield of our car and it was at night, I know our senses of depth preception were not so good. The following is an account of the incident as I saw it;

On the night of July 12, 1952, my family and I were attending a movie at the Greenwood Drive-in Theater in Greenwood, Ind. At 2105 hours, we saw the object streak across the sky to the west of us and going in a north-westerly dirrection. It looked larger than the largest stars and two or three times brighter. It seemed round in shape. There appeared to be a very slight glowing tail or exhaust. It seemed to move in a straight line and at a constant altitude, moving the distance from I first observed it until it went out of sight in about four seconds. Its intensity seemed to fade as it moved further away. My estimation of speed and altitude are just poor guesses, but it seemed to me that it was at an altitude of from ten to twelve thousand feet and moving at least fifteen hundred miles per hour

It is queit possible that this object was meter or fireworks, but it is like none I have ever seen. I could hear no planes in the area at the time, neither could I hear any sound from the object. I hope this has already been explained, if not I hope you can explain it.

Respectfully

[REDACTED]
1st Lt. Arty
U. S. Army

1. Date object was observed 12 July 1952

2. Time object was first seen ~~2100~~ 2105

3. Place from which you observed the object ~~1225~~ Indianapolis (North Side)

4. How was object observed (naked eye, binoculars, etc.) Naked eye

5. What were you doing when the object was first observed? Talking with group of three (3) other persons, outdoors.

6. What attracted your attention to the object? Bright light in sky.

7. Path of object.

a. Direction from which object appeared (degrees or direction) From south

b. Direction in which object disappeared (degrees or direction) North to northwest.

c. Elevation object appeared (degrees above horizon) Est. altitude during flight 500' to 1000'

d. Elevation object disappeared (degrees above horizon) —

e. Shape of flight path of object (straight and level, arched, etc.) Straight path and constant altitude

f. How did object disappear (grow dimmer, go out suddenly, etc.) Disappeared in distance

8. Length of time the object was observed Approximately 3 mins.

9. Description of object.

a. How many objects were seen? One (1)

b. Apparent size of object? —

- c. Apparent speed of object? 200 mph.
- d. Apparent altitude of object? 300'-1000'
- e. Shape of object? Globular with tail (fuzzy)
- f. Color of object? White
- g. Did object perform any maneuvers, if so describe Flaw straight
and level.
- h. Did object make any sound, if so describe ?
- i. Were any tails or trails seen? Yes - as above
- j. Draw sketch.

10. What type of day was it (hazy, clear, etc.)? Describe. Night

11. Clouds.

a. Were any clouds in sky at time of observation?

If so, how much of sky was covered (overcast, scattered, etc.)

b. Did object pass above, below, or near any clouds?

c. Did object reflect light on the clouds?

12. What is your occupation? ~~Former~~ Rated pilot.

13. Any details that cannot be fully explained by the above questions.

Arnold Mo. Aug.17, 1964

Project Blue Book Info. Officer
Pentagon, Wash. D.C.

My Dear Sir;

First let me thank you for sending me the
bulletin on U.F.O.'s. ---It is very interesting.

This letter is intended as a commentary on
the accompanying notes and diagrams which (I hope) are pre-
sented in such a manner as to be lucid and self explanatory.

I am 47 years old ,male, and belong to no group
engaged in promoting the "flying saucer" either commercially
or otherwise,---my interest in this subject is purely object-
ive, I feel it the duty of all of us to help and not hinder
you Air Force gentlemen in your search for an answer to this
perplexing and highly controversial subject.

Prior to the enclosed sightings,I had no preconciev-
ed notions on UFO's,although like millions of other people
I was very much aware,due to the news media,of their exist-
ence.

The first sighting (Aug.28,1948) took place while my
wife and myself were residing on a small farm in the vicini-
ty of the hamlet of Beck,Mo. about 12 miles south of the
city of St. Louis on U.S.highway 61.---- the second occ-
urred in the same vicinity although we had,in the interim,
sold our farm and moved to a new location about 2 miles re-
moved.

In 1952 I submitted a report of the enclosed phenom-
enon to an organization in L.A. Cal. calling itself "Civilian
Saucer Investigations"---they acknoweledged my communication
and thanked me for same,but this has never satisfied me----
I want to make sure that this information reposes in Air
Force hands where it rightfully belongs. (I did not submit
the July 12 '52 sighting to C.S.I.,as it had not occurred at
that time).Since the foregoing experiences,I have,I think quite
naturally,been prompted to read everything of a reliable na-
ture concerning U.F.O.'s that comes my way,and the following
are a few personal conclusions I have drawn that you may (or
may not)be interested in sharing.

A. It is my belief that so called "flying Saucer"
and associated phenomena are not something that have made
their advent in the last decade (more or less) but are ,and
have been,indigenous with man for an extended period of
time.

B.Ifurther believe that these "objects" are capable
of materializing and dematerializing inatananeously and at
will.

C. That,though they may be entirely capable of inter-
planetary flight,they are not necessarily "space ships".

over,please

D. That, though giving back radar reflections, they are not "solid" in the accepted sense, but are more in the nature of "living energy"

E. I will pause here while you finish laughing, although I am not intending any levity-----

In conclusion let me say that I think that these "things" can and have caused aircraft to crash, picture the following---- a commercial airliner, or any aircraft, is making its final approach---everything normal---flaps down, throttles back, (just routine procedure) suddenly dead ahead, closing on collision course, a "fiery object" ---Your reaction anyones reaction? ---jerk the nose up, or down, --hard over ----not any time for messages---no time for anything ----result? --just another unfortunate and unaccountable aircraft disaster.

I hope I have not bored you too much, --

Sincerely and respectfully yours

P.S.

Would you be so kind as to let me know if you receive this report--I am not seeking any publicity, but I have put considerable effort into this writing and I would like to know that it got into the right hands. ----also, you may use this information as you may see fit.

Dear Mr. ~~REDACTED~~

This is again in reference to an Unidentified Flying Object report you forwarded to this Headquarters for an evaluation by our Project Blue Book Office.

The information presented in the completed form FTD 164, which you recently furnished us, indicates that the object you sighted passed through at least 60° in 4 seconds, and your description was characteristic of a meteor. The case is now in Air Force files with that evaluation (meteor).

Sincerely,

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

11th July 1952
Day Month Year

2. Time of day: about 3 A.M.
Hour Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other

(Circle One): a. Daylight Saving - I think
b. Standard

4. Where were you when you saw the object?

10 miles North and a little West of Little Fort, British Columbia, Canada
Nearest Postal Address City or Town State or County

5. How long was object in sight? (Total Duration)

— — 4 estimate
Hours Minutes Seconds

a. Certain

b. Fairly certain

c. Not very sure

d. Just a guess

5.1 How was time in sight determined? carefully considered estimate

5.2 Was object in sight continuously? Yes ☒ No ☐

6. What was the condition of the sky?

DAY
a. Bright
b. Cloudy

NIGHT
a. Bright ☒
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right

d. To your left
e. Overhead
f. Don't remember

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
b. A few
c. Many
d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight moon half full
b. Dull moonlight
c. No moonlight - pitch dark
d. Don't remember

moon half full

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- much **a. Brighter**
b. Dimmer
- c. About the same
d. Don't know

11.1 Compare brightness to some common object:

brighter than a brilliant white modern street light.

12. The edges of the object were:

(Circle One): a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember

e. Other _____

13. Did the object:

(Circle One for each question)

- a. Appear to stand still at any time?
- b. Suddenly speed up and rush away at any time?
- c. Break up into parts or explode?
- d. Give off smoke?
- e. Change brightness?
- f. Change shape?
- g. Flash or flicker?
- h. Disappear and reappear?

Yes

14. Did the object disappear while you were watching it? If so, how?
 behind some hills

~~It~~ Yes, apparently

15. Did the object move behind something at any time, particularly a cloud? no

(Circle One): Yes No Don't Know.
 it moved behind: some hills probably,

IF you answered YES, then tell what

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No Don't Know.
 in front of: _____

IF you answered YES, then tell what

17. Tell in a few words the following things about the object:

a. Sound none

b. Color brilliant white or blue-white

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

It was about twice (or a little more) the apparent diameter of the moon. I considered this carefully at the time, as I realized I must report the sighting.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

→
 direction of flight

No sound, exhaust, or vapor trail.

20. Do you think you can estimate the speed of the object?

(Circle One)

Yes

No

IF you answered YES, then what speed would you estimate? very fast.

21. Do you think you can estimate how far away from you the object was?

(Circle One)

Yes

No

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building

b. In a car

c. Outdoors

d. In an airplane (type)

e. At sea

f. Other _____

23. Were you (Circle One)

a. In the business section of a city?

b. In the residential section of a city?

c. In open countryside? ☒

d. Near an airfield?

e. Flying over a city?

f. Flying over open country?

g. Other On the shore of a remote mountain lake

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

Yes

No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

No

b. Sun glasses

Yes

No

c. Windshield

Yes

No

d. Window glass

Yes

No

e. Binoculars

Yes

No

f. Telescope

Yes

No

g. Theodolite

Yes

No

h. Other _____

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

There is no "common object" with which to compare it.

It's appearance was as it would be if it were made of clear plastic with a brilliant white light inside.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

A ————— B

29. IF there was MORE THAN ONE object, then how many were there? only one.
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No.

31. Was anyone else with you at the time you saw the object? (Circle One)

Yes

No

31.1 IF you answered YES, did they see the object too? (Circle One)

Yes

No

31.2 Please list their names and addresses:

Dear Sirs:

I wish to report having seen a "flying Saucer". Let me say first that no-one could have been more skeptical than I about the existence of these objects. The circumstances were these.

I was on a vacation camped on a small lake called Rock Island Lake which is near Taweel Lake about eighty miles north of Kamloops, British Columbia. About three o'clock in the morning on Friday, July 11th I could not sleep so got up and went down to the lakeside. It was dark and I could just see the outline of trees against the sky. The sky was perfectly clear and the moon about half full and at a height of about forty degrees above the horizon.

Suddenly under the moon and at a height about halfway between the moon and the horizon my eyes caught this light, which traveled from east to west perfectly horizontally and was in sight for about four seconds. I had no way to judge its distance so could not estimate size or speed except that it seemed very fast. Its apparent size was about twice the diameter of the moon. When it disappeared I cannot be sure whether it went behind the hills or whether its light went out, probably the former. Its size seems to me to have remained apparently the same during the time it was in sight.

Its appearance was as if it were made of clear plastic containing a brilliant white light. The main body was a disk the thickness of which was about one-sixth of its diameter. At the rear was a blunt rounded nose about the shape of the nose of a revolver bullet. There was no sound and no trail of exhaust or sparks. Below is a sketch of its appearance as well as I can draw it.

For two days afterward I tried to convince myself that this was a reflection or could be accounted for by some normal means but have been unable to do so. My thinking changed in four seconds from an attitude of almost complete disbelief to one of firm conviction that this thing exists and that I saw it.

Yours sincerely,

Dear Sir:

I have filled out the questionnaire sent me on August 18th and am returning it herewith.

I am also enclosing a copy of my first letter reporting this sighting. After twelve years I have no reason to change any part of this letter except for two minor corrections which I have noted.

I still recall with amusement some carefully disguised questions in the original questionnaire which asked in effect if you had been drinking before the sighting. My reply was that I hadn't been drinking before, but that I sure went up to the cabin and took a good stiff one afterward.

I was considerably "shook up", and still am whenever I think about it.

My interest in this matter has not been renewed, and I will be glad to have any further information you may be able to give me.

Yours sincerely,

Cap't. Hector Quintanilla, Jr.,
Wright-Patterson Air Force Base,
Dayton, Ohio.

Dear Sir,

In a recent newspaper article was a discussion of the research on the "flying saucer", which stated that there are 910 unsolved cases. About twelve years ago I reported a sighting and I am of the opinion that mine is probably one of the 910.

I think I made one error in my report. I believe I said that the "saucer" was moving from east to west. I know my directions better now, and it was moving from northeast to southwest, or possibly from NNE to SSW.

I still know that I saw something, and still haven't the slightest idea what it was. I have tried to convince myself that it was a reflection of car headlights on some layer in the atmosphere, but there is no road closer than four miles so this theory doesn't hold up.

My guess now is that it is some natural electrical phenomenon which we know nothing about, possibly associated with superheated air.

I did not keep a copy of my report, would it be possible for me to get a copy of it and check it over?

Yours sincerely,

July 24, 1964

Dear Mr. [REDACTED]

This is in reply to your letter of July 9, 1964, in which you request information on an unidentified flying object you reported to the Air Force.

In order to locate this report it is necessary to have additional information from you. Would you please forward the date and location of your sighting.

Upon receipt of this information, we will attempt to locate the report and to advise you of our evaluation.

Sincerely,

MASTON M. JACKS

LONGVIEW, WASHINGTON

July 9, '64

Cap't. Hector Quintanilla, Jr.,
Wright-Patterson Air Force Base,
Dayton, Ohio.

Dear Sir,

In a recent newspaper article was a discussion of the research on the "flying saucer", which stated that there are 910 unsolved cases. About twelve years ago I reported a sighting and I am of the opinion that mine is probably one of the 910.

I think I made one error in my report. I believe I said that the "saucer" was moving from east to west. I know my directions better now, and it was moving from northeast to southwest, or possibly from NNE to SSW.

I still know that I saw something, and still haven't the slightest idea what it was. I have tried to convince myself that it was a reflection of car headlights on some layer in the atmosphere, but there is no road closer than four miles so this theory doesn't hold up.

My guess now is that it is some natural electrical phenomenon which we know nothing about, possibly associated with superheated air.

I did not keep a copy of my report, would it be possible for me to get a copy of it and check it over?

Yours sincerely,

TDEW

Dear Mr. [REDACTED]

We have received your letter of August 7, 1964, with the exact description of the date of your sighting and the correspondence pertaining thereto. We have not, however, been able to locate the questionnaire nor have we a record of your sighting by the date of July 11, 1952.

We are therefore inclosing another questionnaire and request that you once more complete the questions and return the questionnaire to this office. Upon its receipt we will again attempt an evaluation of your sighting.

Sincerely,

LONGVIEW, WASHINGTON

August 7, '64

Major Maston M. Jacks,
Dep't. of the Air Force,
Washington, D. C.

Dear Sir:

Referring to your letter of July 24th. The sighting of the "unidentified flying object" was on July 11th, 1952. My first letter was written July 23d, 1952. The letter sending me the questionnaire was dated August 20th, 1952, and the questionnaire was returned a few days later.

The location was at a lake (Rock Island Lake) about seventy miles north and a little west of Kamloops, British Columbia.

I have a fishing cabin on this lake and go there every year. It is interesting to me to realize that twelve years later I still know that I saw something and still haven't the slightest idea what it was.

Yours sincerely,

[REDACTED]

UFO Sightings (M [REDACTED])

4 Sep 64

Hq USAF SAFOI PB (Mrs Gaiser)
Wash D C 20330

1. We are in receipt of two reports from Mr [REDACTED] in a letter dated 17 August 1964.
2. The observation of 12 July 1952 did not contain the duration of the sighting. It did indicate that the object was traveling 35 - 40 mph and was 10-15 feet long. No mention as to how the speed and size was estimated is made. The object was at an approximate altitude of 100 feet and only 300 feet from the witnesses. He did not indicate that sound accompanied the motion of the object. The description indicates a meteor or jet aircraft with afterburner. However, both of these objects would be ruled out due to the close proximity of the objects to the observer and the slow speed of 35 - 40 mph.
3. It is suggested that an FTD Form 164 be forwarded to Mr Moore should he desire an evaluation. We are unable to explain this observation on the data presented.
4. Regarding the sighting of 28 August 1948 we are again at a loss to offer any explanation. The object appeared below and behind trees and a telephone pole. Its motion cannot be correlated with conventional objects. The duration of the observation of 10 - 12 seconds and the speed of 10 - 12 mph seems inconsistent. The description of this sighting contained the basic data required for evaluation. We are unable to offer an explanation. Since the sighting is sixteen years old it is not feasible to conduct an investigation into the case. Mr [REDACTED] should be given a note of appreciation for reporting the observations to the Air Force.

Perhaps you may think me guilty of excessive comment, but here is another thought that occurs to me in connection with this sighting--

This U.F.O. presented many of the aspects of a 2 dimensional "projection";---we are all familiar with the manner in which a departing aircraft reaches a point where it presents a "minimum silhouette";----after the U.F.O. made the 90 degree turn and proceeded east, it "went out like a light" at about the point where it should have presented its "minimum silhouette".

It quite naturally follows that if it were 2 dimensional, it would show no silhouette.

Aug. 28, 1948 sighting.

Instantaneously and simultaneously with full 90 degree turn U.F.O. "divides" into 3 identical "spheres" being attached to one another by tenuous, silvery strings of light.

What I have not shown in diagram is, at precise time of metamorphosis, "object" pivots on original "globe" into new course and proceeds on new heading almost due East, and after proceeding app. 100 feet, just "goes out" like switching off a light. This phenomenon was observed at very close range (never more than 60 to 70 ft.) in very minute detail, by Mr. & Mrs. [REDACTED] and Mrs. [REDACTED], on Aug. 28, 1948 --- weather conditions at time, etc....

time---8:30 P.M. (give or take a few minutes)

sky conditions.....beautiful summer evening, no clouds, no planes in vicinity. no outside distractions to disturb or confuse observation.---absolutely no sound of any nature was audible in connection with this U.F.O.

app. duration of observation, -10-12 seconds. I might add that there was no appreciable "wind" stirring at time and temp. was normal to vicinity at season of year.

tail completely detached, solid silvery, iridescent white---sating motion.

U.F.O. first observed completely stationary.

original U.F.O. "globe" app. ten to twelve inch diameter. Presented only thin silvery "rim" outline not solid white---evening sky visible thru center (same applies to more complex structure after metamorphosis.)

Path of original U.F.O. (greatly shortened for reasons of space. "globe" travelled app. 80-90 ft. to point of 90 degree turn, and at estimated speed of app. 10-12 M.P.H. --- This "diagram" is presented from the perspective of observer looking almost directly "up" at U.F.O. at tree-top level, overhead.

(see other side)

(How long original "glob U.F.O. had been adjacent to utility pole prior to discovery, I have no way of knowing,--upon discovery however, it remained stationary for a period of approx. 2 seconds before starting to move.

Also, after original "globe" "divided" into three, there seemed to be some diminution in size "globes" relative to parent sphere. 'of'

The scene of sighting is five eights of one mile off U.S. highway 6I, and was not subject to any traffic noises nor any form of distractions.

In both of these instances we observers were outdoors seated on lawn chairs.

You may ask---"how do you know UFO was small and close up,--when it may have been large and far away?" I have anticipated this and my answer is this---the clarity of fine detail;--the quivering, pulsating motion of the "tail" ---the tree top transformation;--you may rest assured of its proximity.

I hope you do not find this redundant,--I am just endeavoring to be as complete in my report as is in keeping with the facts and nothing more.

TO WHOM IT MAY CONCERN

I am well aware of the fact that the personal "opinions" and "theories" of observers of these various phenomena are neither solicited nor appreciated, but I feel it my duty to give my personal impressions of this "manifestation" ---to wit--

I had the distinct feeling that we, the viewers, were the objects of "observation", and not the other way around.

That this "object" was not "solid" in the accepted sense, I feel certain ----rather, it seemed to be living, sentient energy displaying intelligence and even (at least I seemed to sense) a wry sense of humor. ----If not to awe we yokels, why the blatant and open display complete with weird transfiguration? -- -I felt it was "laughing at us"

I have presented the facts in the foregoing to the best of my ability and with no exaggeration, and also with no deliberate intent to mislead or deceive.

We all know that the practice of deception and quackery is what makes the word of honest folks subject to doubt, so please accept this in the spirit with which it is submitted-----in the interest of scientific truth.

July 23, 1964

Project Bluebook.

To whom it may concern.

Gentlemen.

I suppose the recent press release concerning "Flying Saucers" (an unfortunate comic opera misnomer) will cause a flood of mail from the "lunatic fringe" and I may be filed under this category for all I know. Be that as it may, if you are looking for facts, and not belly laughs or names to add to your honey list, then send someone to talk to me.

What I saw, practically at arms length, while in the company of 2 other sane and prosaic people, I am sure you would find highly interesting and may aid you in your evaluation of V.F.O.'s

My main experience did not occur recently - it was on the 28th of August 1948, but it remains as vivid in the minds of us who observed it as if it happened only yesterday.

Please, - will you for Christ's sake place credence in what people of good faith are reporting. I am not some kind of nut, looking for publicity or remuneration either to add to my ego or bank roll.

I live fairly close to Scott A. F. B. on the Missouri side and my phone number is Hobart-7-5193 - perhaps I could be contacted by some one from there and arrange to tell them my experience. - I could give them detailed information on how to reach my home at a time convenient to us both.

To be perfectly candid, we both know that the old hack-neged term "temperature

"invasion", "movers Jupiter",
"Venus in Transit" and all
the other lame explanations
just will not hold water;
there is something damned
strange frequenting our planet
and I, for one, would bet my
life that it is not something
native to some.

Yours in all sincerity,

[REDACTED]

14. Did the object disappear while you were watching it? If so, how?

behind some hills

Yes, apparently

15. Did the object move behind something at any time, particularly a cloud? *no*

(Circle One): Yes No Don't Know.
it moved behind: *some hills probably,*

IF you answered YES, then tell what

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes *No* Don't Know.
in front of: _____

IF you answered YES, then tell what

17. Tell in a few words the following things about the object:

a. Sound *none*

b. Color *brilliant white or blue-white*

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

It was about twice (or a little more) the apparent diameter of the moon. I considered this carefully at the time, as I realized I must report the sighting.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

direction of flight

No sound, exhaust, or vapor trail.

20. Do you think you can estimate the speed of the object?

(Circle One)

Yes

No

IF you answered YES, then what speed would you estimate? very fast.

21. Do you think you can estimate how far away from you the object was?

(Circle One)

Yes

No

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object?
(Circle One):

a. Inside a building

b. In a car

c. Outdoors

d. In an airplane (type)

e. At sea

f. Other _____

23. Were you (Circle One)

a. in the business section of a city?

b. In the residential section of a city?

c. In open countryside? ☒

d. Near an airfield?

e. Flying over a city?

f. Flying over open country?

g. Other On the shore of a remote mountain lake

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

Yes

No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

No

b. Sun glasses

Yes

No

c. Windshield

Yes

No

d. Window glass

Yes

No

e. Binoculars

Yes

No

f. Telescopes

Yes

No

g. Theodolite

Yes

No

h. Other _____

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

There is no "common object" with which to compare it.

It's appearance was as it would be if it were made of clear plastic with a brilliant white light inside.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

A ————— B

29. IF there was MORE THAN ONE object, then how many were there? only one.
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No.

31. Was anyone else with you at the time you saw the object? (Circle One)

Yes

No

31.1 IF you answered YES, did they see the object too? (Circle One)

Yes

No

Air Technical Intelligence Center,
Wright-Patterson Air Force Base,
Dayton, Ohio.

Dear Sirs:

I wish to report having seen a "flying Saucer". Let me say first that no-one could have been more skeptical than I about the existence of these objects. The circumstances were these.

I was on a vacation camped on a small lake called Rock Island Lake which is near Taweeel Lake about eighty miles north of Kamloops, British Columbia. About three o'clock in the morning on Friday, July 11th I could not sleep so got up and went down to the lakeside. It was dark and I could just see the outline of trees against the sky. The sky was perfectly clear and the moon about half full and at a height of about forty degrees above the horizon.

Suddenly under the moon and at a height about halfway between the moon and the horizon my eyes caught this light, which traveled from east to west perfectly horizontally and was in sight for about four seconds. I had no way to judge its distance so could not estimate size or speed except that it seemed very fast. Its apparent size was about twice the diameter of the moon. When it disappeared I cannot be sure whether it went behind the hills or whether its light went out, probably the former. Its size seems to me to have remained apparently the same during the time it was in sight.

Its appearance was as if it were made of clear plastic containing a brilliant white light. The main body was a disk the thickness of which was about one-sixth of its diameter. At the rear was a blunt rounded nose about the shape of the nose of a revolver bullet. There was no sound and no trail of exhaust or sparks. Below is a sketch of its appearance as well as I can draw it.

For two days afterward I tried to convince myself that this was a reflection or could be accounted for by some normal means but have been unable to do so. My thinking changed in four seconds from an attitude of almost complete disbelief to one of firm conviction that this thing exists and that I saw it.

Yours sincerely,

Major Maston M. Jacks,
Dep't. of the Air Force,
Washington, D. C.

Dear Sir:

I have filled out the questionnaire sent me on August 18th and am returning it herewith.

I am also enclosing a copy of my first letter reporting this sighting. After twelve years I have no reason to change any part of this letter except for two minor corrections which I have noted.

I still recall with amusement some carefully disguised questions in the original questionnaire which asked in effect if you had been drinking before the sighting. My reply was that I hadn't been drinking before, but that I sure went up to the cabin and took a good stiff one afterward.

I was considerably "shook up", and still am whenever I think about it.

My interest in this matter has now been renewed, and I will be glad to have any further information you may be able to give me.

Yours sincerely,
