Mr. [REDACTED] Street, Harrisburg, Pa., reported observing an unidentified flying object on 2 August at approximately 0100Z. Mr. [REDACTED] at the time of his observation, was located on the porch of his third-floor apartment. The geographic location of the observer was approximately 7653W - 4016N. According to Mr. [REDACTED] he first noticed a brilliant white light in the N.E., climbing rapidly at a 50° angle. The object which was described as being the size of an auto headlight was reported to have vanished as suddenly as it appeared. The object was in view for approximately three to four seconds. The observer could give no estimate of the object's speed or altitude. Further, no sound was experienced nor any exhaust or trail observed. The weather at the time of the observation was approximately ten miles, clear. The observer appeared to be a man of average intelligence and not excessively imaginative. It should be noted that Mr. [REDACTED]'s report checks closely in time and description with reports submitted by Mr. [REDACTED] and Mrs. [REDACTED] of Marietta, Pa. Marietta is approximately twenty miles east of Harrisburg.
