3 June 52

While on TDY at Guayaquil, Ecuador, M/Sgt [redacted] observed flying objects unconventional by present standards at Puna Island, Ecuador. The objects appeared to be approximately 50 feet in diameter seen from an estimated distance of ten miles and maintained an estimated altitude of from 30,000 to 40,000 feet. No known meteorological disturbances existed which could have accounted for the sighting.

M/Sgt [redacted] is considered to be reliable, his observations are considered of sufficient significance to be worthy of investigation.

DETAILS:

UNCLASSIFIED

1. This investigation is opened at the direction of the District Commander, predicated upon information furnished by 1st Lt WILLIAM L. McCLELLAND, Assistant Adjutant, Sandia Base, New Mexico, concerning the observation of an unidentified aerial object by Captain CLAUDE W. McELWAIN.

AT ALBUQUERQUE, NEW MEXICO

2. The following report was made by Captain CLAUDE W. McELWAIN of Field Command, Armed Forces Special Weapons Project, Sandia Base, New Mexico:

0230

"At approximately 1930 MST on 3 August 1952 while car riding with my family, my son [REDACTED], age seven, noticed a brilliant glow in the western skies. At first I was willing to discount it as the evening star. Then I decided to observe it through the binoculars (7 x 50). We observed it for about 15 minutes. The object appeared, to the naked eye, to be an unusually bright star and at first to be hovering or motionless. With the glasses it appeared oval shaped with an appendage tail or exhaust to the right of the main body. It disappeared behind the horizon. By comparison and without reference or known factors, the object looked about like an amber head light of an automobile at a distance of about 300 yards, when looking at the head light from an angle—not head on. There was just one object and appeared (to be going due west.) This object was observed from about 1930 to 1945 MST 3 August. My location was Buena Vista at Anderson Avenue about six blocks due north of the Lovelace Clinic, city of Albuquerque. If it had been a plane at 10,000 feet, I would have guessed its speed at 350 mph. If this object was 5,000 feet its speed could have been 1700 - 1800 mph. The size would be hard to determine under the circumstances. I do not feel that I have any particular qualifications as an observer but I try to be realistic and practical in my observation and projection of the mental image. I do have over ten years of active military service and did take a course in aircraft identification in 1942. I was on duty with the Air Force for three years. The sky was very clear with the exception of a few scattered cloud banks. The wind was about 20 mph, from the east. The sun had gone down but it was not dark yet. I saw no metallic or physical properties at all. There was no fragment of sound that I was able to detect. I carry two pairs of binoculars and two cameras at all times and did not feel that, due to the distance involved, a photograph could be taken with either of the two types of cameras I have. This observation was reported to Major ELLIOT, Intelligence and Security Division, at approximately 2000 MST 3 August 1952 and to Major WADE at 1030 MST 4 August 1952. Other witnesses present were Mr. and Mrs. JACKSON who live at the corner of Buena Vista and Anderson, Albuquerque, (he is a Security Guard at Sandia Base); Mrs. [REDACTED] wife of the undersigned, and a number of children."

3. Captain McELWAIN furnished sketches as to his observation of the object and his location, which are being attached as an inclosure to this report.
