For a person with limited knowledge about things of this nature an opinion advanced may be of ~~some~~ little value, I don't know what it was, I can and will insist on what it was Not, I have seen meters, and the newspaper will have a hard time telling me I was looking at a meter on 7/12 - maybe it sounds good to persons who didn't see the object - this I think was being blown - picture for yourself a jet plane going over and into the horizon, now set it on fire to a bright glow and have it travel 3 times as fast covering the same trajectory in 1/3 the time - does it look like a meter?

In summation, this may sound as tho I am inferring some fraud in the reports given to the public, perhaps responsible parties believe they are true and the best information available. But did they see the thing on 7/12.
