10. BRIEF SUMMARY OF SIGHTING Civilian pilot, an inactive AF reserve captain, sighted a flaming orange-red football shaped object traveling on collision course with his light a/c. Object pulled up and shot over windshield moving in opposite direction from course of plane. Object was traveling at 700 mph.				11. COMMENTS 1. The brevity of observation and the description give the impression of a meteor. However, the objects change of direction upward is inconsistent with this theory.

1. [REDACTED] Captain Air Force Reserve (Inactive), presently employed by [REDACTED] Inc., [REDACTED] New York 22, New York, submitted a letter to Commanding General, Headquarters First Air Force, Mitchel Air Force Base, New York, dated 23 September 1952, which is verbatim as follows:

"Dear Sir:

If I had not seen the enclosed clipping, I probably would not make the following report. However, since other people in the vicinity where I recently saw an unusual phenomenon saw the same thing, I thought perhaps I should describe my experience.

"On 13 September 1952 at about 1940 EDT I was flying alone at 10,000 feet from Allentown, Pennsylvania, to the Caldwell-Wright Omni Station in a Beechcraft Bonanza. Visibility at that altitude was about 12 miles. There were no clouds of any kind although there was some haze...from the ground to more than 12,000 feet.

"I was approximately 15 to 20 miles NE of Allentown when suddenly a bright object which appeared to be shaped like a fat football and three feet in diameter, flaming orange-red in color, appeared at a distance of 150 to 200 yards ahead of me at eleven o'clock high. It was descending at about a 30° angle...My first impression was that it was a "falling star" and that I was on a collision course with it. I immediately pulled up into a steep climb to avoid hitting it; but the object, instead of continuing on its downward course, very suddenly pulled up into about a 65° climb and went directly over my windshield. I quickly made a 180° to the right but could no longer see the ball of fire. If the object was at the distance and was of the size that it appeared to me to be, I would estimate it was traveling at better than 700 miles an hour. If what I saw was actually a physical object, the rapidity with which it altered its course was astonishing.

"Since I was able to see it for not more than two seconds, I hesitated to report what I saw. After the object went by, I resumed my course and for the next 20 minutes tried

to be sure that what I had seen had not been a light reflection on the windshield. I feel reasonably sure it was not.

"I regret now that I did not make this report immediately but the experience was so brief that I hesitated to report it until I saw the enclosed newspaper report."

2. The newspaper report referred to by [REDACTED], was obtained from the newspaper, Newark Evening News, Newark, New Jersey, dated 18 September 1952, titled "Flying Saucer Seen in Morris" which is set forth verbatim below:

"[REDACTED] - A flaming object, larger than an airplane, was reported hovering over this community last night by six persons, each of whom termed it a "flying saucer".

"One of those who saw it, an artist, will put her impression of the object on canvas.

"Mr. and Mrs. [REDACTED] Avenue described the object as a "flaming red ball with a tail". The tail's density changed, they said. The object hung motionless at an estimated altitude of 4,000 feet for 20 minutes before moving slowly westward in the direction of Hackettstown, they declared".

3. The original copy of [REDACTED] letter remains on file at the District Office.
